

Revolutionizing Car Inventories with a Game-Changing App.

Say goodbye to paper, say hello to efficiency!

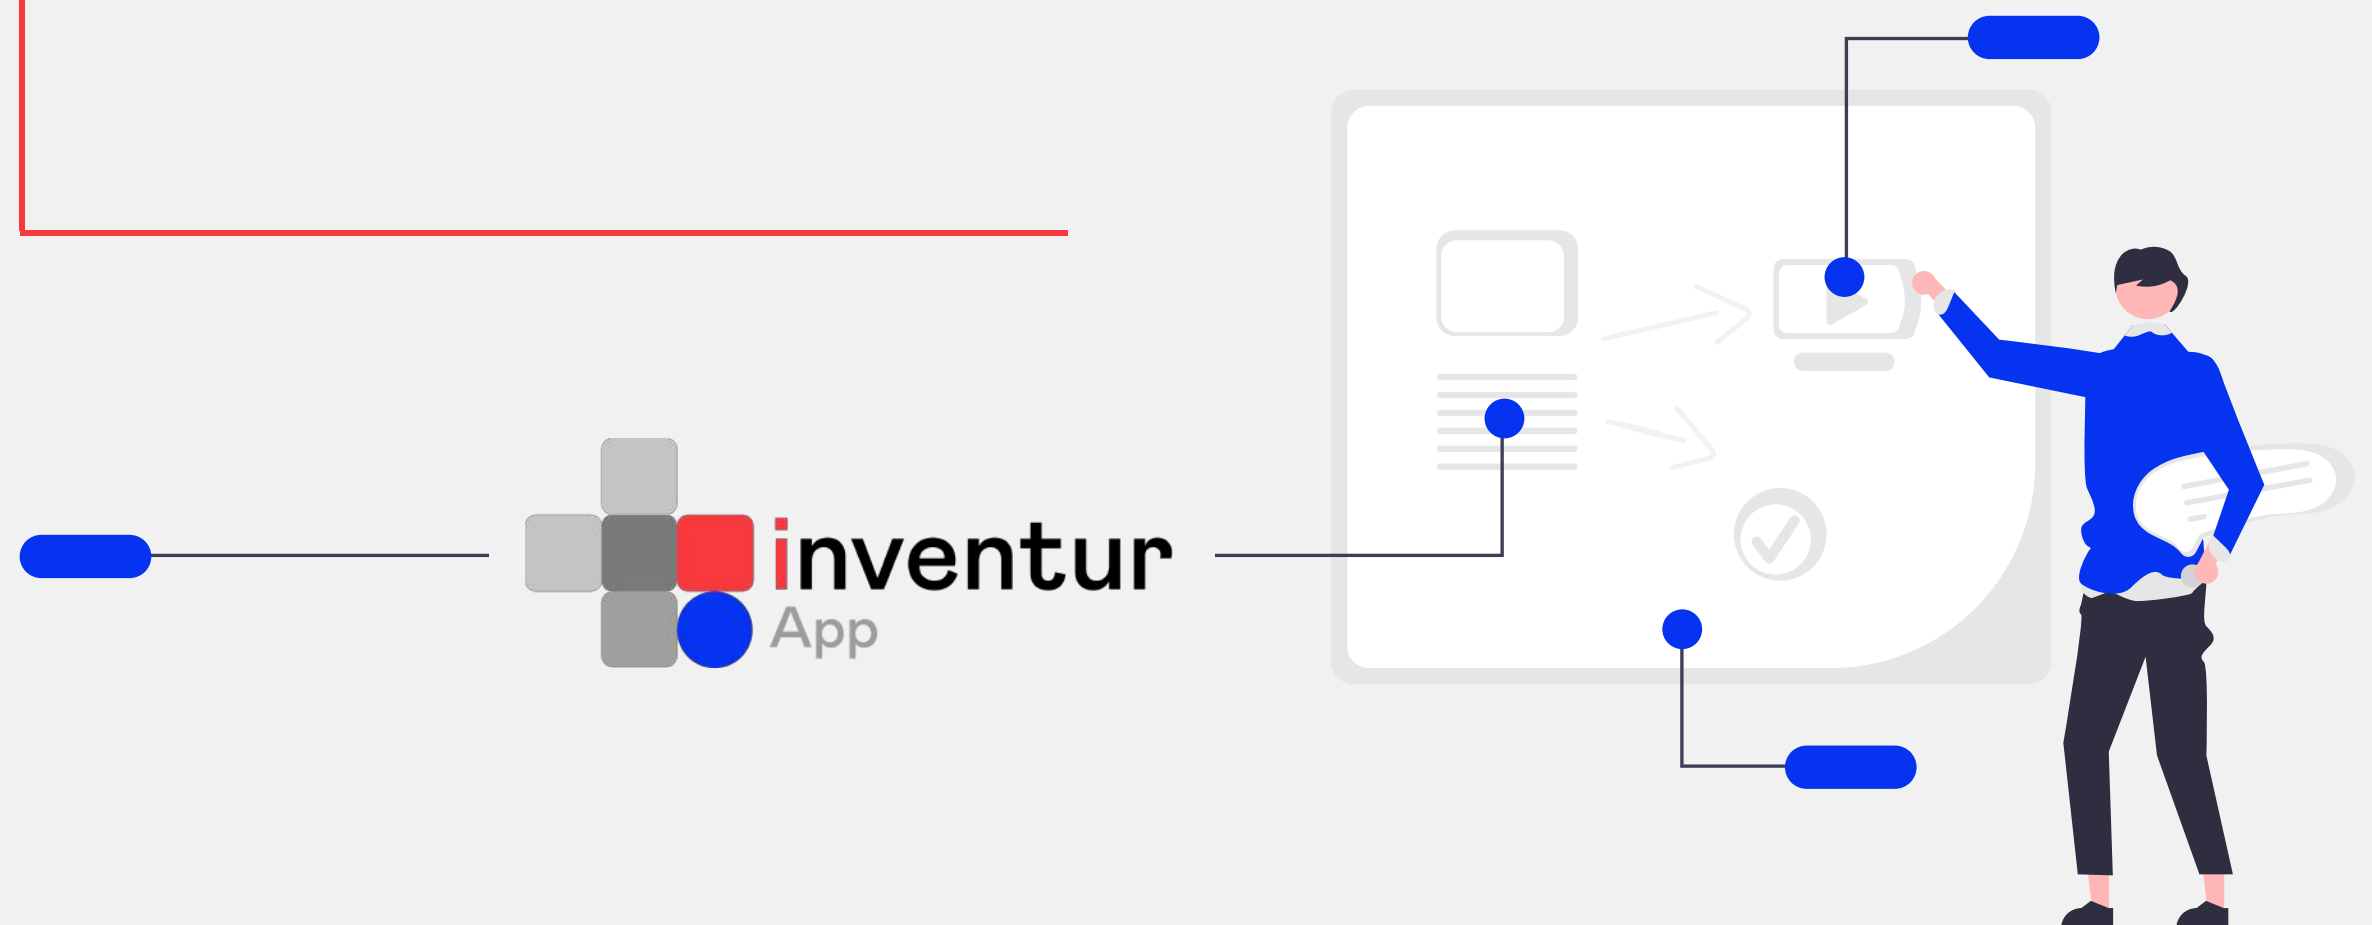

About

Smartphone-Powered Inventory Management by Inventur.

Inventoring cars at a car lot can be a time-consuming and exhausting task. It often requires a significant amount of paperwork and consumes valuable time just to verify whether all the vehicles from the entry list are present on the lot at any given moment. But what if there was a **better way**?

With Inventur, we've digitized the entire inventory process, eliminating the need for mountains of paperwork. Instead, all you need is your smartphone.

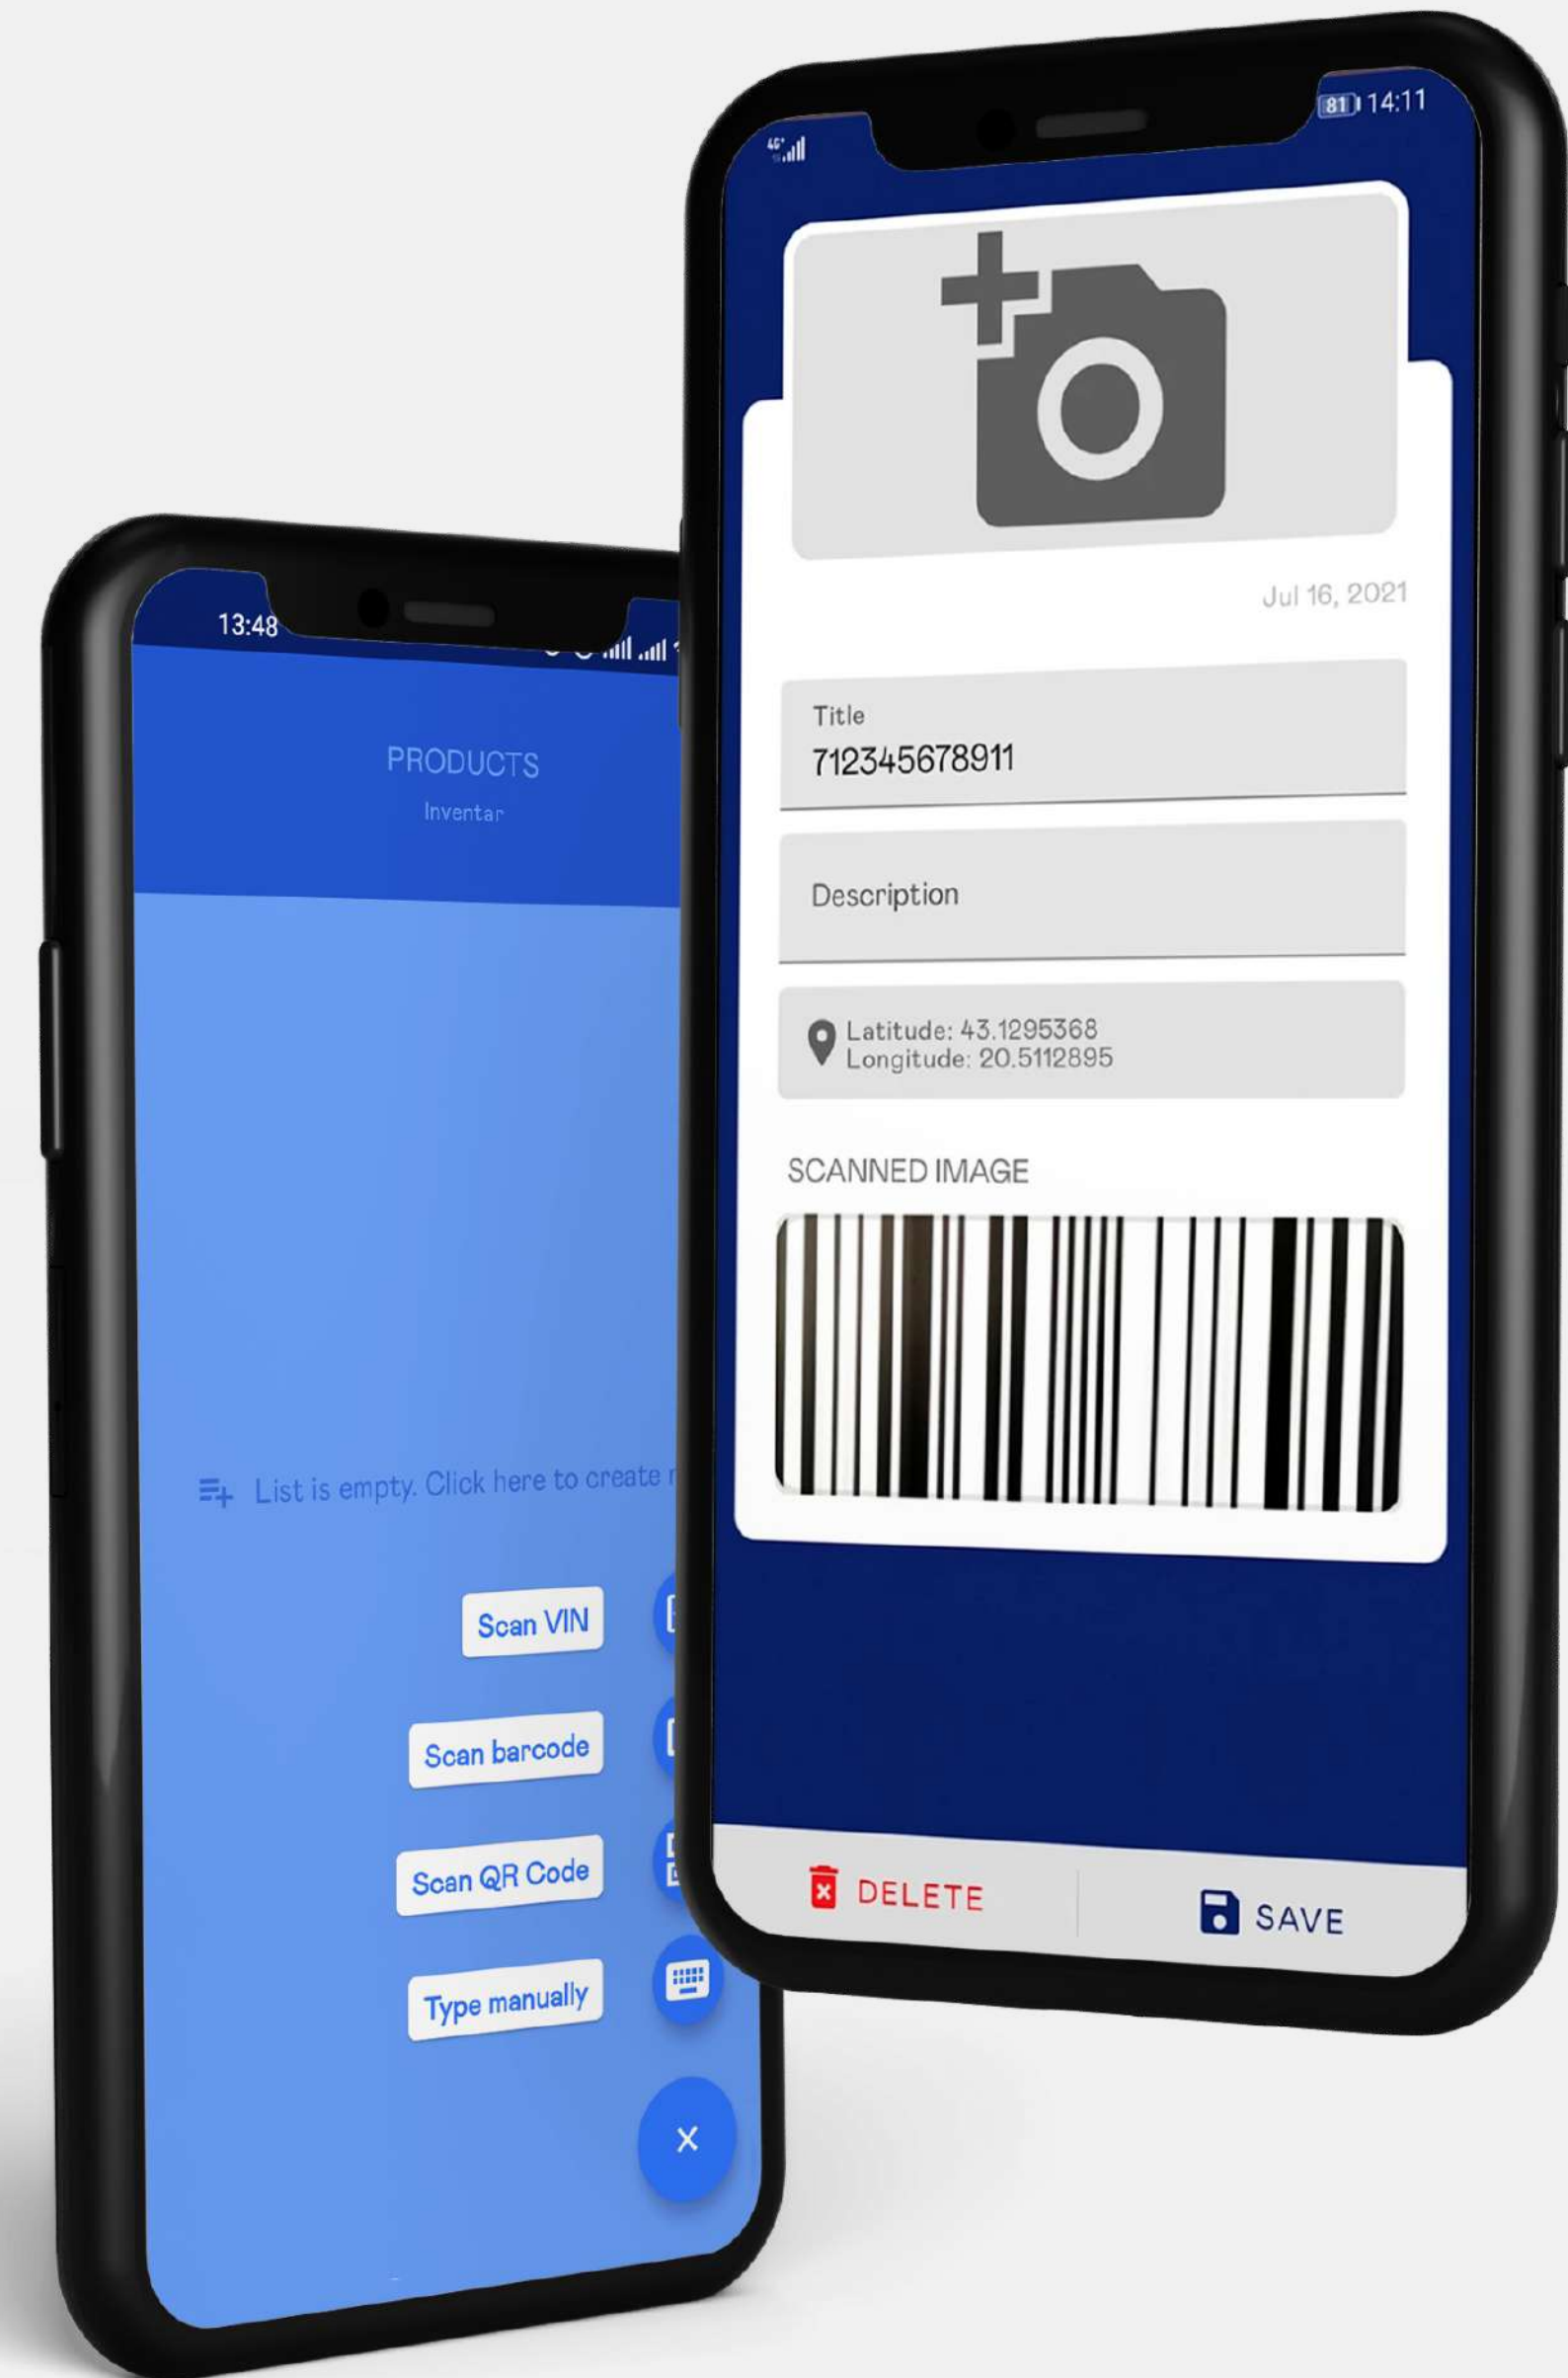

Create New Product

Scan it to Add it. Simplify Vehicle/Product Inventory with Digital Convenience.

Say goodbye to manual VIN entry—now, just scan it with your mobile app. The app automatically records the time and GPS position of each scan. But there's more!

Our application also offers **QR** and **barcode** scanning capabilities, making it versatile for inventory management of various products and other activities.

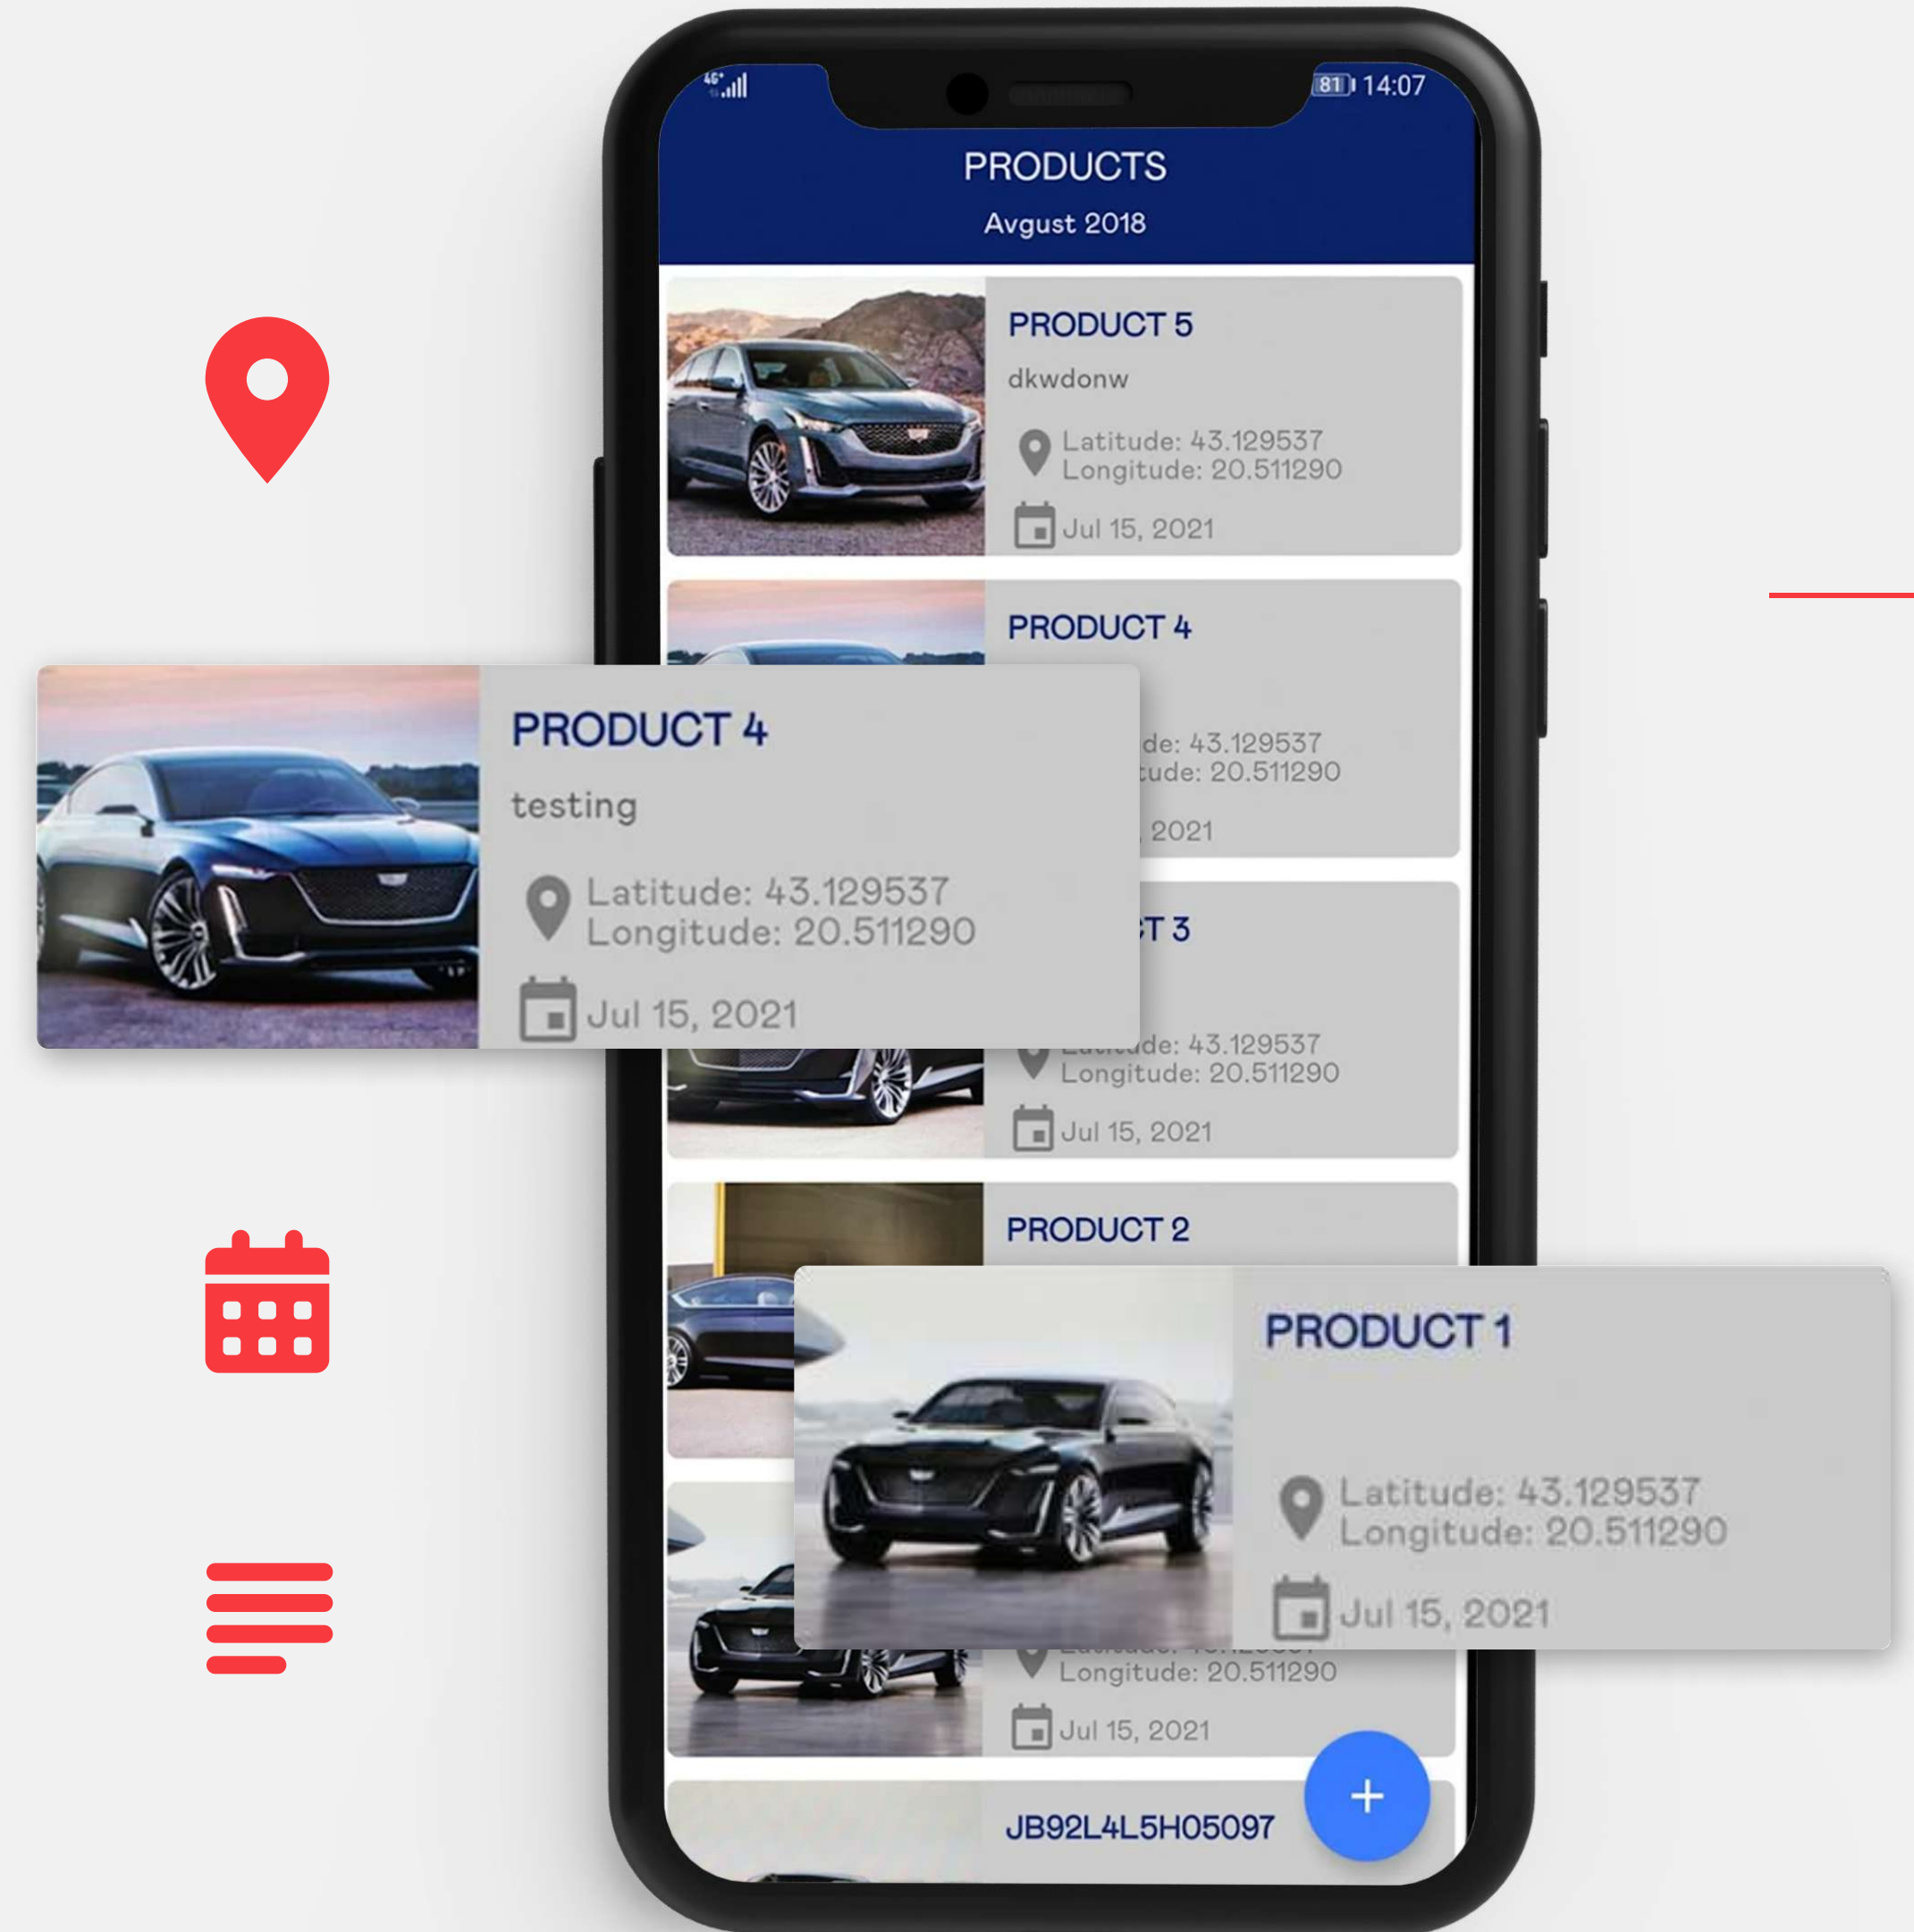

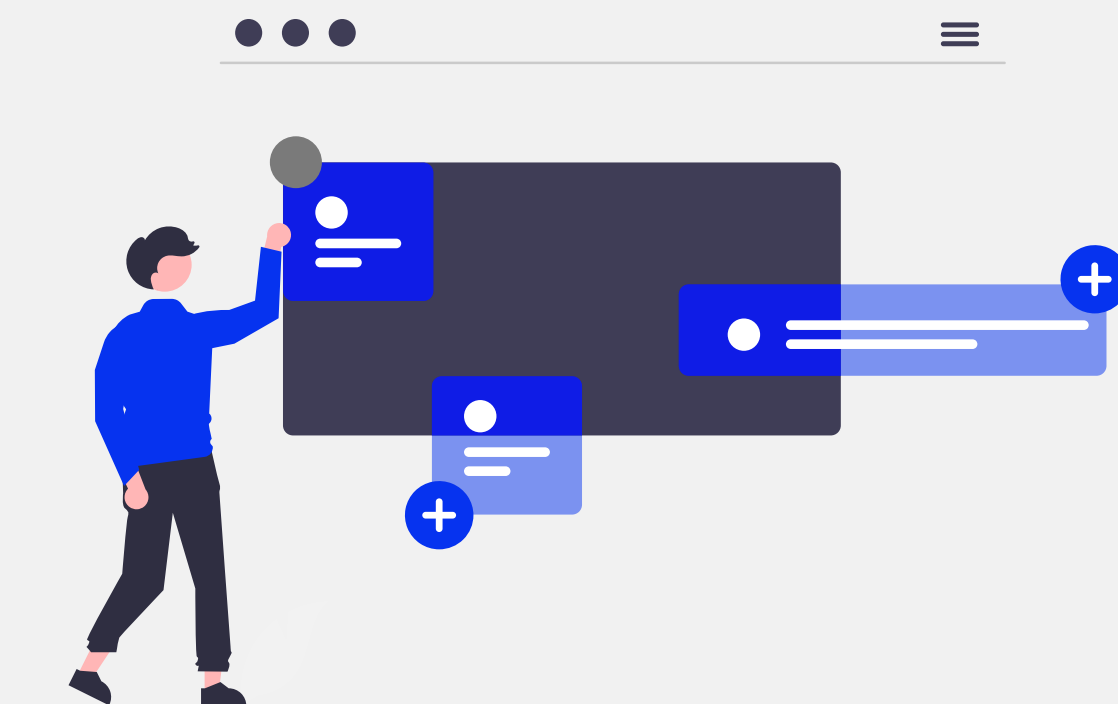

- Scan VIN 
- Scan barcode 
- Scan QR code 
- Type manually 

Products

Effortless Product Management - All Your Product Information at Your Fingertips.

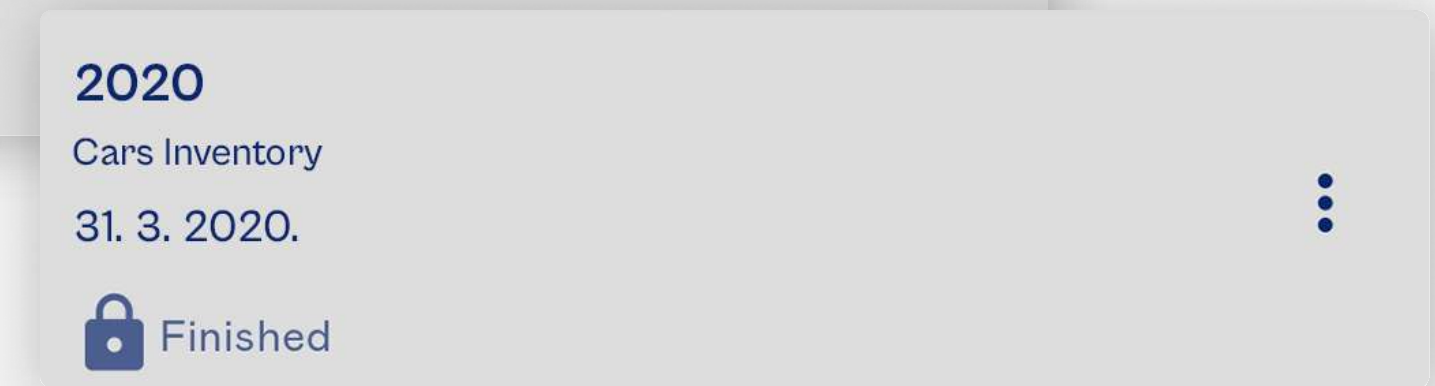

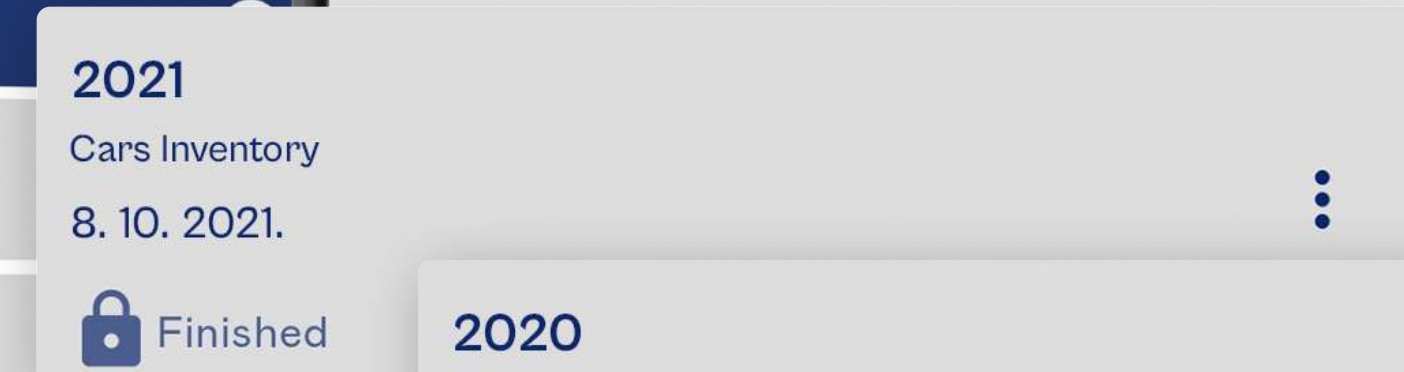

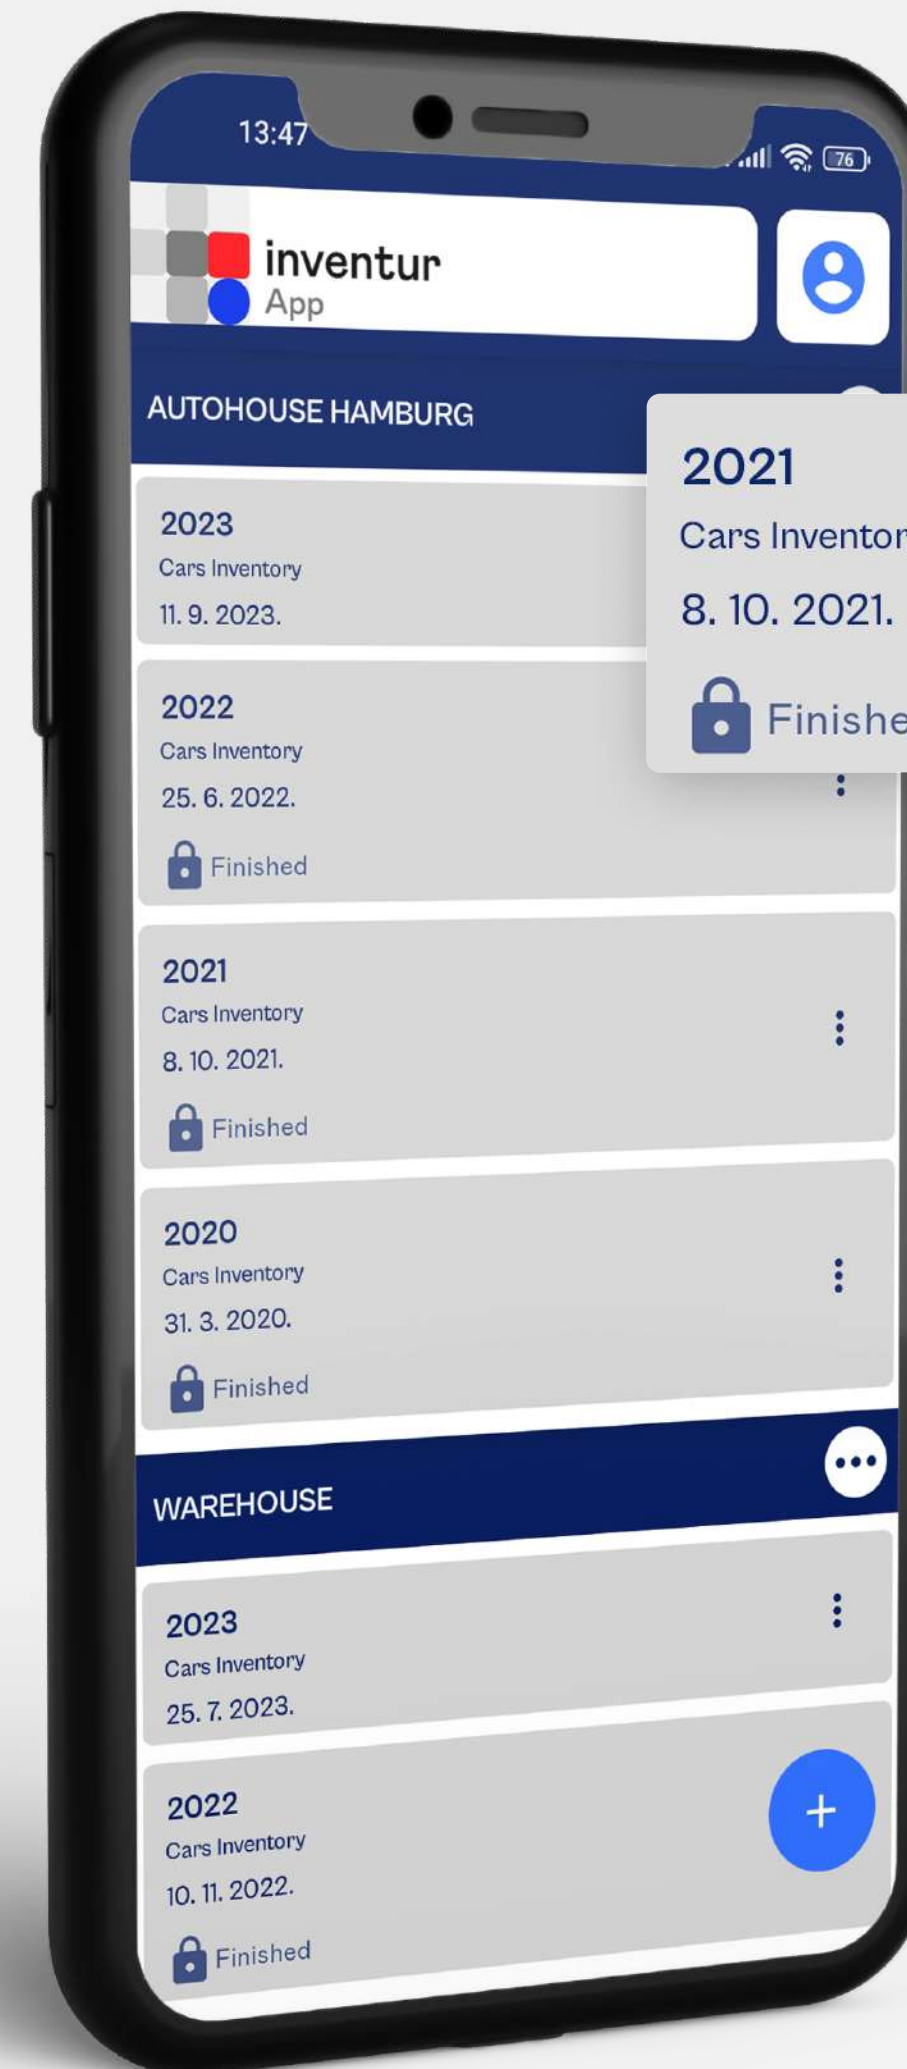

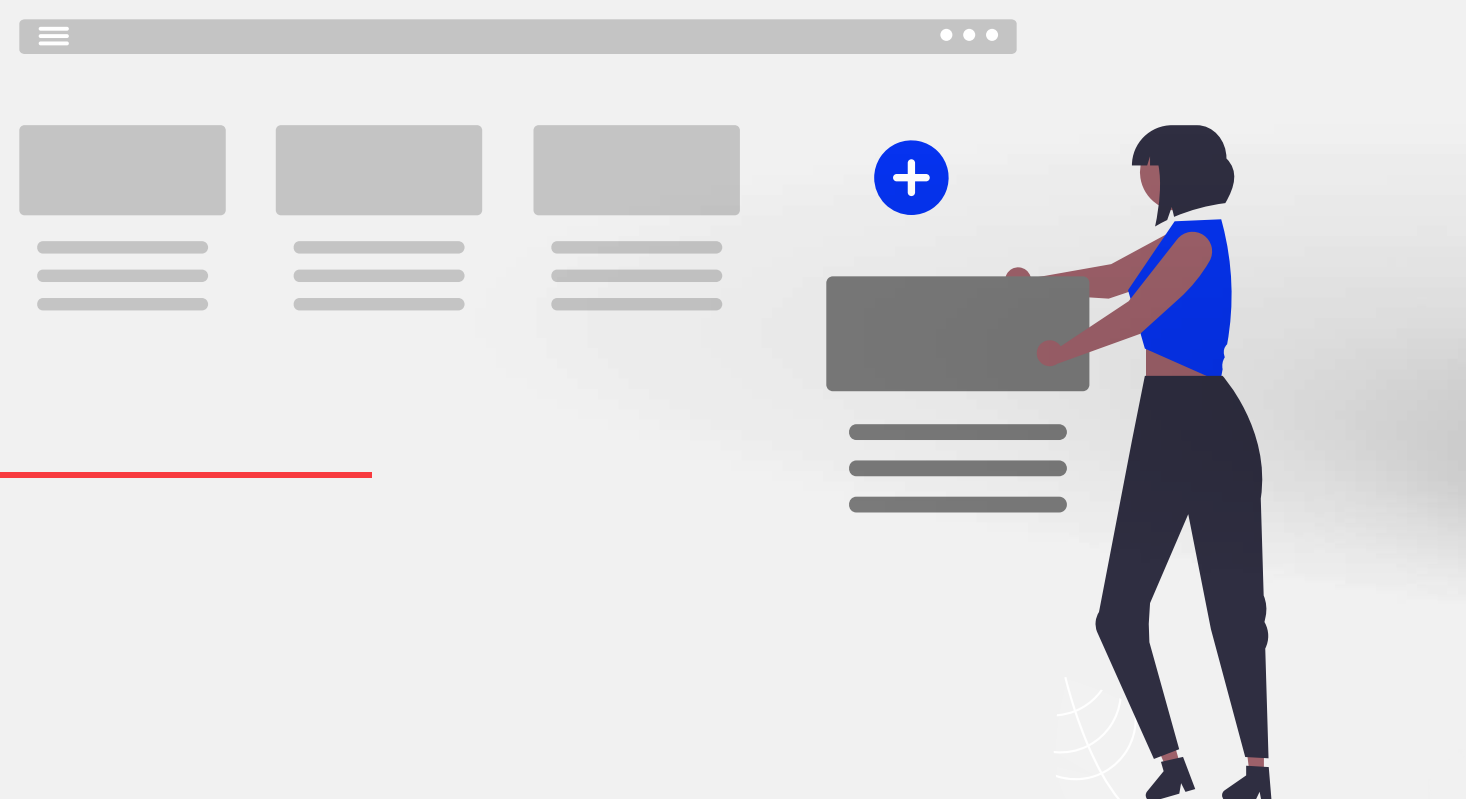

Easily access and manage your products with our intuitive solution. Your saved and finished products are **neatly organized** in an inventory list. When you open a product, you can view all its details, such as VIN number or title, description, pictures and GPS position at the moment of the scan. For unfinished products, you have the flexibility to change titles or descriptions, but not the GPS position. And if needed, you can delete a product. On the product page, you can complete any unfinished products, locking it and preventing further changes or deletion. Streamline your vehicle/product management today.

Inventory List

Shift your inventory lists from the shelf to your pocket.

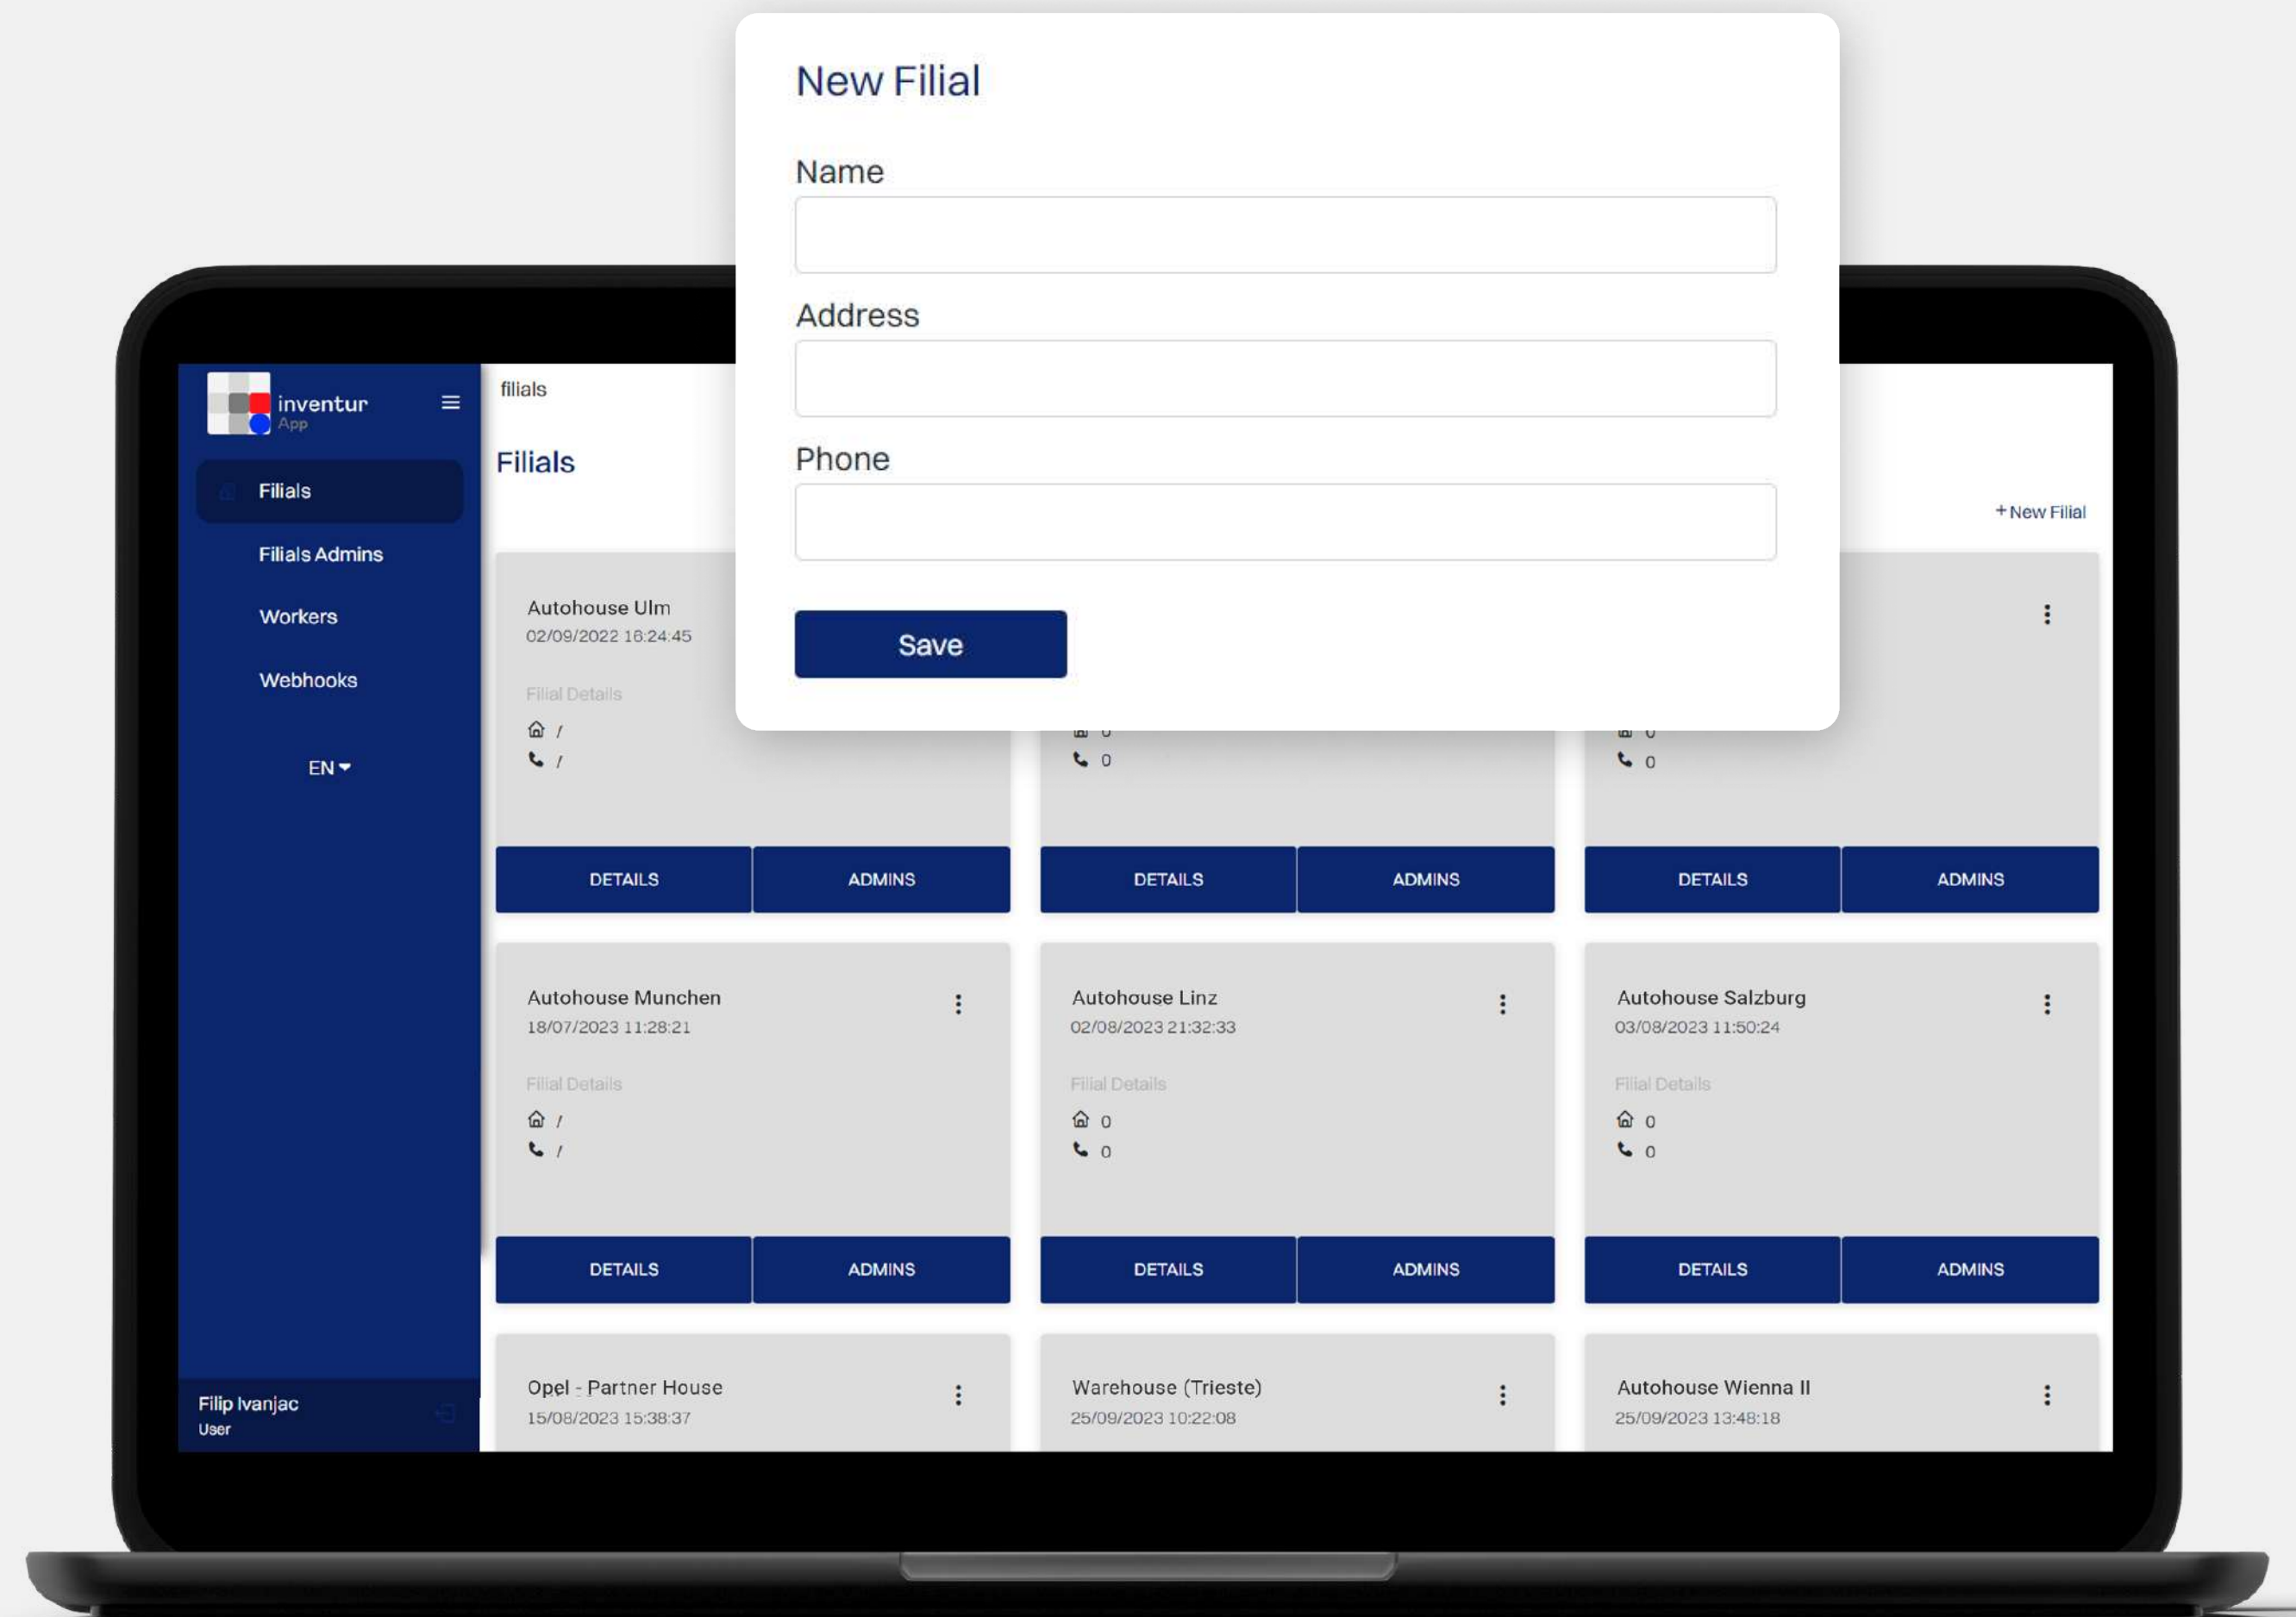

Access All Your Inventory Lists in One Convenient Location - Inventur App. After login, you will have access to all the inventory lists created in Inventur for your department. In this section, you can also **review** the status of every vehicle on the lot during inventory, complete with photos, date, time, and GPS coordinates for precise location tracking. Here you could add, check, complete or delete unfinished inventory lists. In addition, you could export and send lists via various communication apps.

Departments

Effortlessly Access All Departmental Inventory Lists.

No more sifting through dusty books or searching for lost files on your computer. With one click, you can view all inventory lists across every department, **simplifying** your inventory management process. However, it does not stop there! You can also check the status of every vehicle on the lot during inventory, complete with photos, date, time, and GPS coordinates for precise location tracking. Here you could add, check and delete departments or inventory lists.

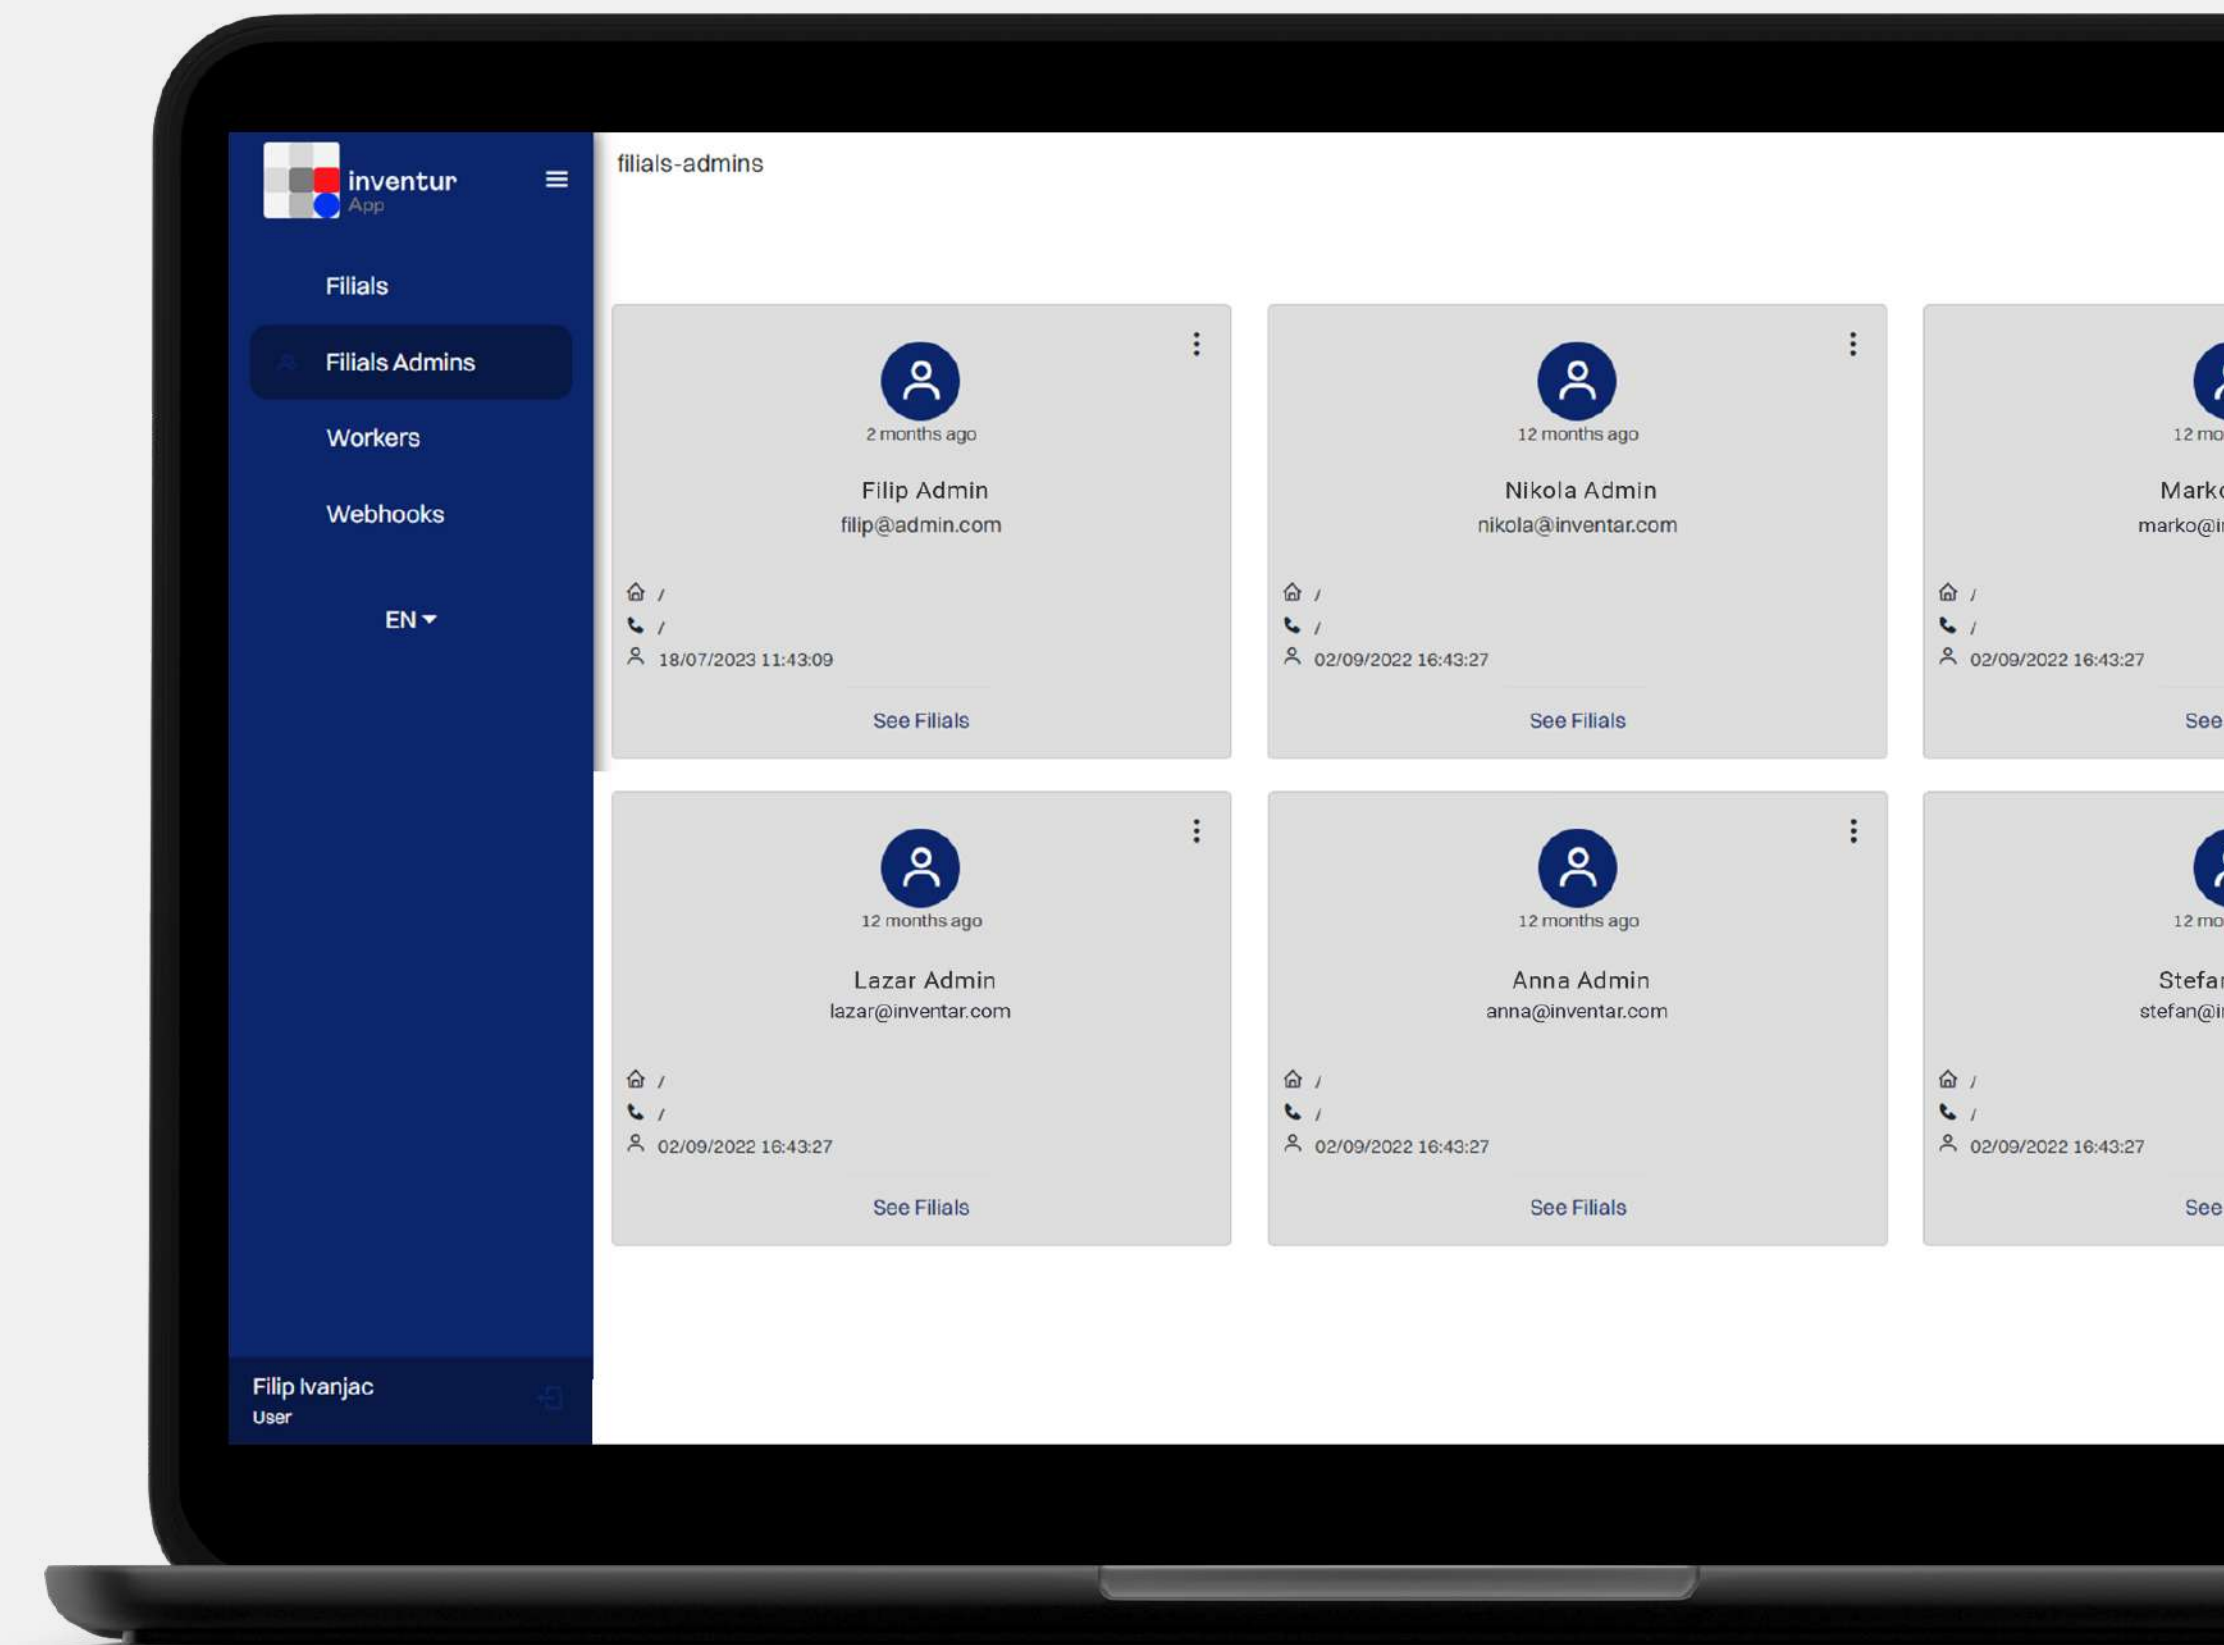

Admins & Roles

Empowering Your Team with Precise Access Control.

Worker: Can add, describe, photograph, and save products, but cannot finish them. Restricted to their designated inventory lists assigned by the Department Admin.

Department Admin: Oversee all lists within their department. Create, delete, finish, and export lists. Manage workers and assign inventory lists.

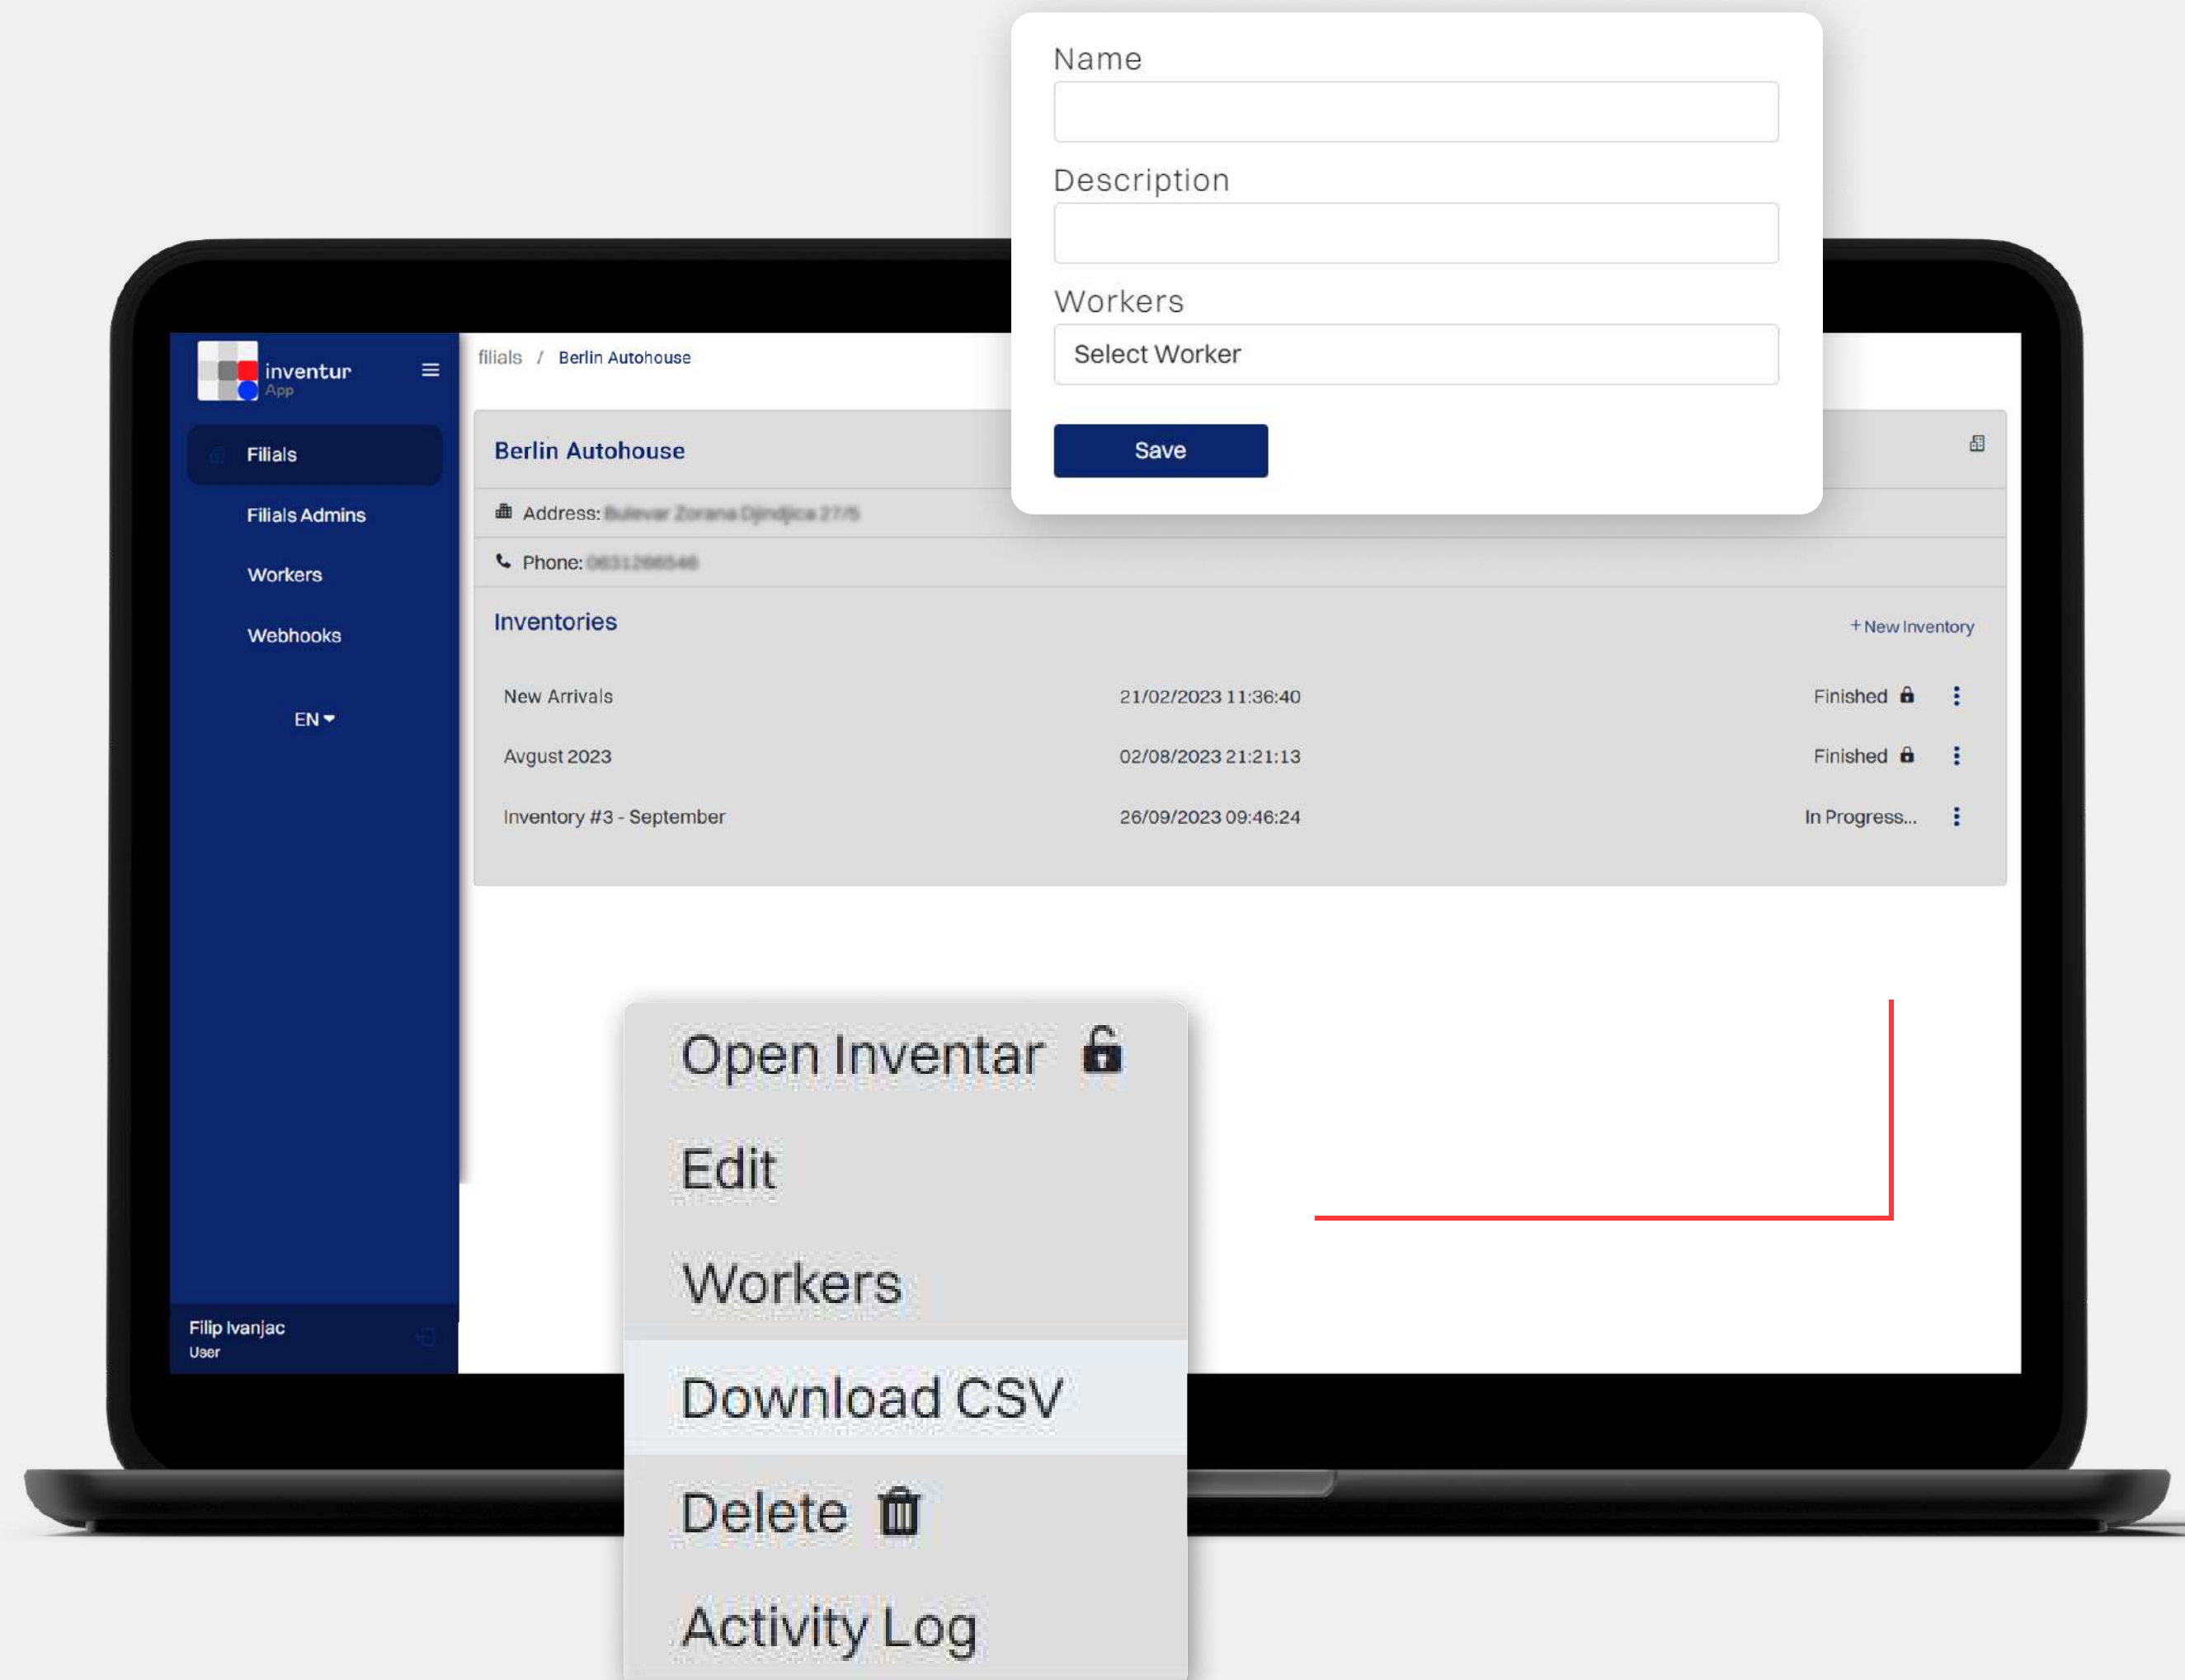

Company Admin: The pinnacle of authority. Access to all departments and lists, with full control. Create departments, assign workers, and exercise complete control over inventories.

Export

Quick and effortless, from your cell phone to your computer.

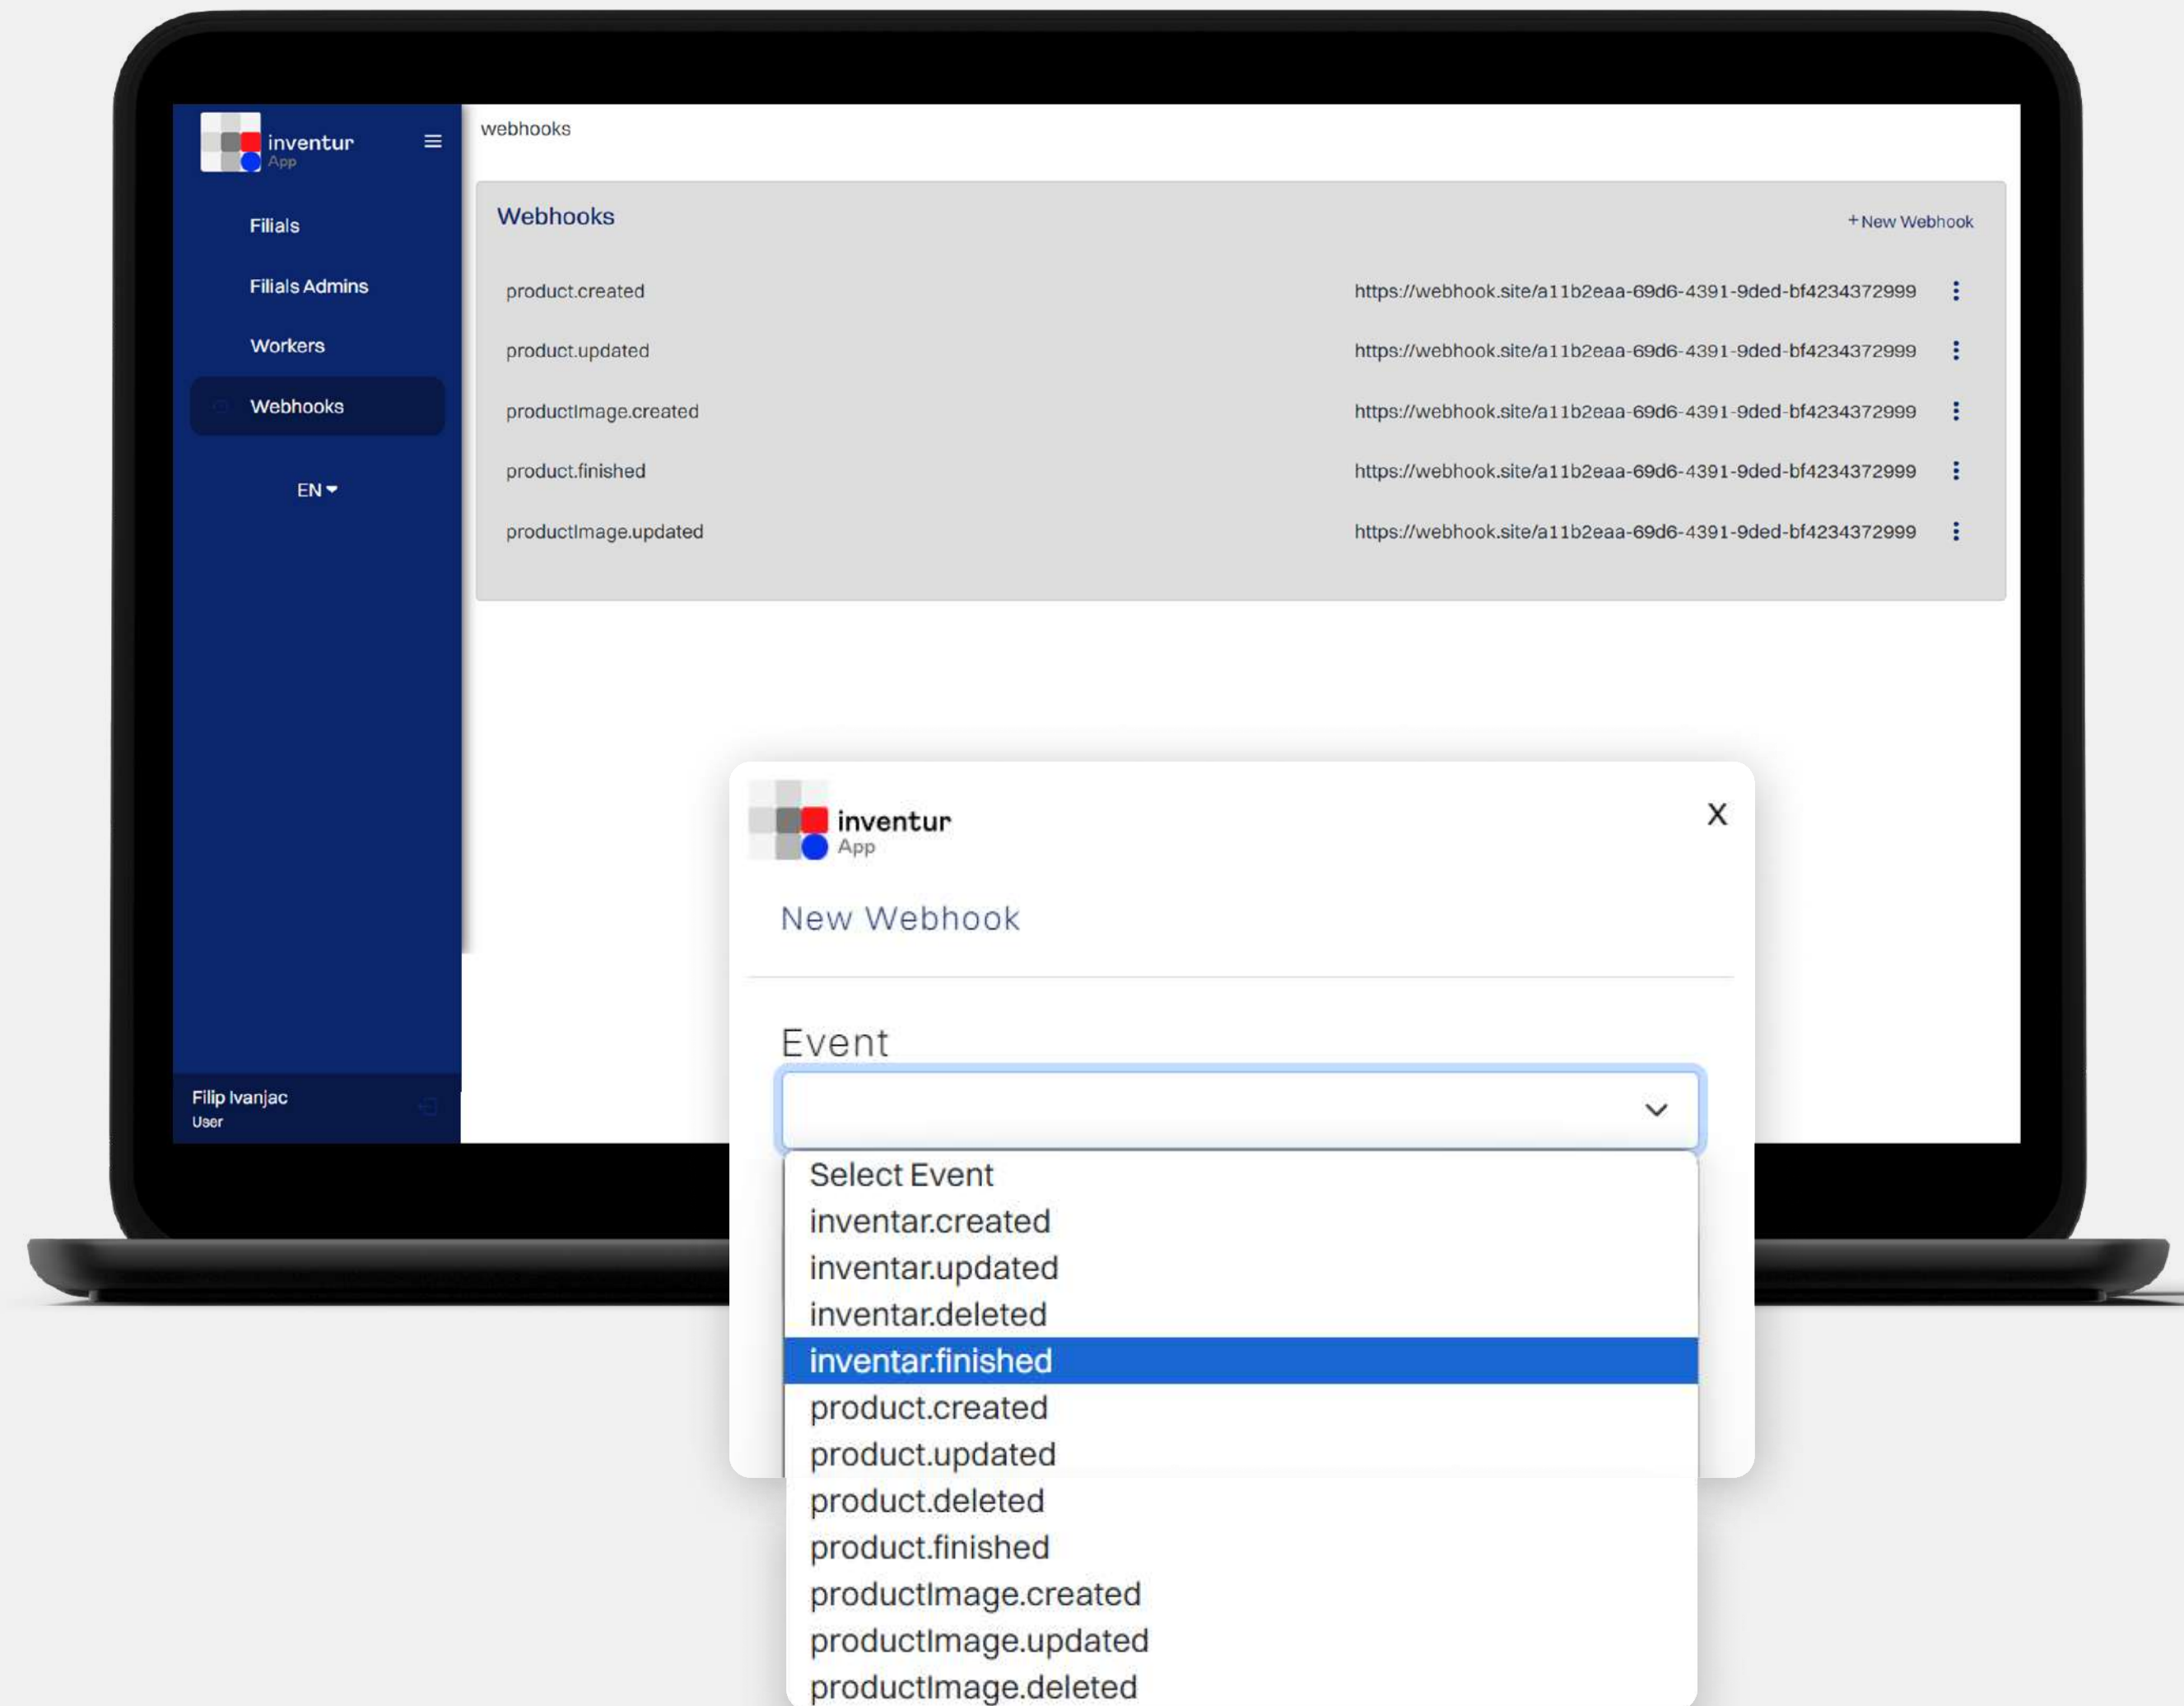

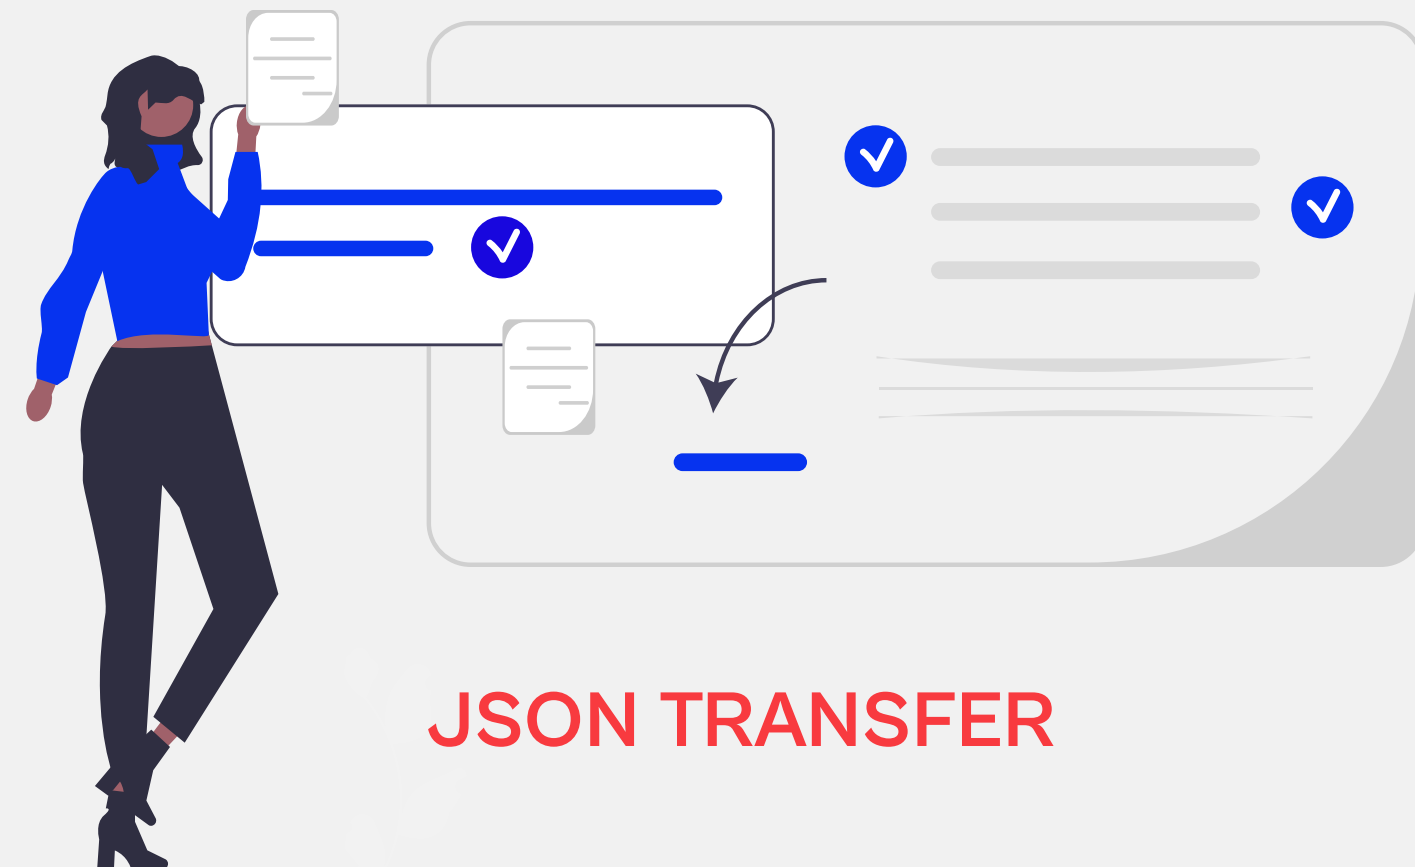

Inventory with ease and share effortlessly! When you finish the inventory process and choose to complete the list, you can view and export it as a CSV file. Moreover, you have the option to send the list via email or other communication apps.

Webhooks

Game-Changing App for Swift Web Hook Integration.

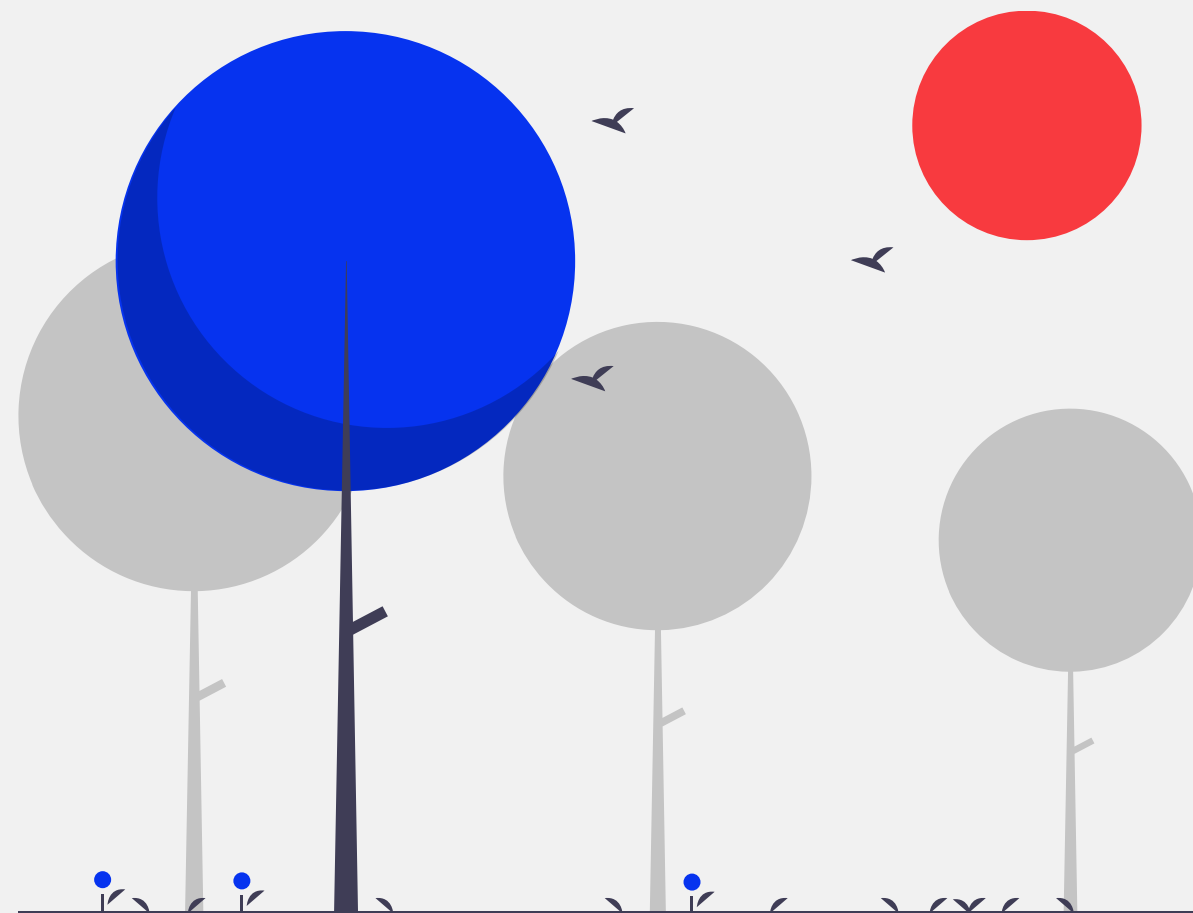

Experience the future of seamless connectivity through our groundbreaking app. By simply providing a URL, companies can access **real-time** updates, automating processes for unparalleled speed and efficiency. Say goodbye to delays and hello to instant transformation.

Eco Friendly

Embrace the Future: Go Green with Inventur.

Eliminate paper, so you can save money and trees! Fast, efficient, and **error-free**, Inventur saves time and reduces human errors. But that's not all. This application is eco-friendly. Say goodbye to printing endless inventory lists, storing them in space-consuming bookshelves collecting dust and being lost when you need them. Welcome to the future of inventory management!

Thank you for your interest.
