

MY AUTOHOUSE

REMOTE CAR PURCHASE

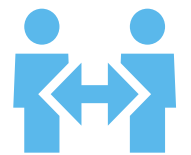

Your Dream Car, Delivered.

ABOUT

Imagine the situation.

You are negotiating with the client to exchange the old car for a new one, in a conventional way...

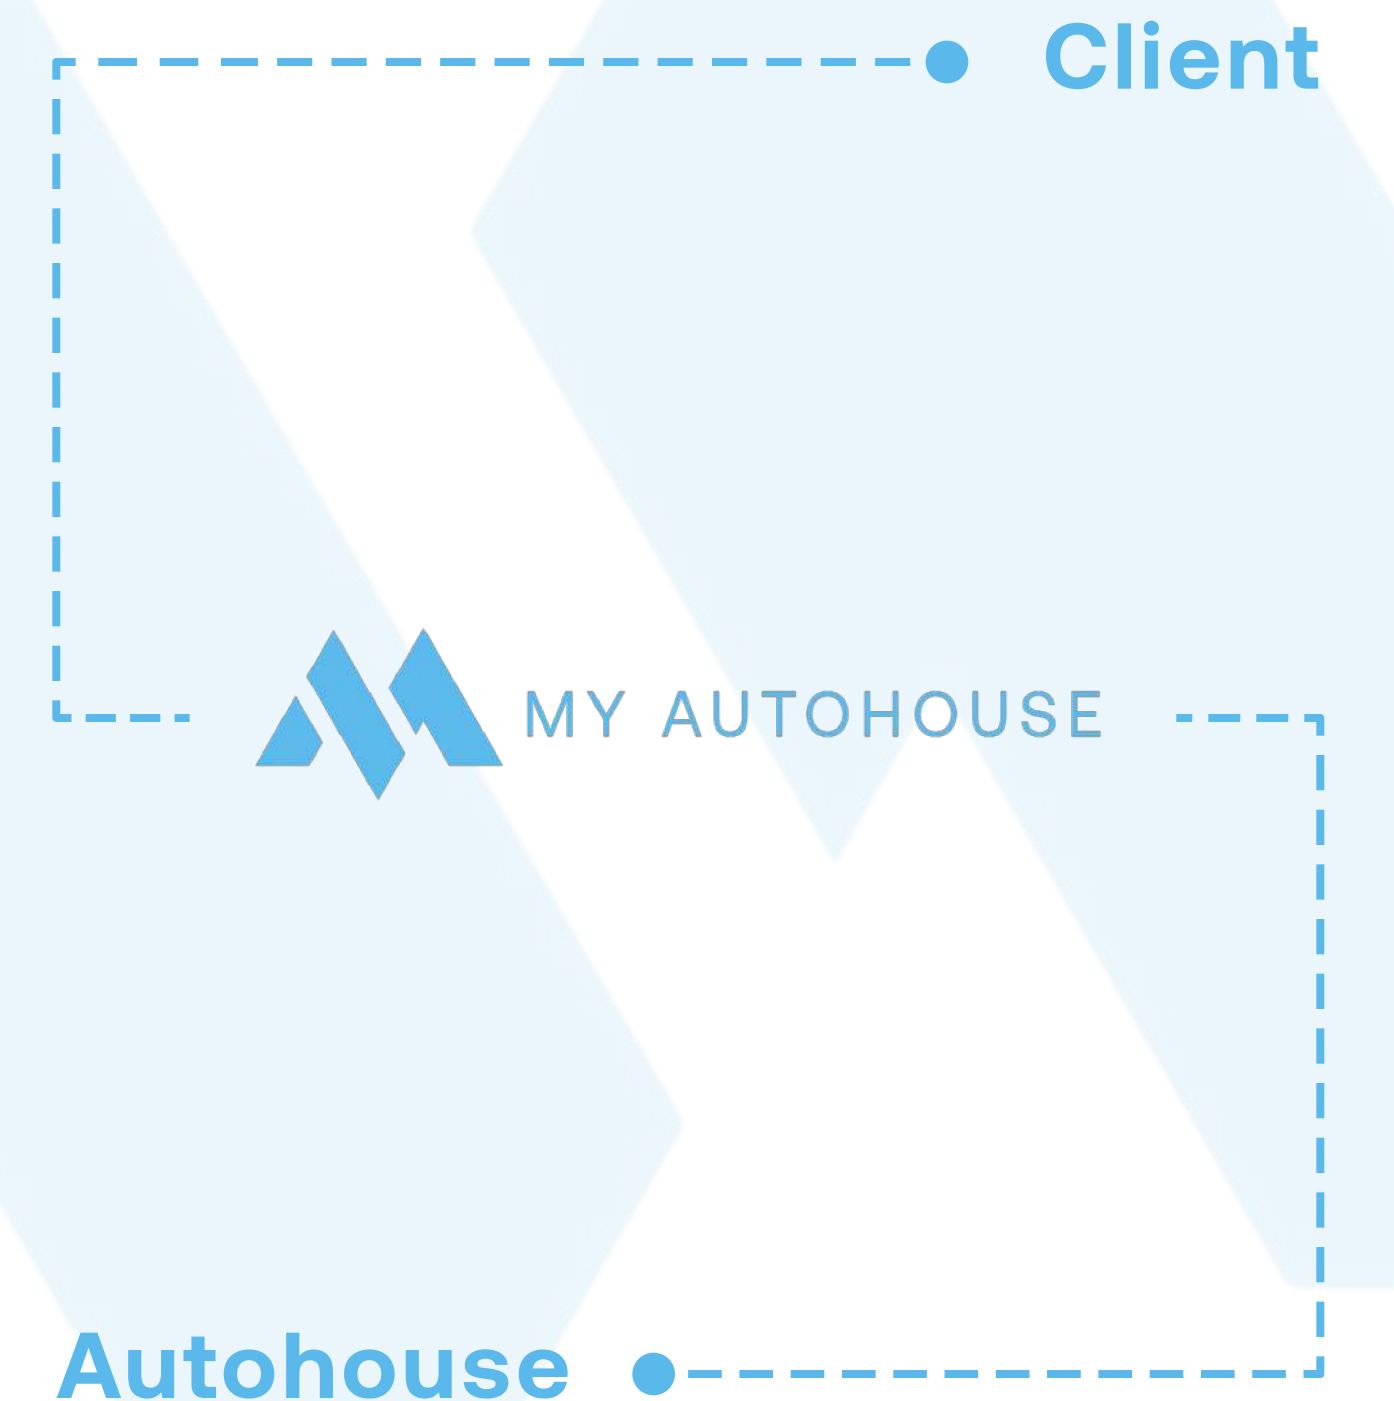

-  **Calls, scheduling appointments**
-  **The client is located 200 km away from the car dealership**
-  **He may arrive on time, he may be late**
-  **Uncertainty as to whether the vehicle even meets the criteria for redemption**
-  **Loss of time on both sides, money, fuel...**

ABOUT

My Autohouse App

This application enables remote transactions for selling, trading, and buying vehicles. Photos and information about the vehicle are sent to the car dealer using the application, who performs a virtual inspection and evaluates the value of the car. In the same way, a car dealership can offer a vehicle to its client base by sending them photos and information about the car.

Experience the convenience of remote car transactions, saving you time, money and hassle, as you effortlessly buy or sell vehicles from the comfort of your home.

CLIENT BENEFITS

Everything is online.

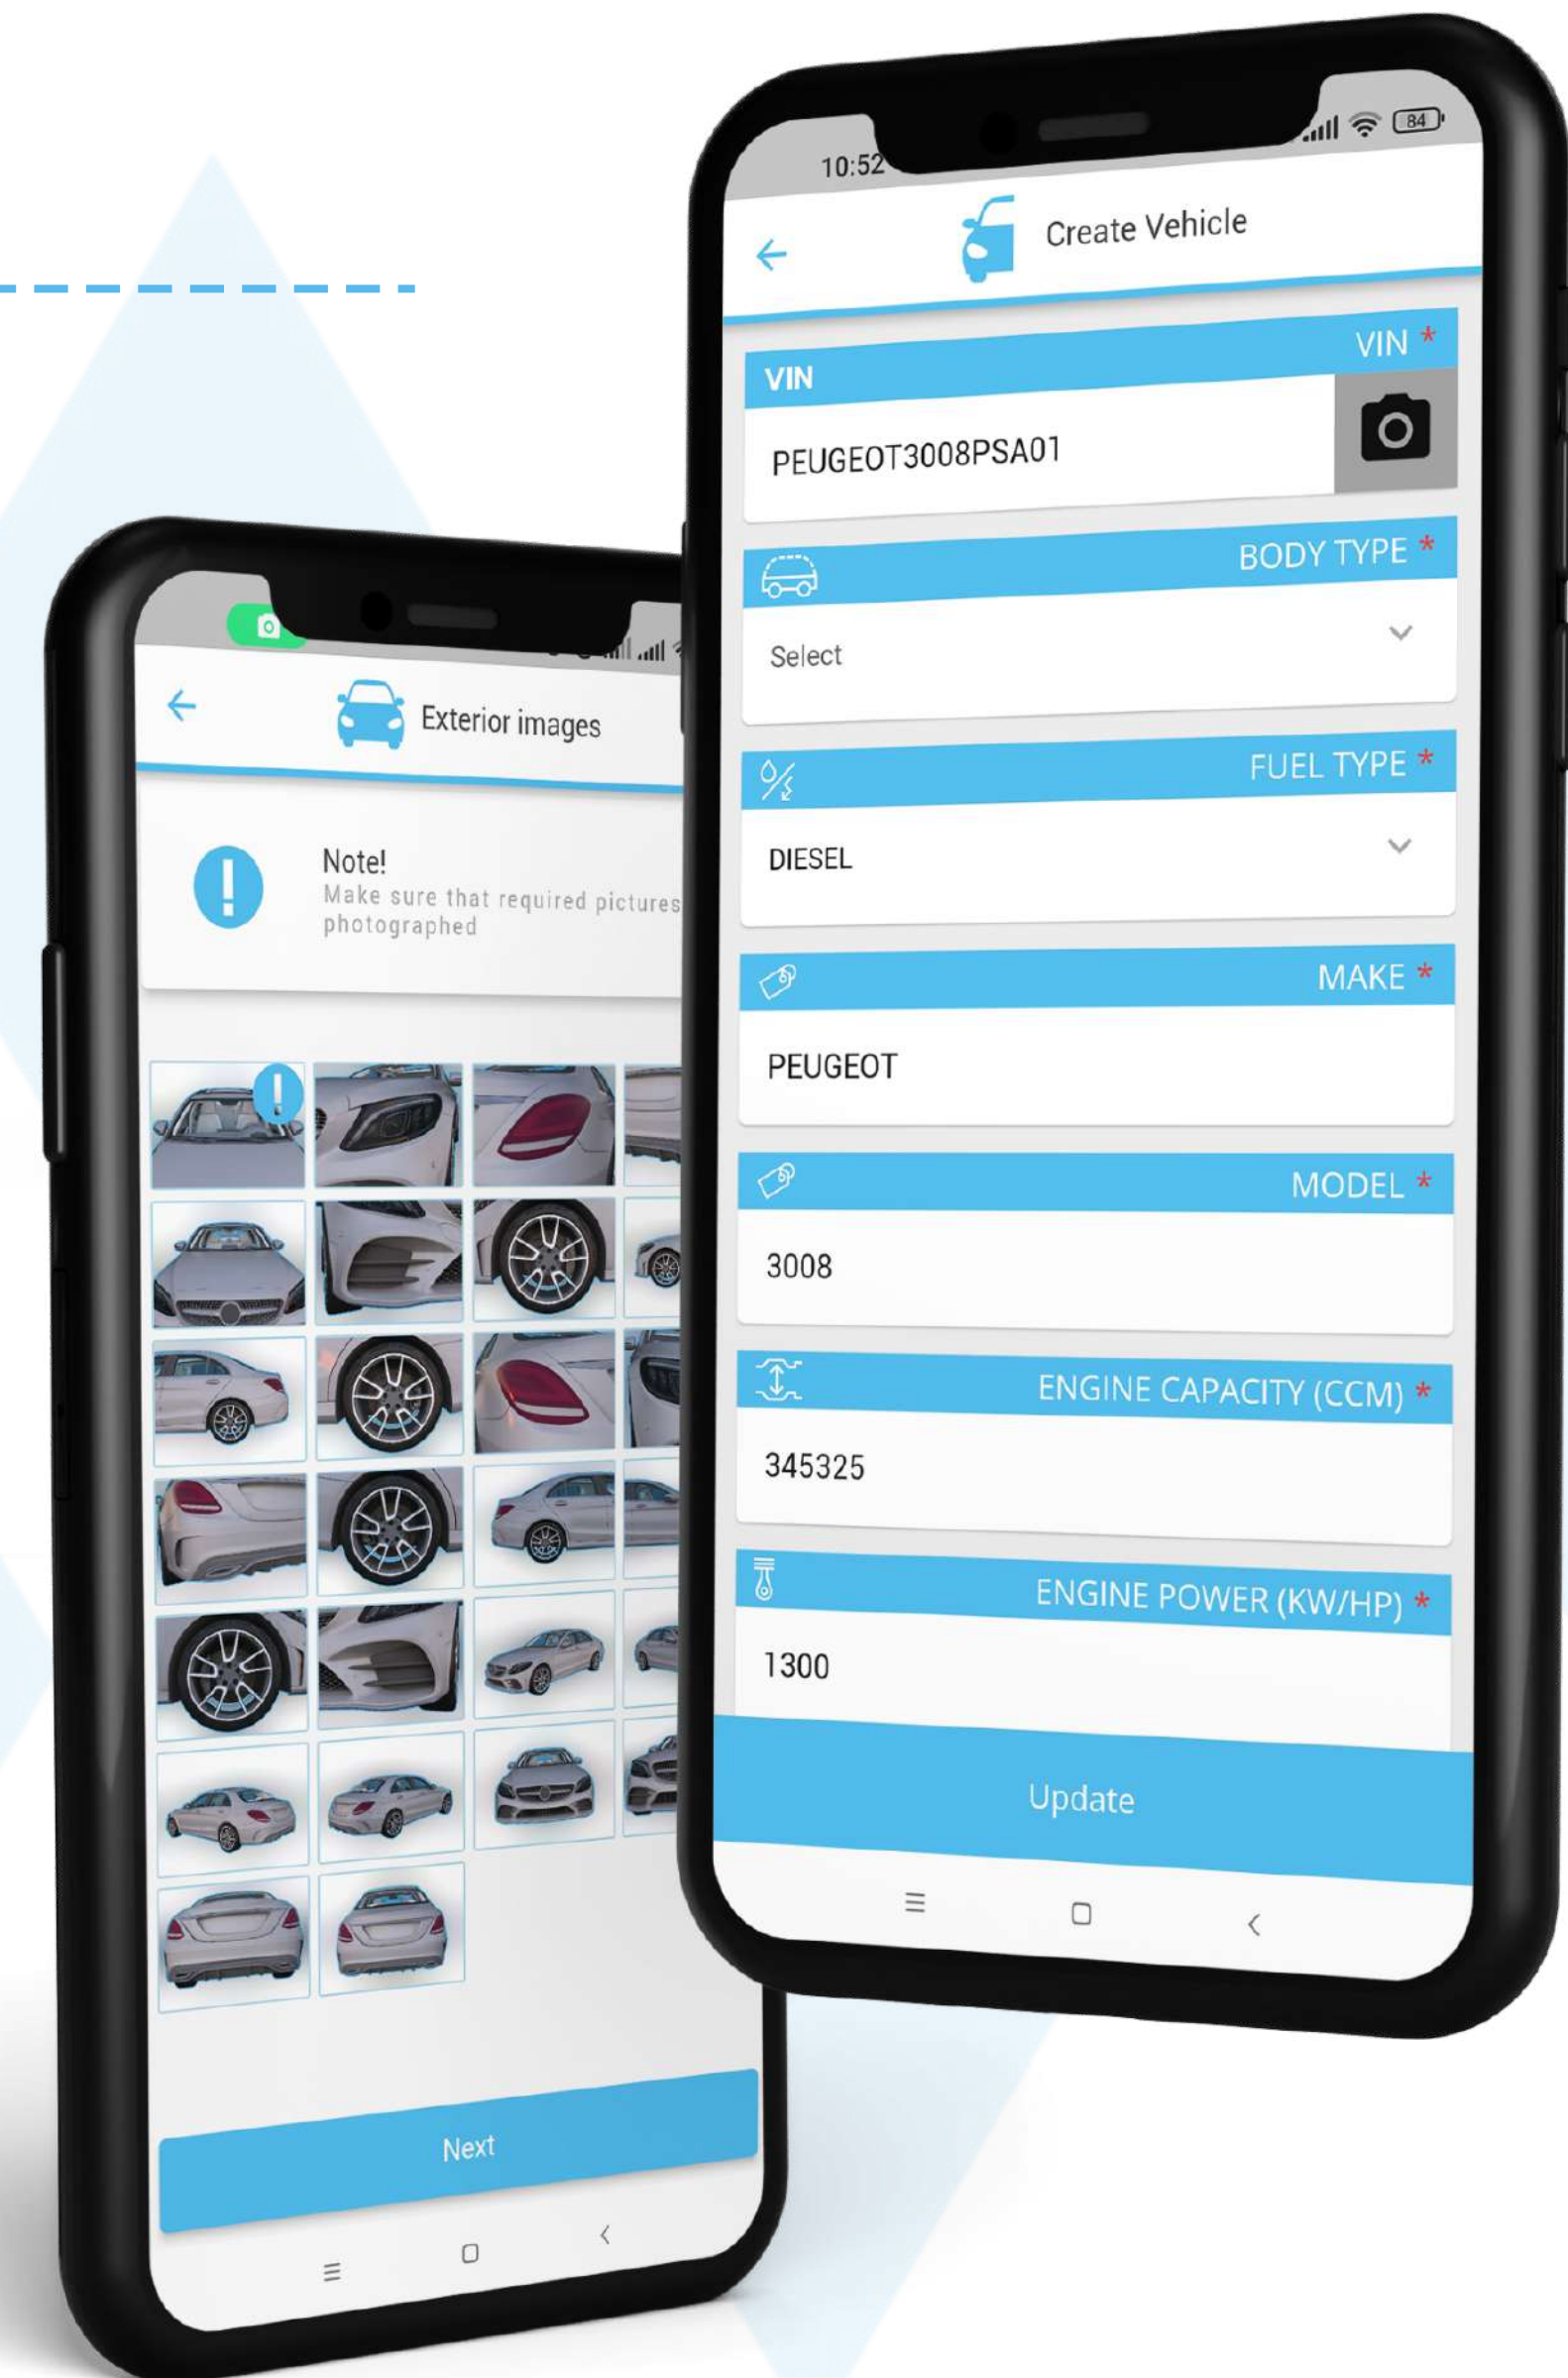

The client accesses the My Autohouse application and the car dealership's profile via the car sales website, where they are provided with detailed instructions on how to present the vehicle they intend to exchange.

Full photography guide.

Car dealership, has full control over the photos, neatly sorted by category, through the user panel. Further communication with the client for possible corrections and conclusion of the agreement takes place within the platform itself.

Quick and efficient car dealership communication.

After a successful purchase, the second phase of the application begins, in which the goal is to establish a quality, lasting relationship with the client. The application becomes a kind of "health record" of the car, which the dealership takes complete care of.

BENEFITS OF THE CAR DEALERSHIP

Accessible Panel.

Don't waste money and time on meetings and calls.
Automation of the car selection process.

Lead generation.

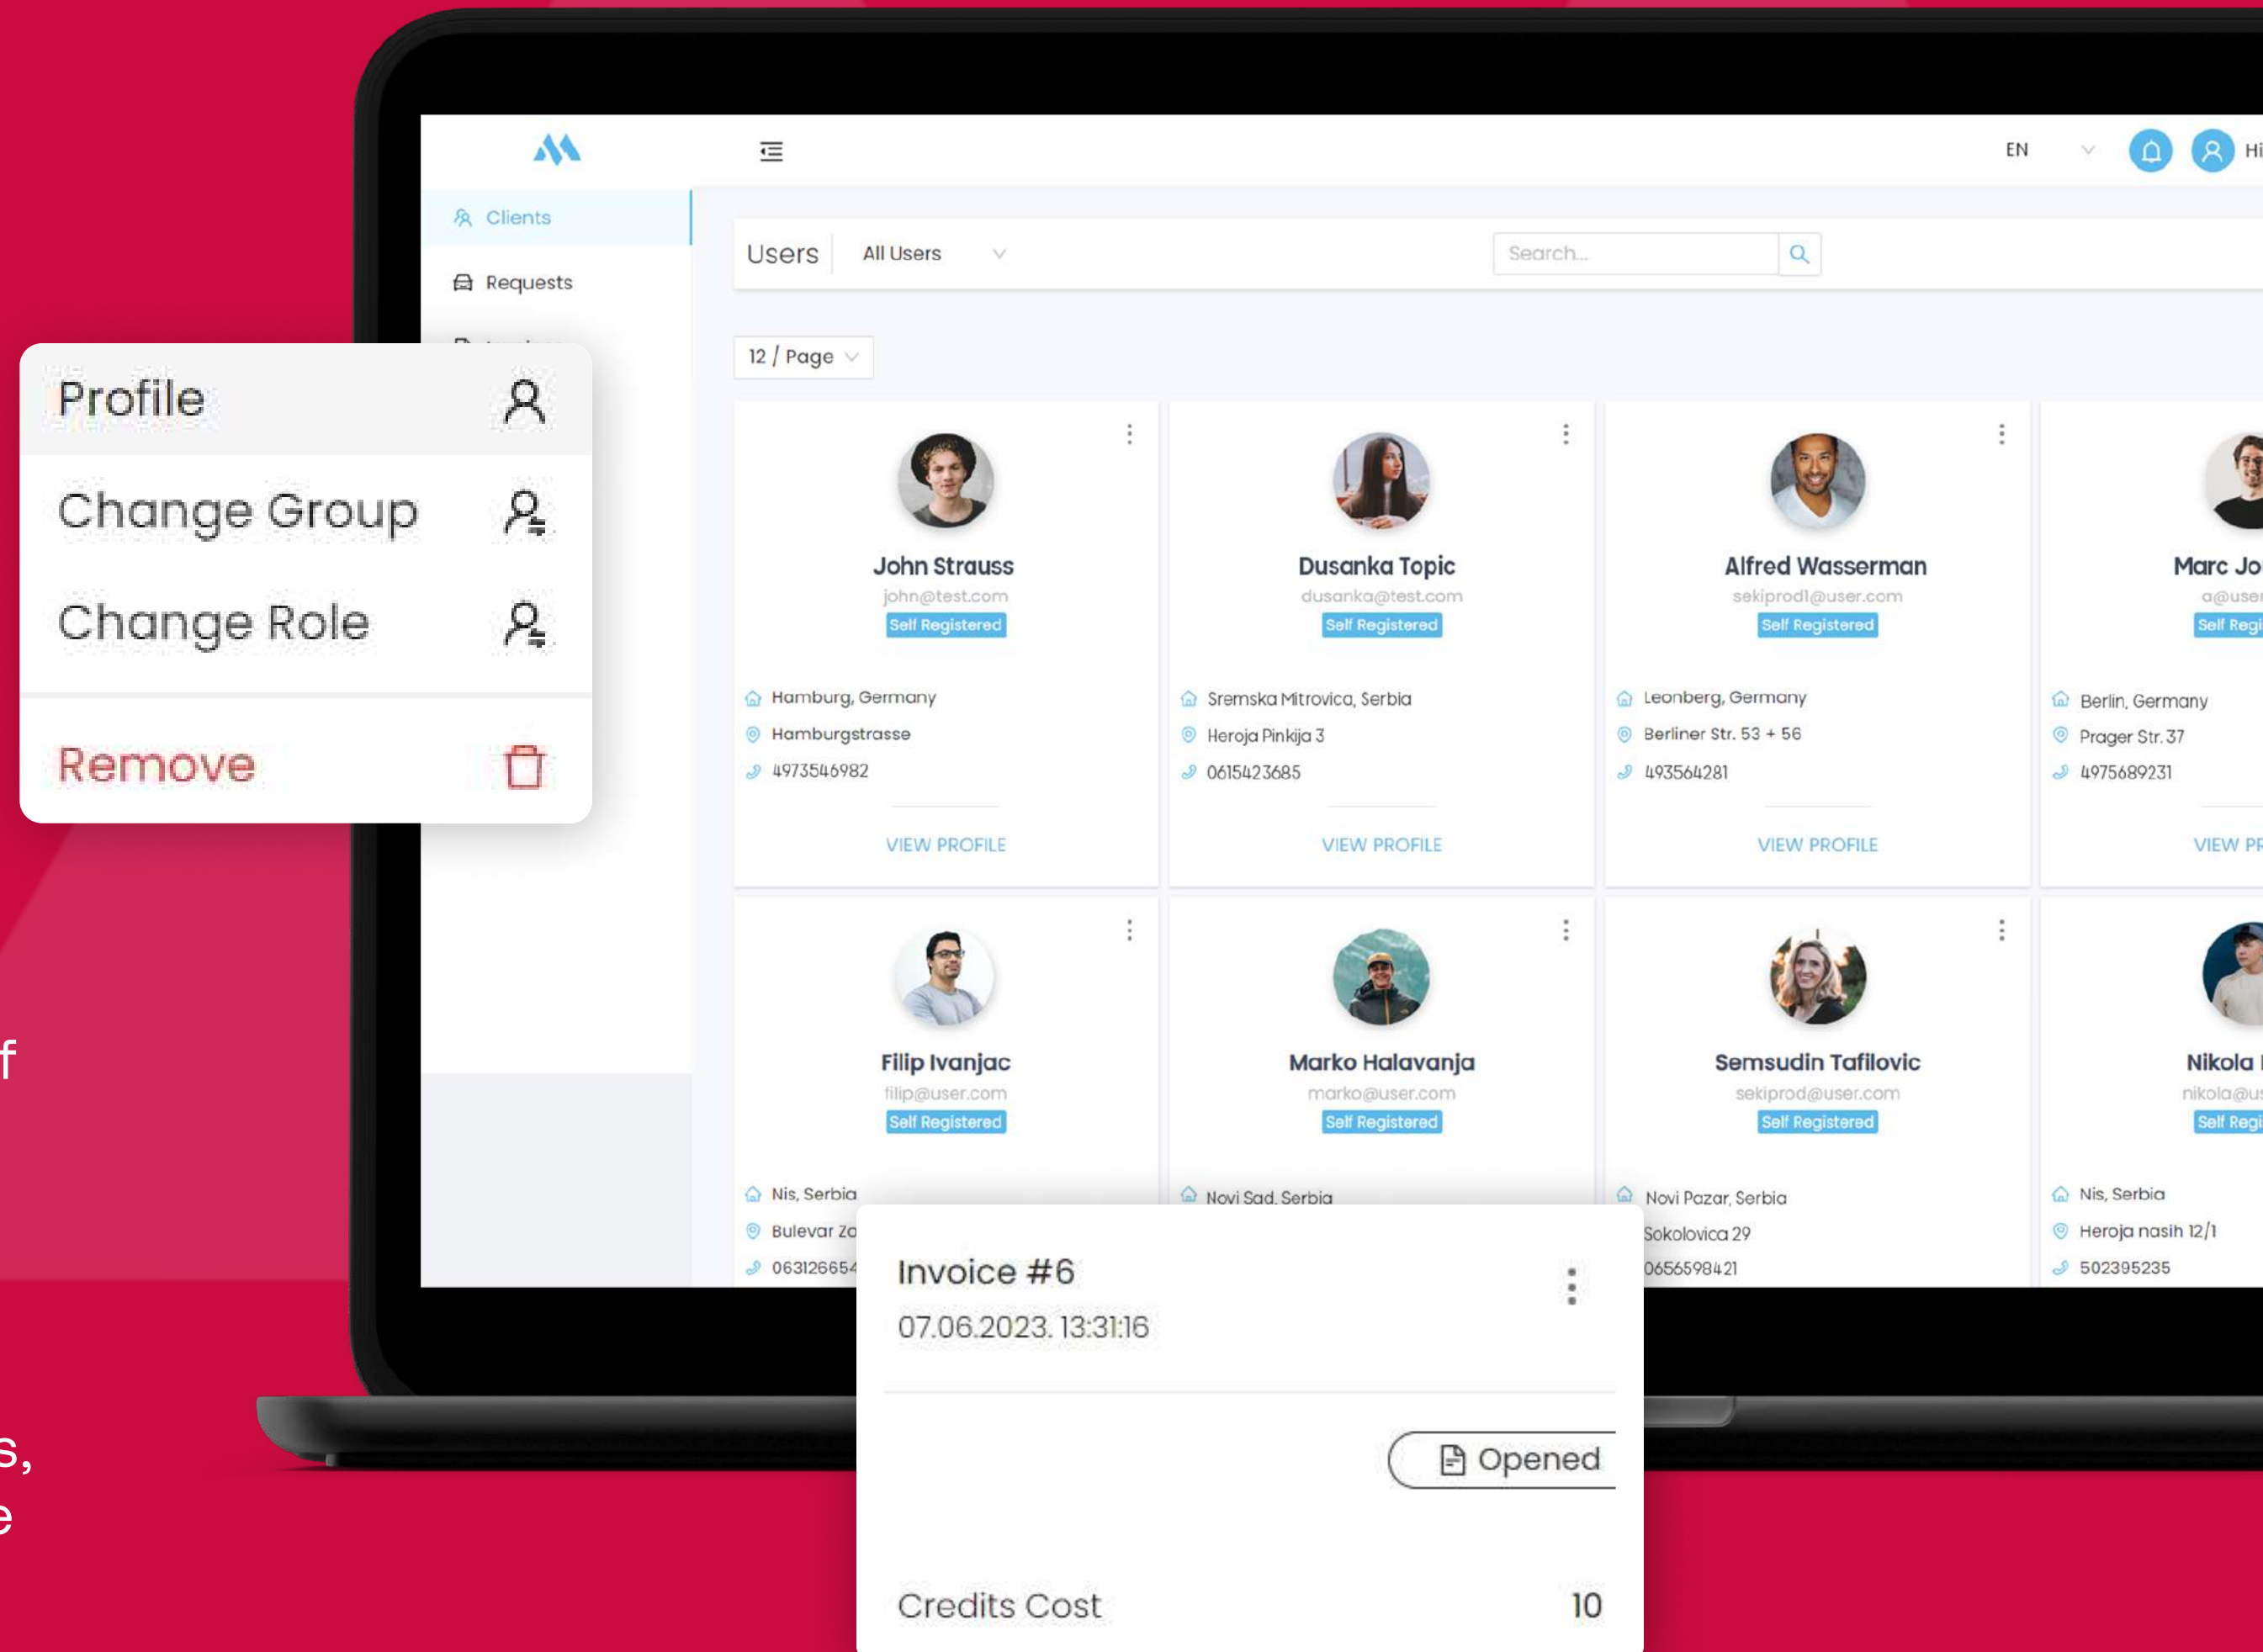

You get precise photos of the car in no time. You make a selection and contract cooperation in a very easy way.

Automation, digitization of the car purchase process.

The cooperation gains the potential of duration through the care of the client's car. Drastic increase in traffic and reputation.

Reliability of information (GPS, time, mileage)

After a successful sale, the second phase of the application begins, where the goal is to establish a quality, lasting relationship with the client. The application becomes a kind of "health card" of the car, which the car dealership takes complete care of.

GENERATING REQUESTS/LEAD

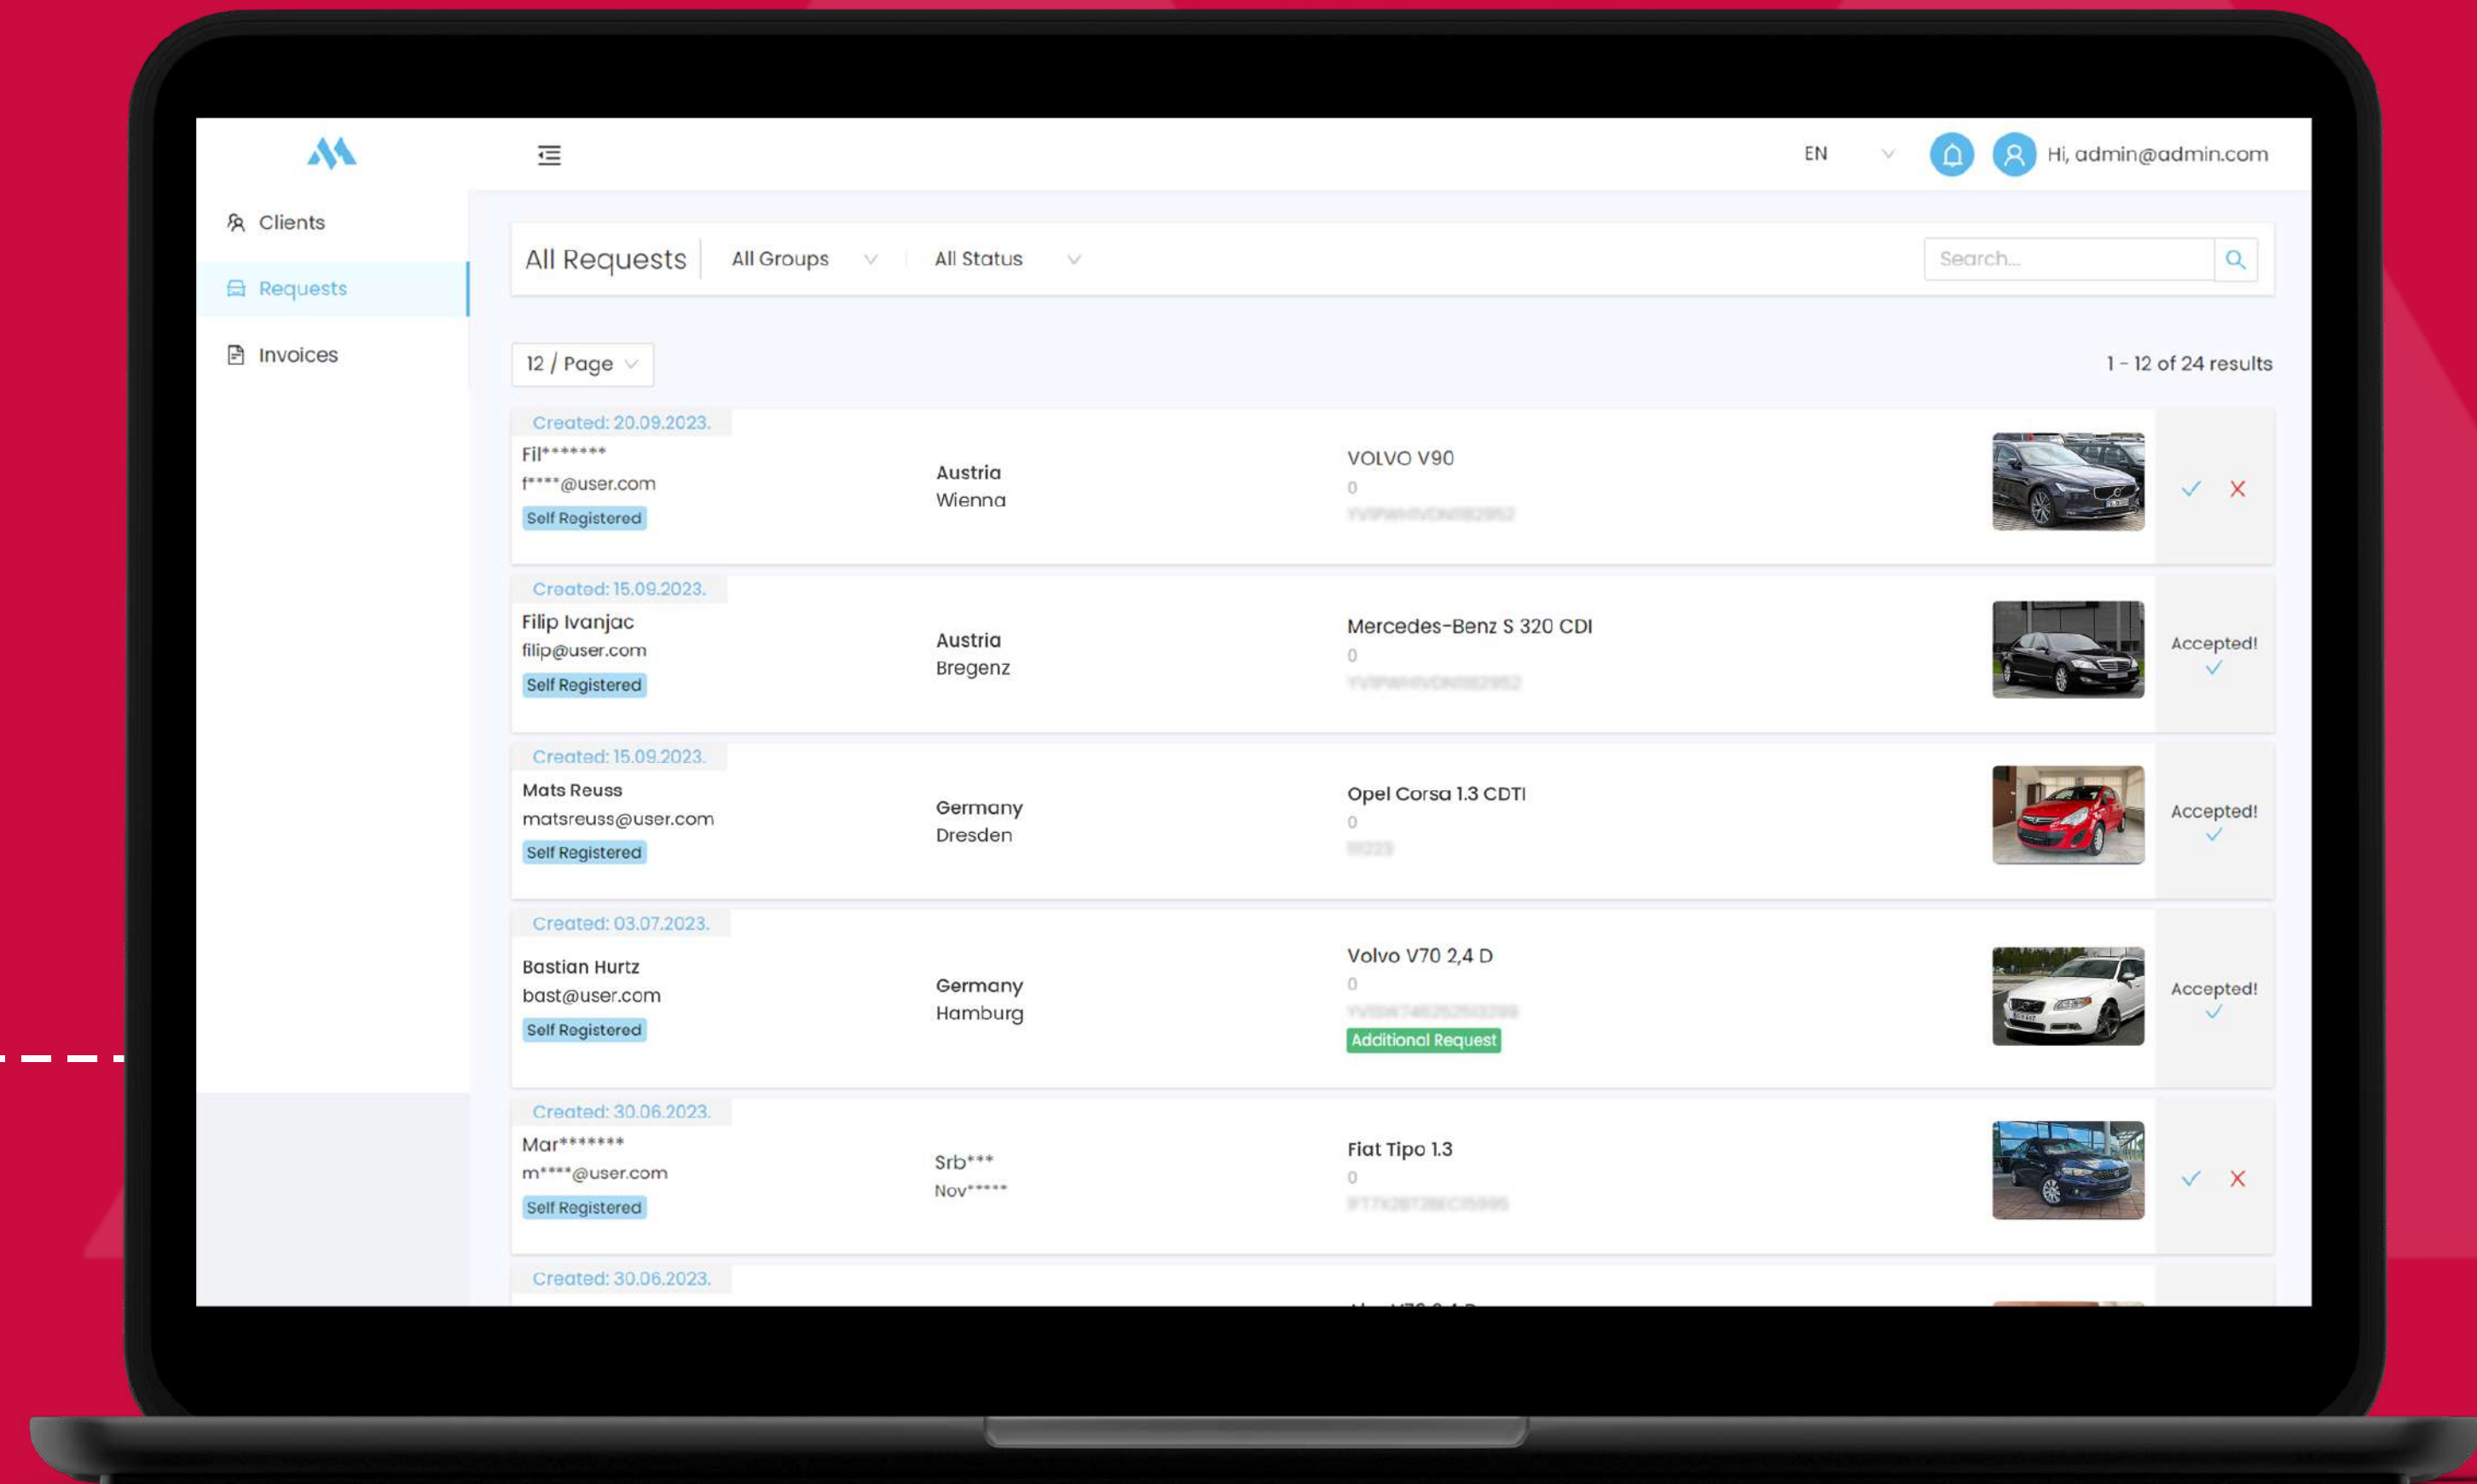

For existing clients:

Existing clients contact the car dealership through a request to purchase or exchange a car. The dealership assesses the value of the car as well as the amount of damage.

Accept or decline request. ✓ ✗

Reviewing car's photos and info. 🔍 🚗

Assesing car's value. 💰

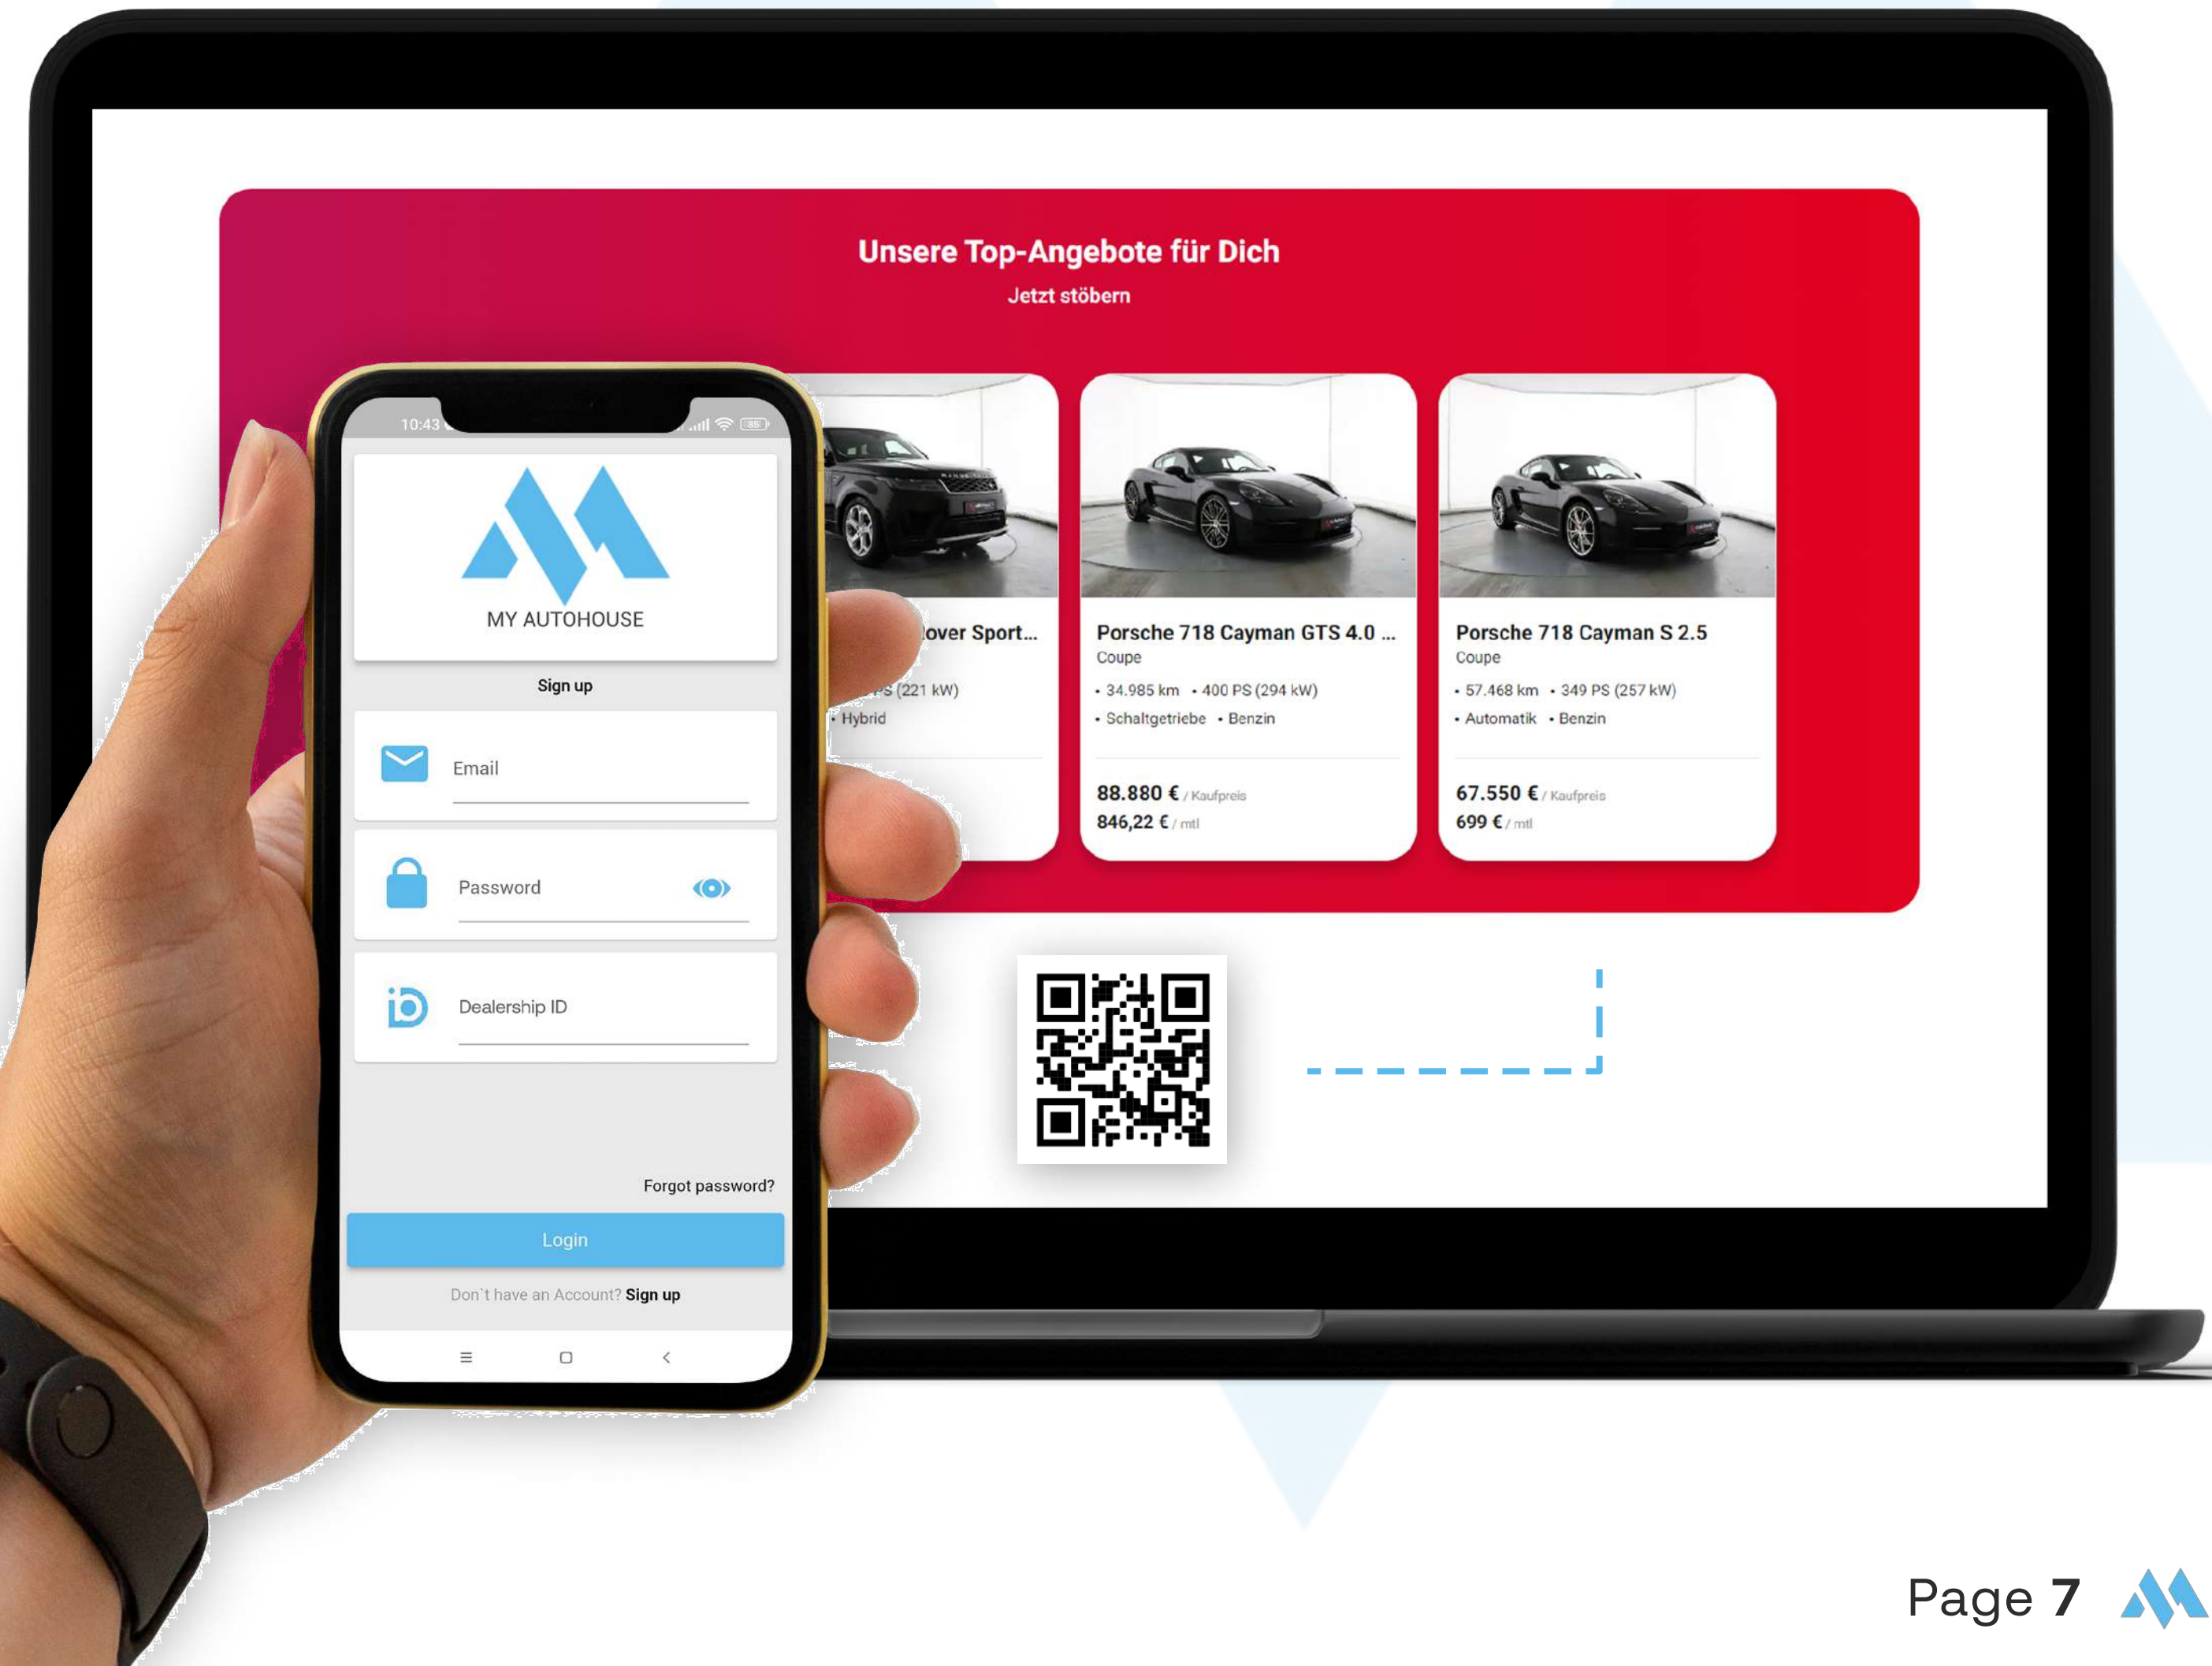

GENERATING REQUESTS/LEAD

For new clients:

The new client finds an offer on the car sales website, which displays the Auto Dealer ID / QR code, and sends a request to the dealership for a car exchange.

The client receives a link through which he can access the application and contact the car dealership to evaluate the value of the car and negotiate a potential surcharge and sale.

GENERATING REQUESTS/LEAD

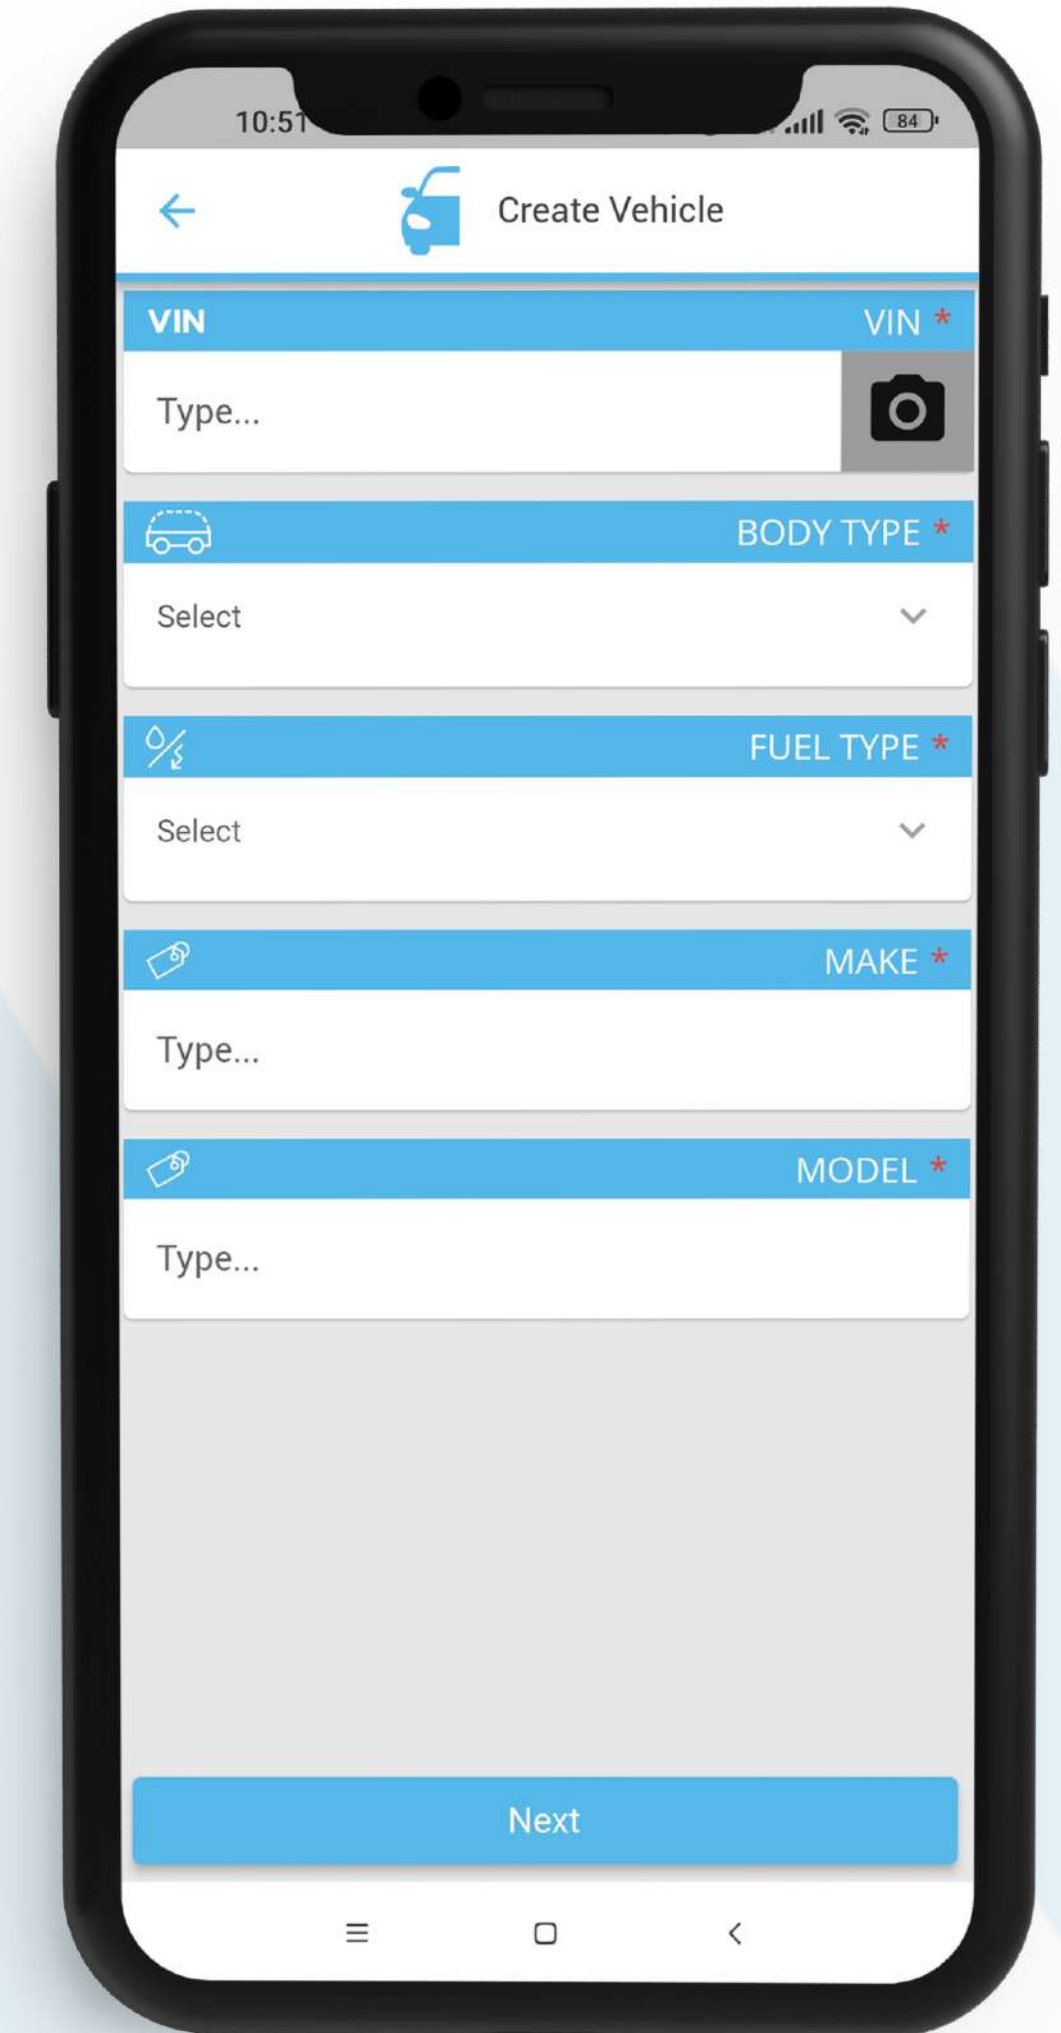

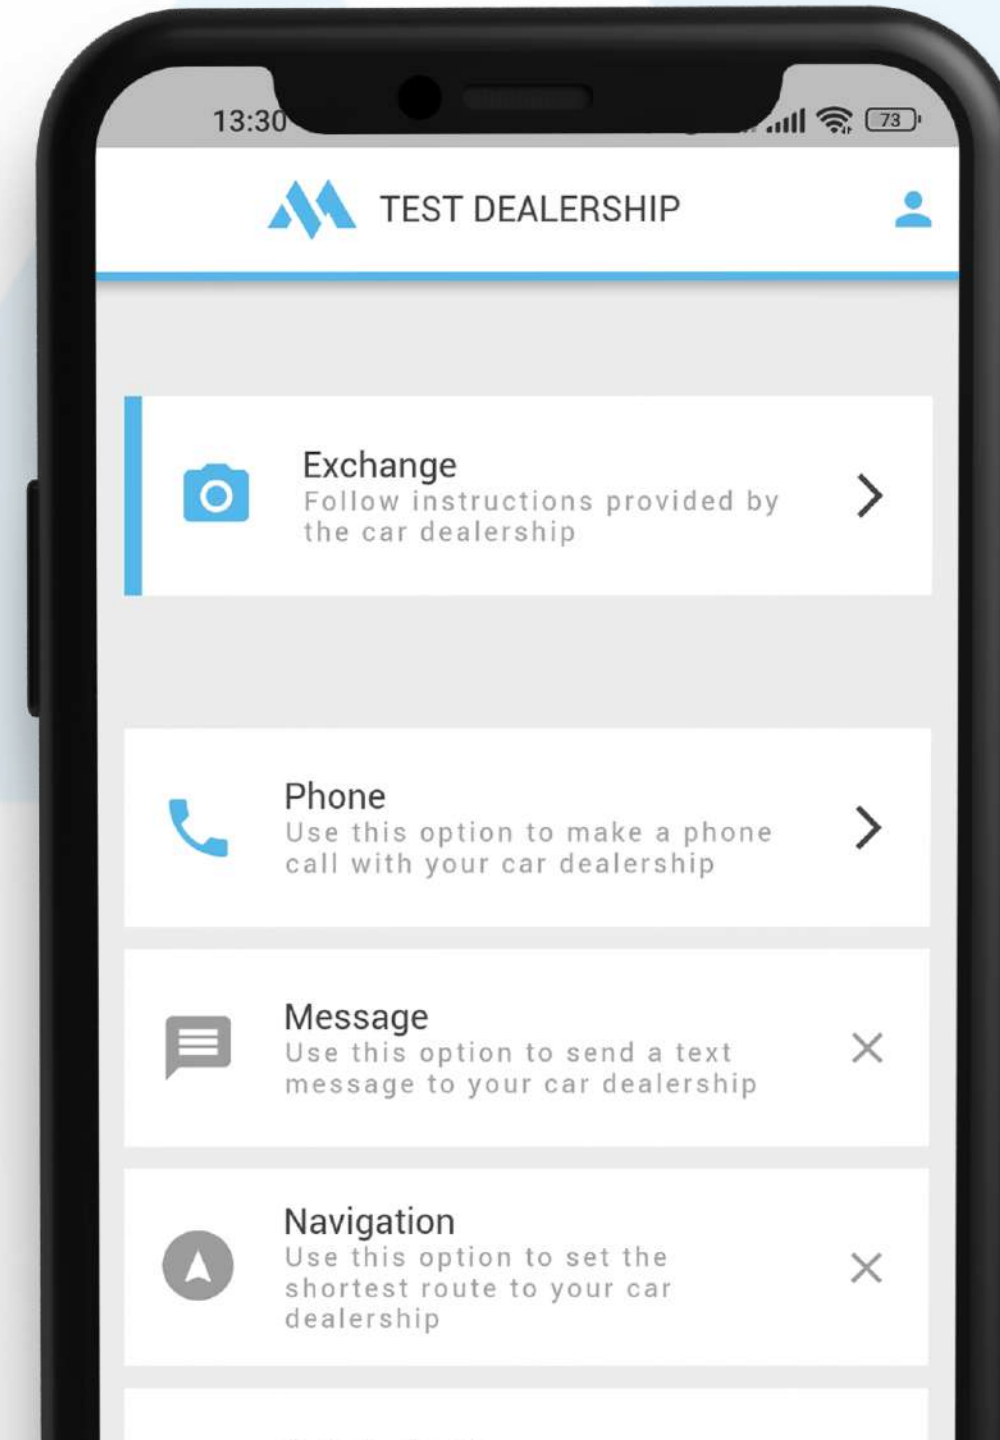

For new clients:

Selecting the Exchange option opens a panel to open the car profile. All that needs to be done is to follow the instructions of the car dealership.

Pressing the camera icon opens the option to take a photo of the VIN number of the chassis, which can also be entered manually. The form will then automatically fill in all the information about the car, which can be changed later.

Manual or automatic data entry.

123VB67890HJO

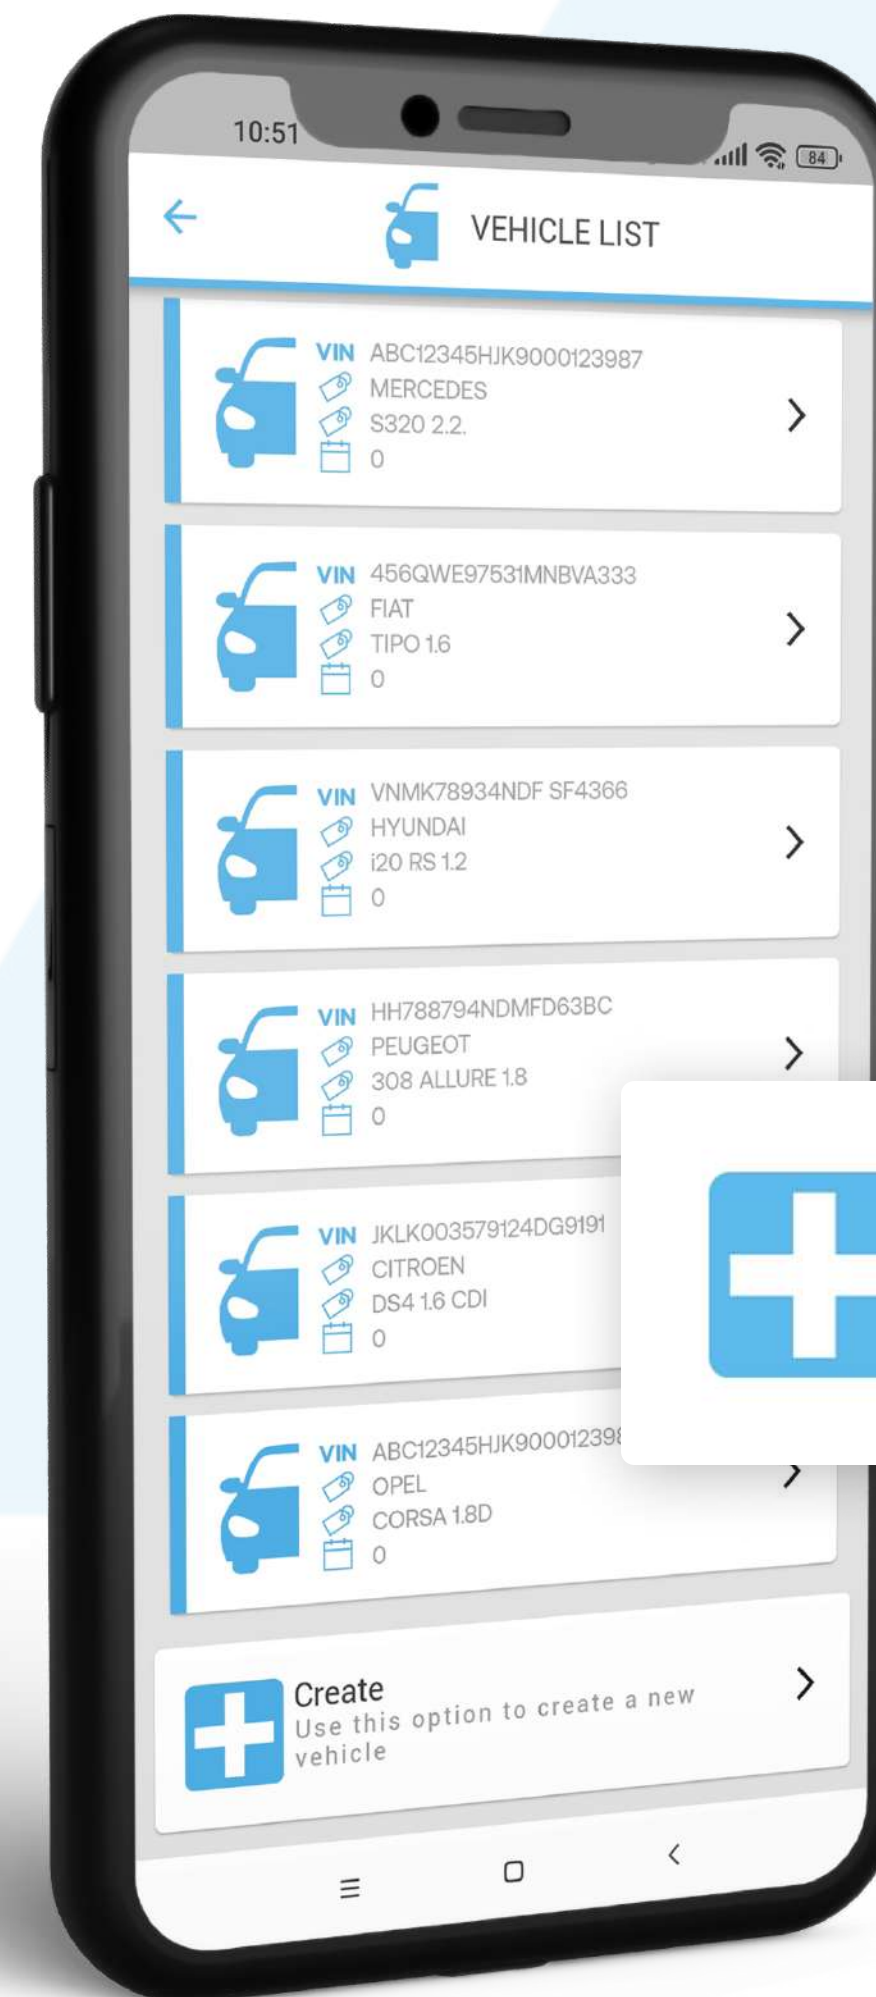

GENERATING REQUESTS/LEAD

For new clients:

Its necessarily to make sure there is enough space around the car to walk and take all the required pictures.

By saving the completed form and capturing the car with all camera targets, the first car is added to the profile. User can add more cars afterwards.

PANEL

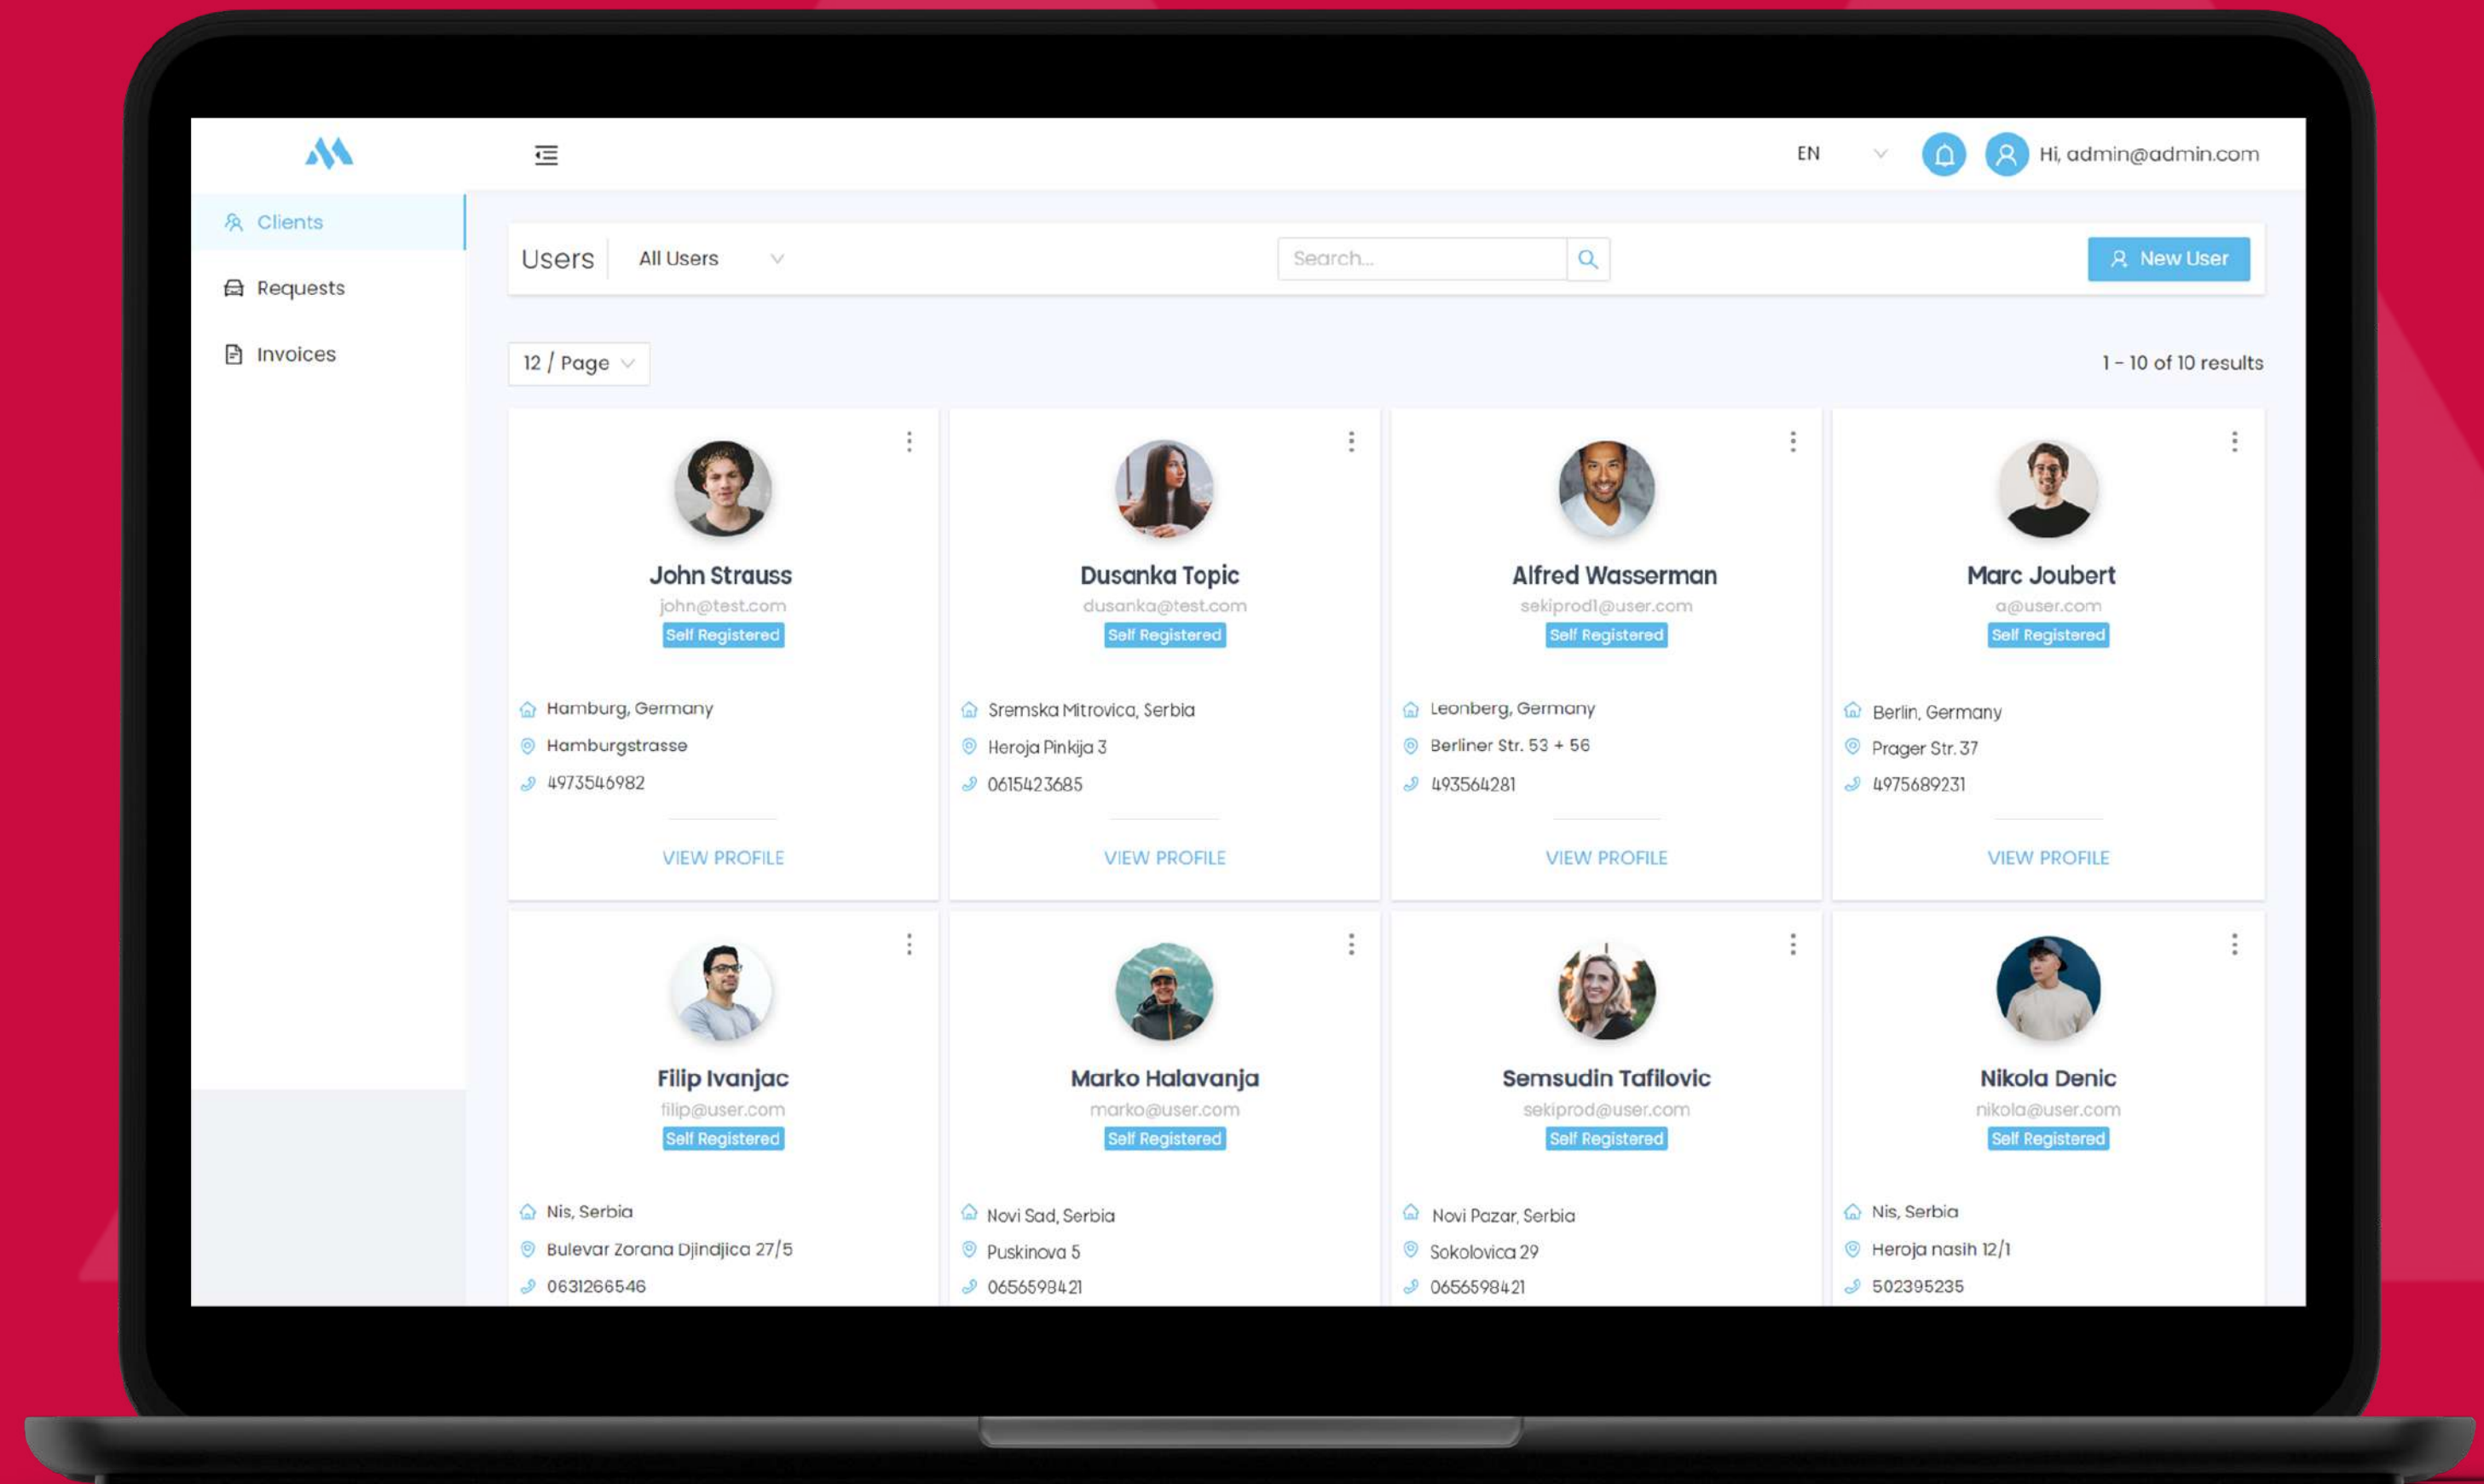

PC Accessible Platform

Auto house has a control over the car dealership system through the Panel, where they receive requests from clients for car exchange. The application is adapted for both mobile and desktop platforms.

In the Panel there is a list of old and new clients, which can subsequently be grouped, e.g. in the VIP category. By choosing one of the clients, you have access to a profile with personal information, as well as access to the cars offered by the selected client.

All Users

Self Registered

PANEL

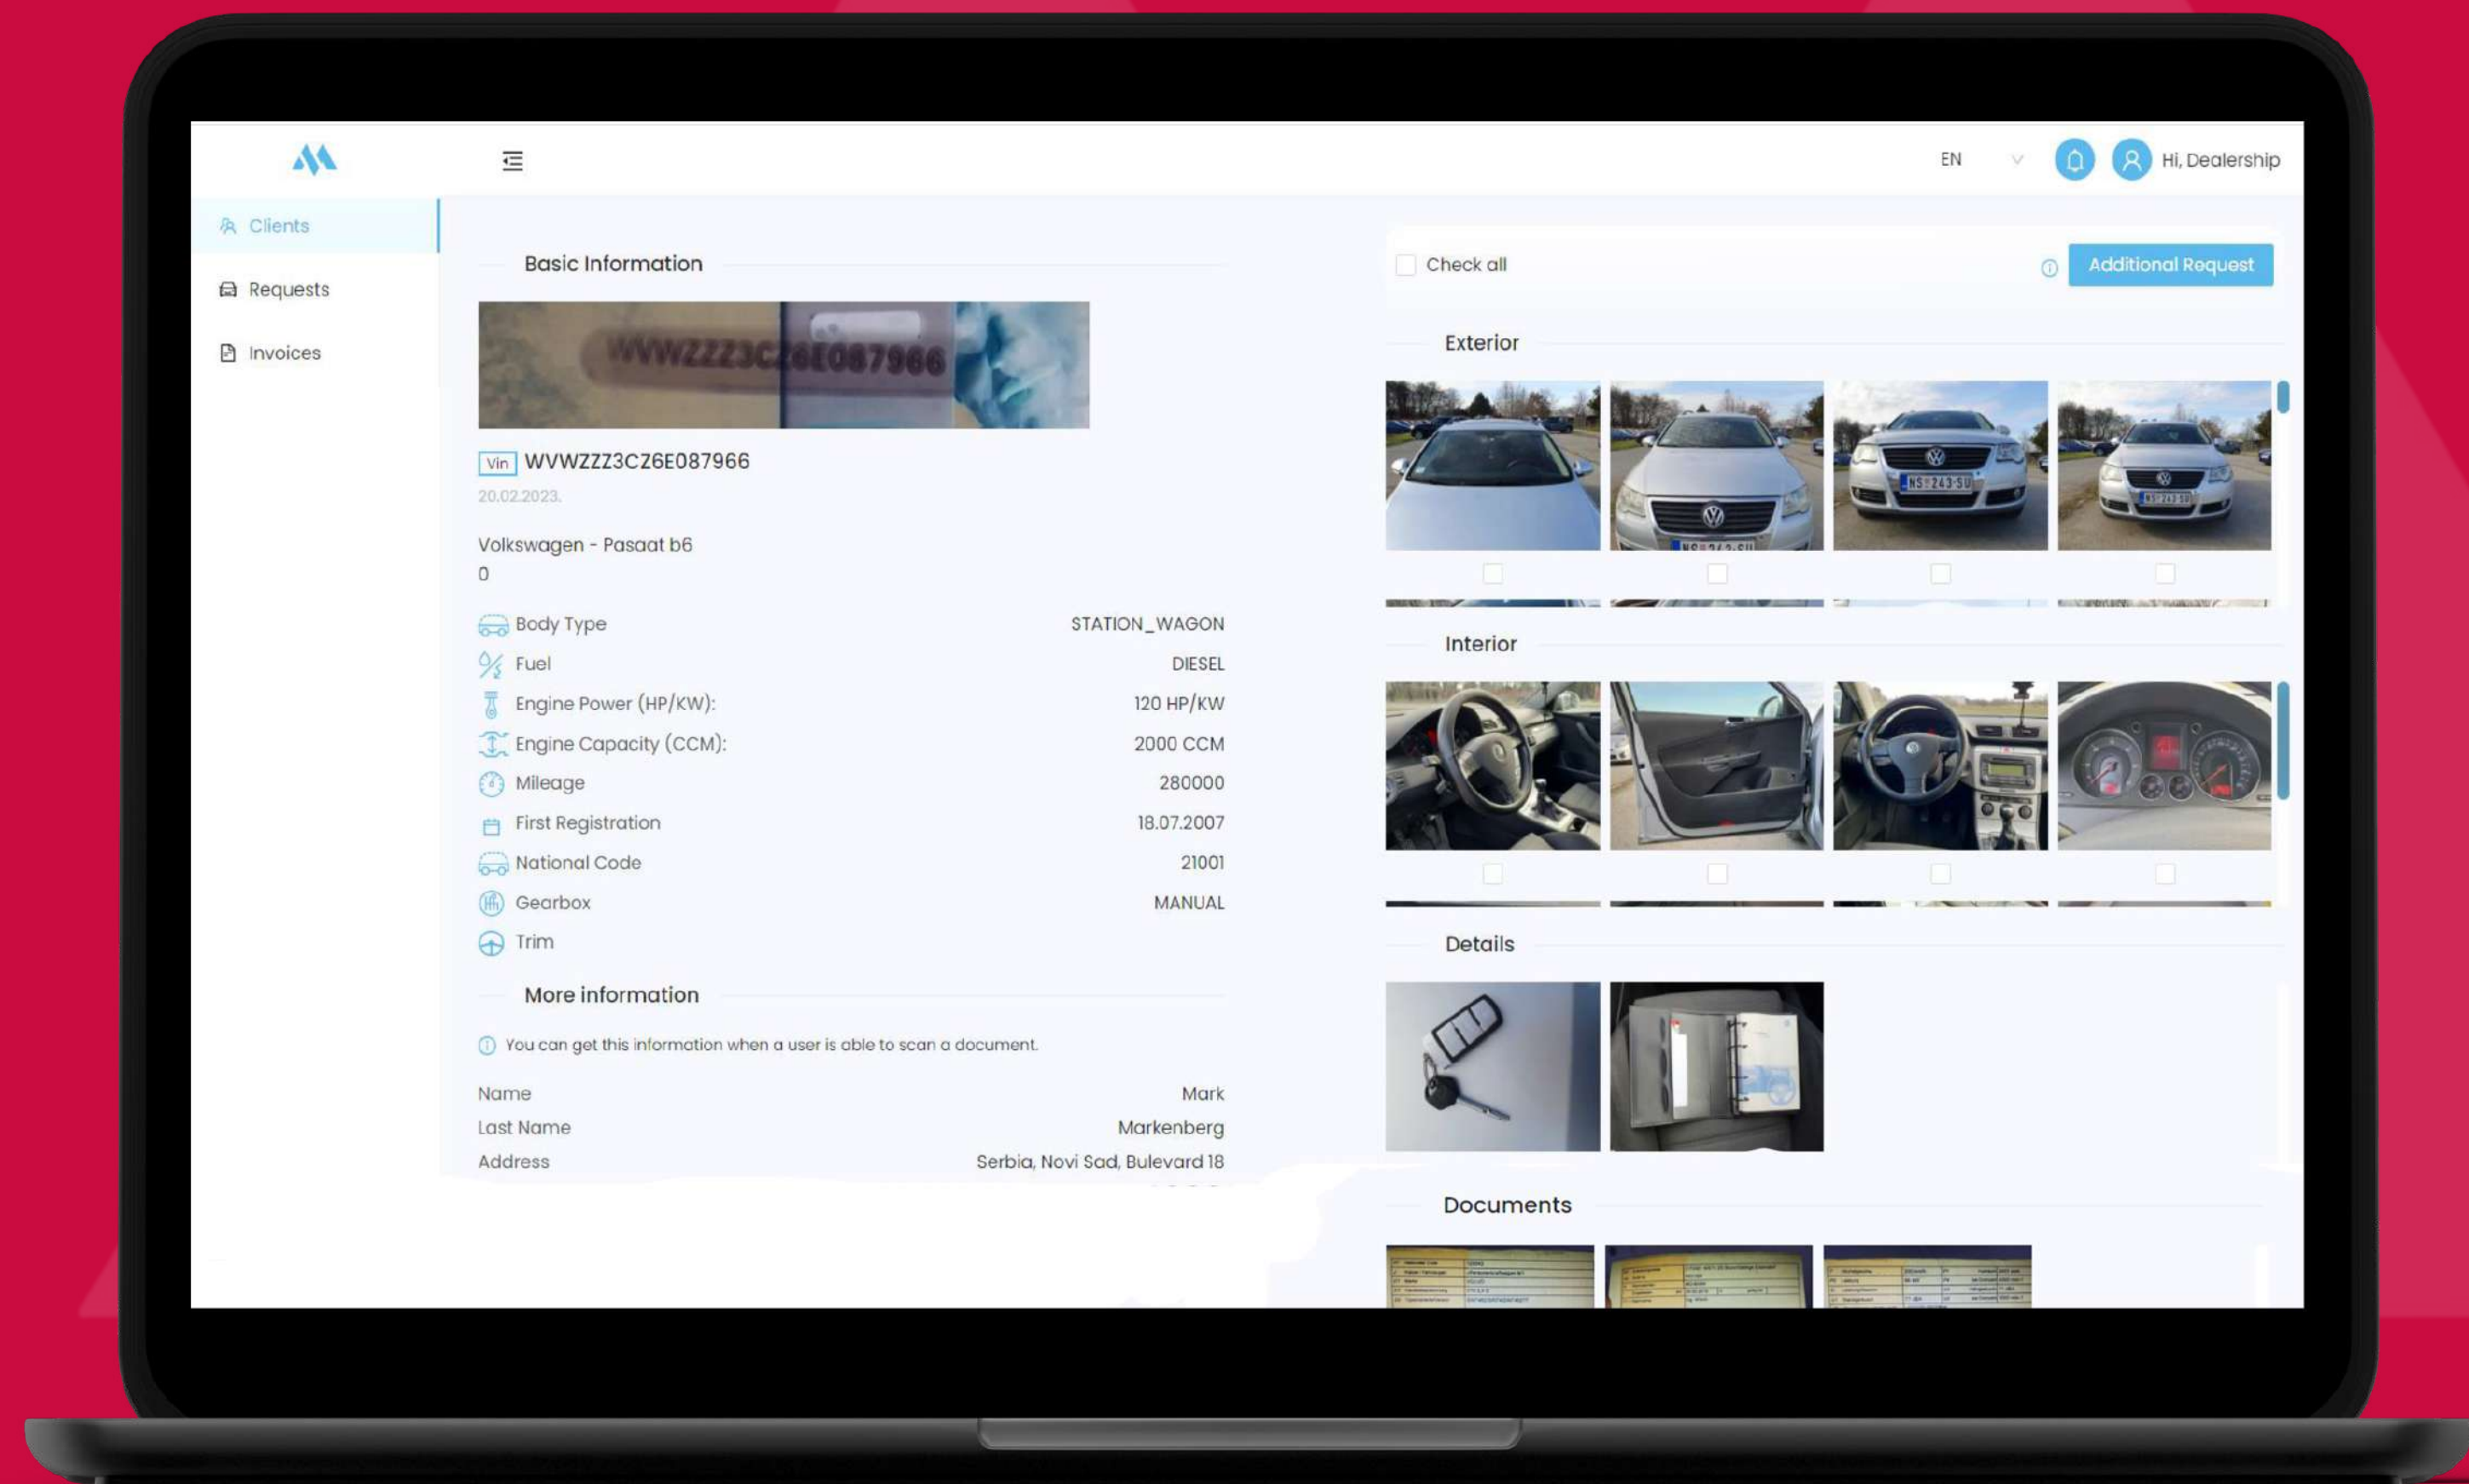

Accepted!

Request/Lead

When a new customer submits a request for a car valuation, the following happens:

- In the Panel under Requests, the car dealership is arriving a request with a deadline for an acceptance response or by not accepting the car. Otherwise a warning notification arrives.
- After acceptance, the dealership can see all the details of the car and request additional photos via messages
- In Clients there are old clients and new clients, which can be grouped together.

COMMUNICATION

Request/Lead

The Message option enables quick and immediate exchange of messages, photos, audio and video recordings, links and documents between the car dealership and the client, as well as between the car dealer and the interested party.

Hello, we are interested in exchange for your car. Please send us another photo of car's front bumper. Thanks.

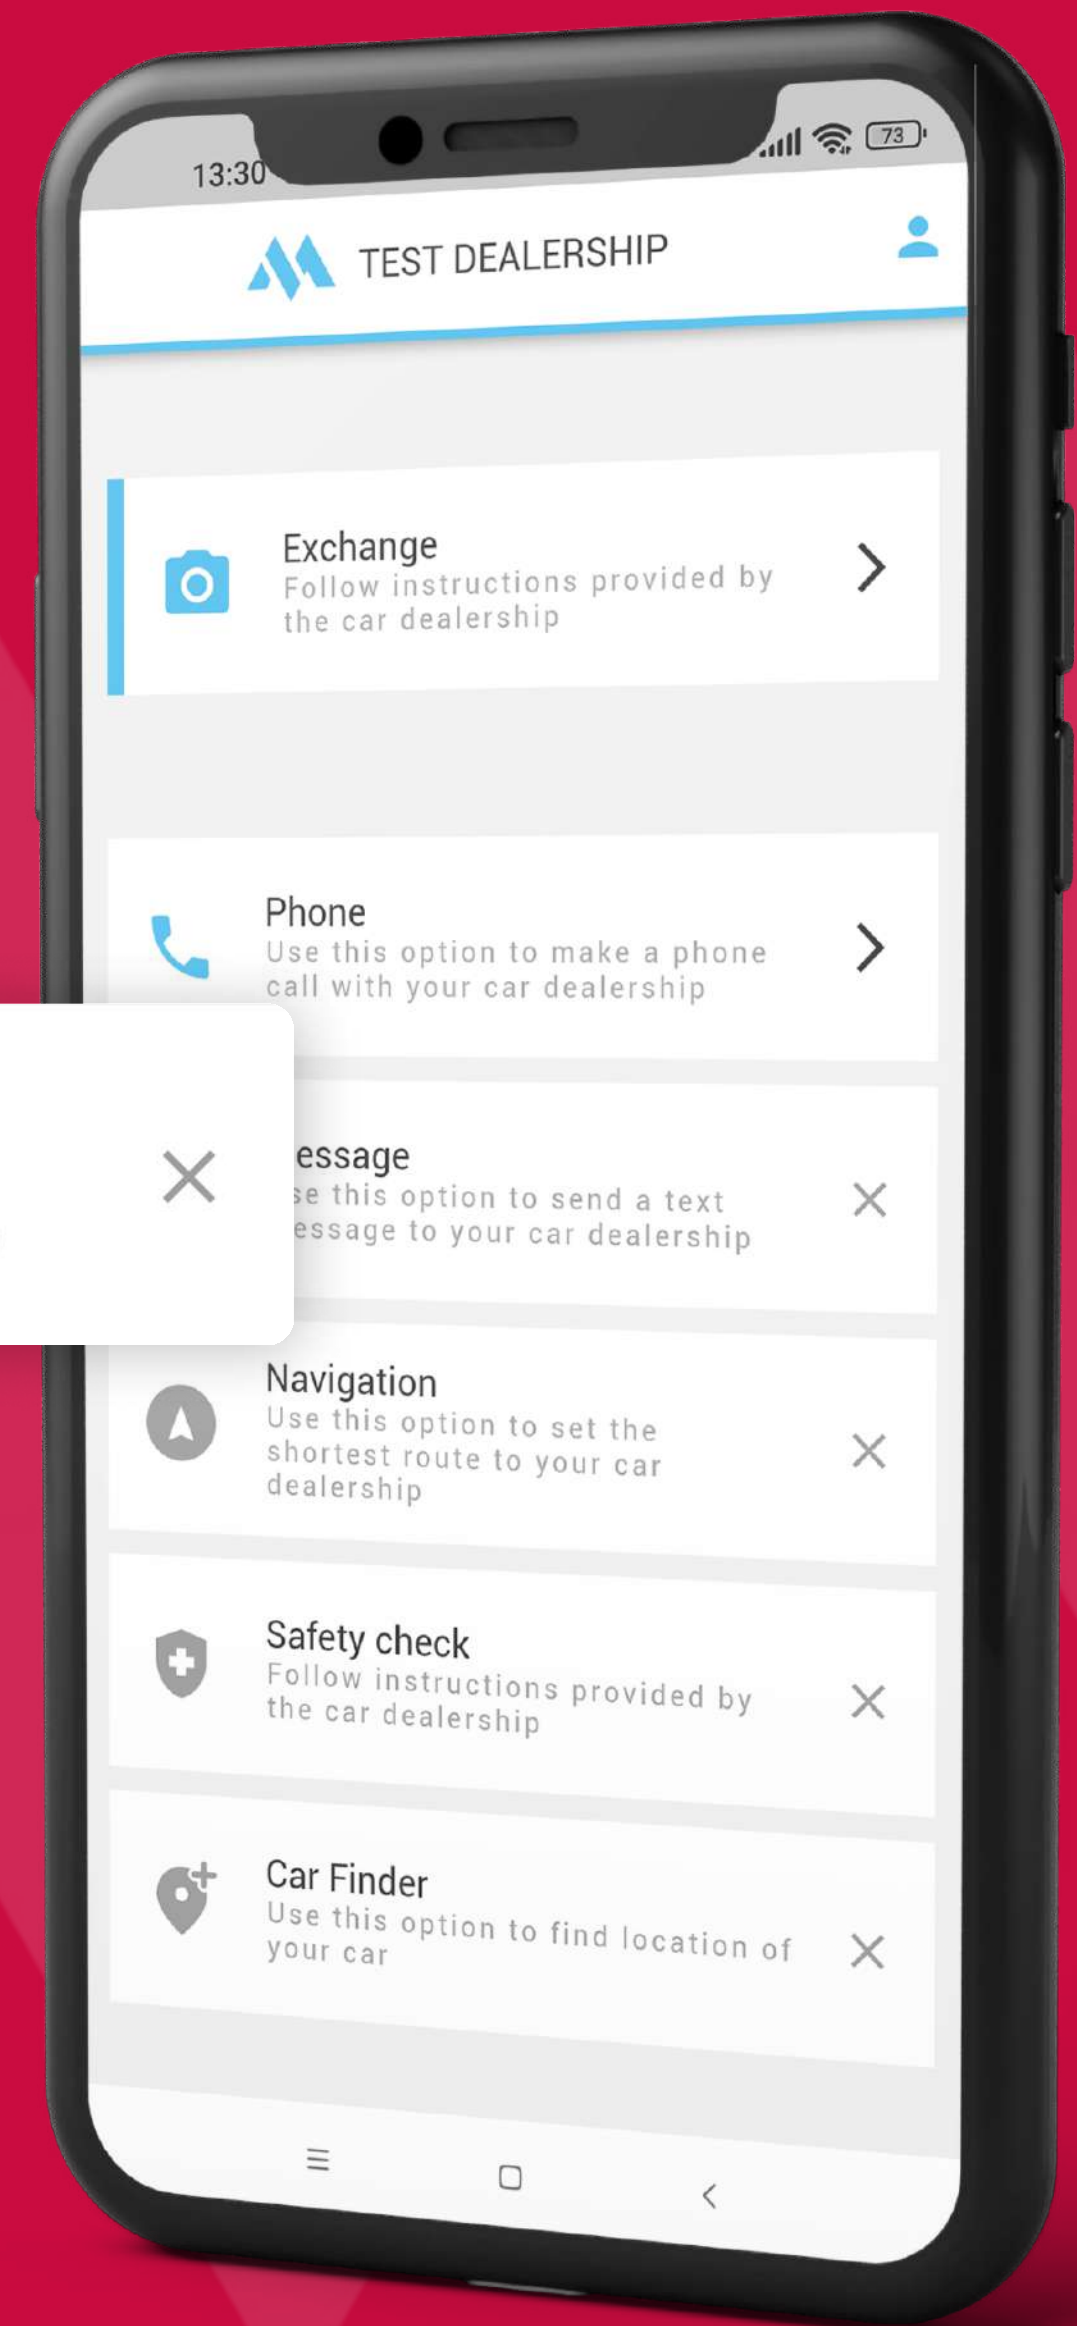

Hello, here is the photo. I'm here if you need anything else.

Thank you we'll get back to you soon. Greetings!

Message

Use this option to send a text message to your car dealership

APP OPTIONS

Photography instructions

Through the My Autohouse application, We have the ability to use set of a photography preset for car. Which includes: interior, exterior, details photos and photos of damage.

APP OPTIONS

Damage assessment

The wheels, bumper and windows are the places on the car that are most susceptible to damages that are often not paid attention to. That's why the My Autohouse application leaves nothing to chance, as it has an option for damage assessment.

Note!

All damaged parts of the Vehicle must be recorded properly

APP OPTIONS

Zooming

When photographing selective parts of the car, the application has the ability to enlarge the photo three times, so that no detail - possible damage - would be missed. The zoom option is especially important in situations where the parts of the car that are most susceptible to damage are photographed.

x1 x2 x3

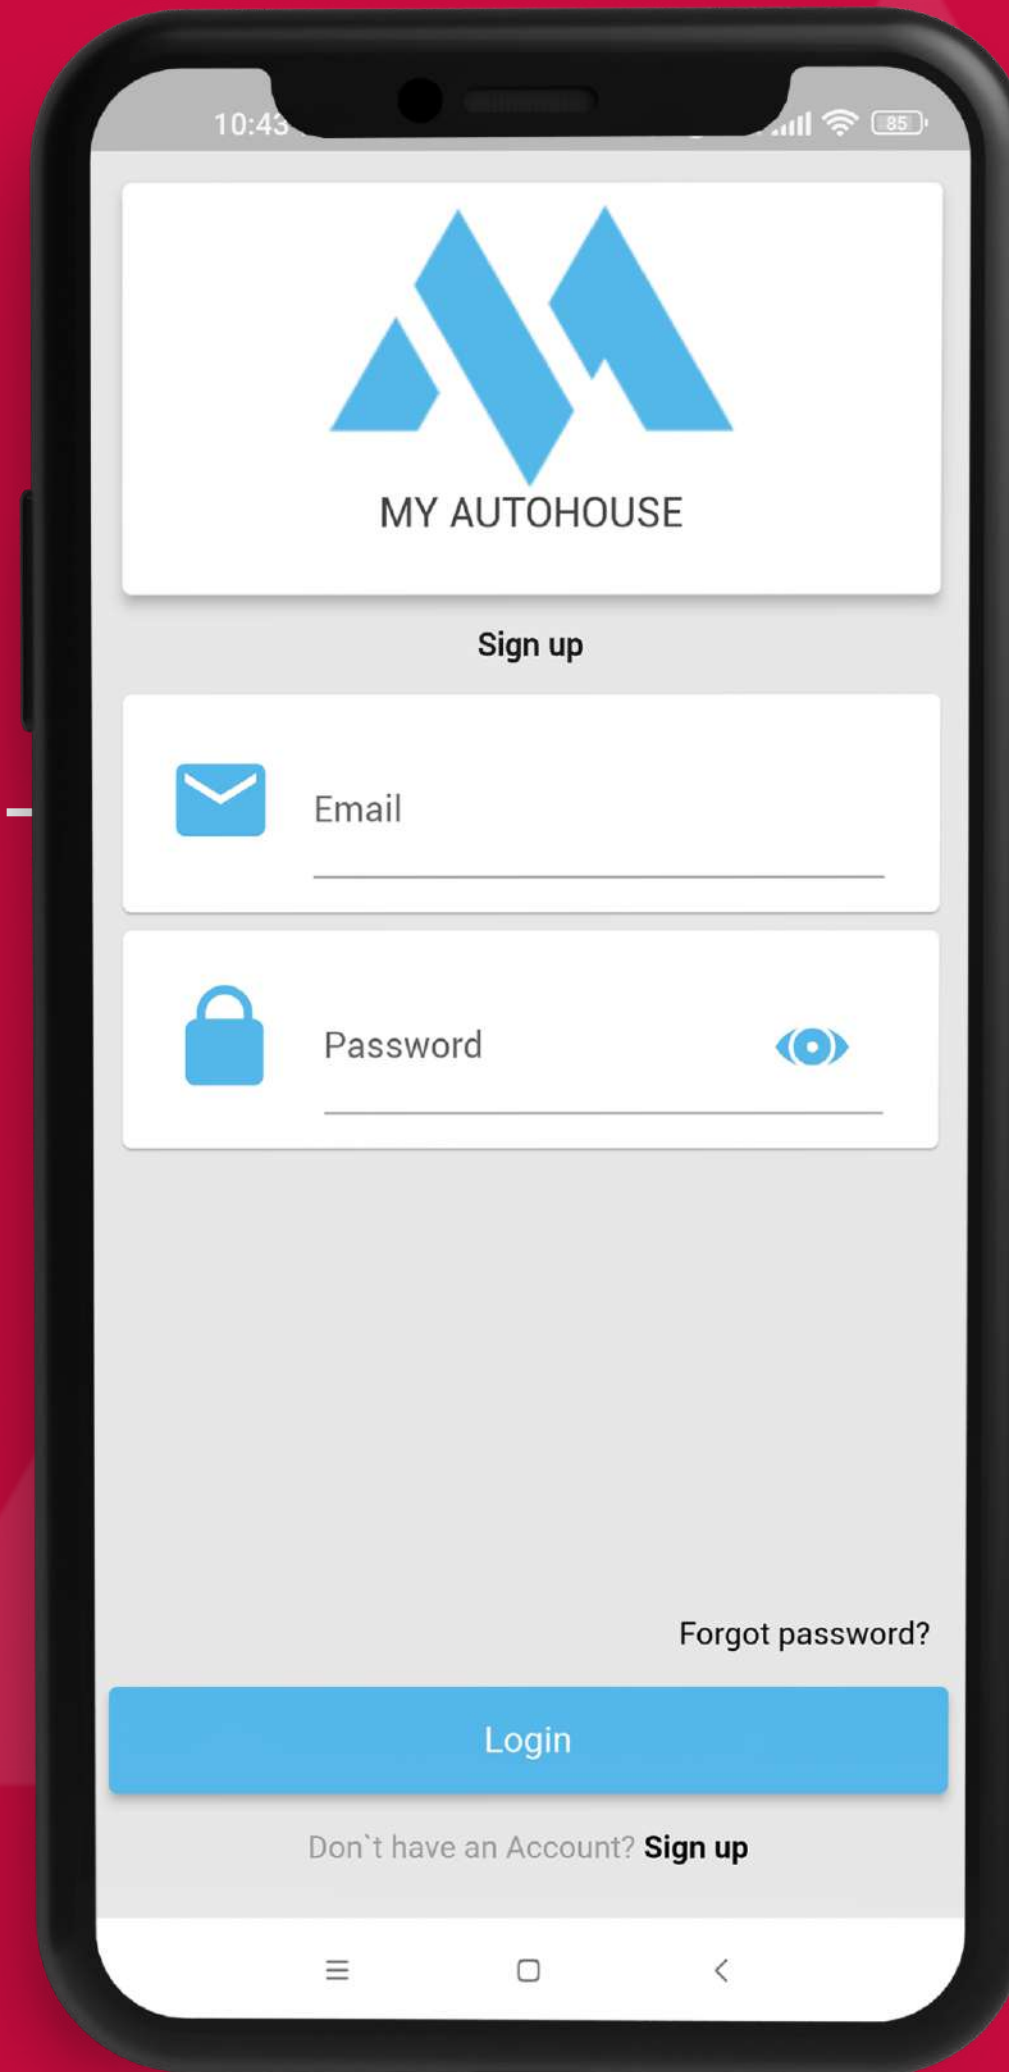

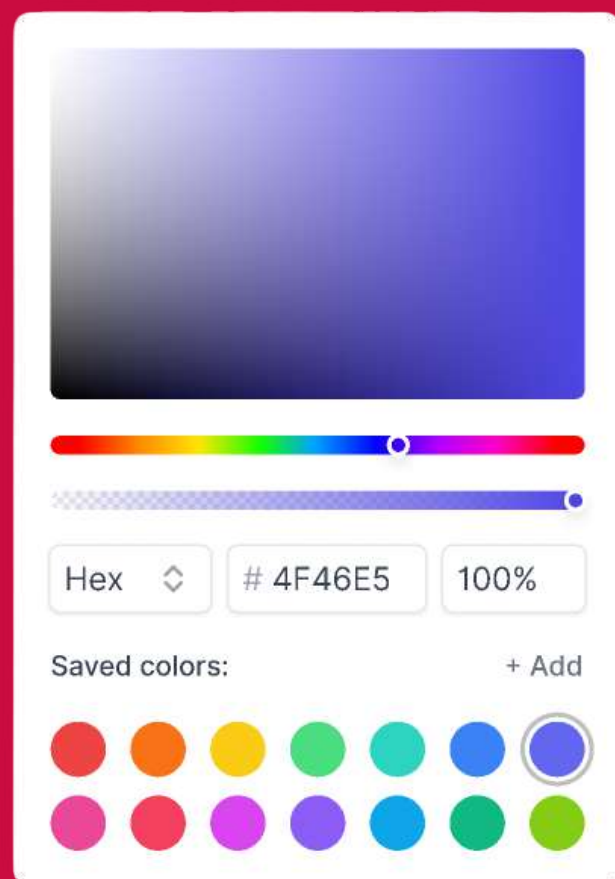

Our zoom goes up to 3 times.

BRANDING

Corporate Appearance

Upon establishing a profile within the My Autohouse application, your car dealership's identity seamlessly integrates into the app. This results in the replacement of the My Autohouse logo with your own, and the incorporation of your corporate colors throughout the entire application.

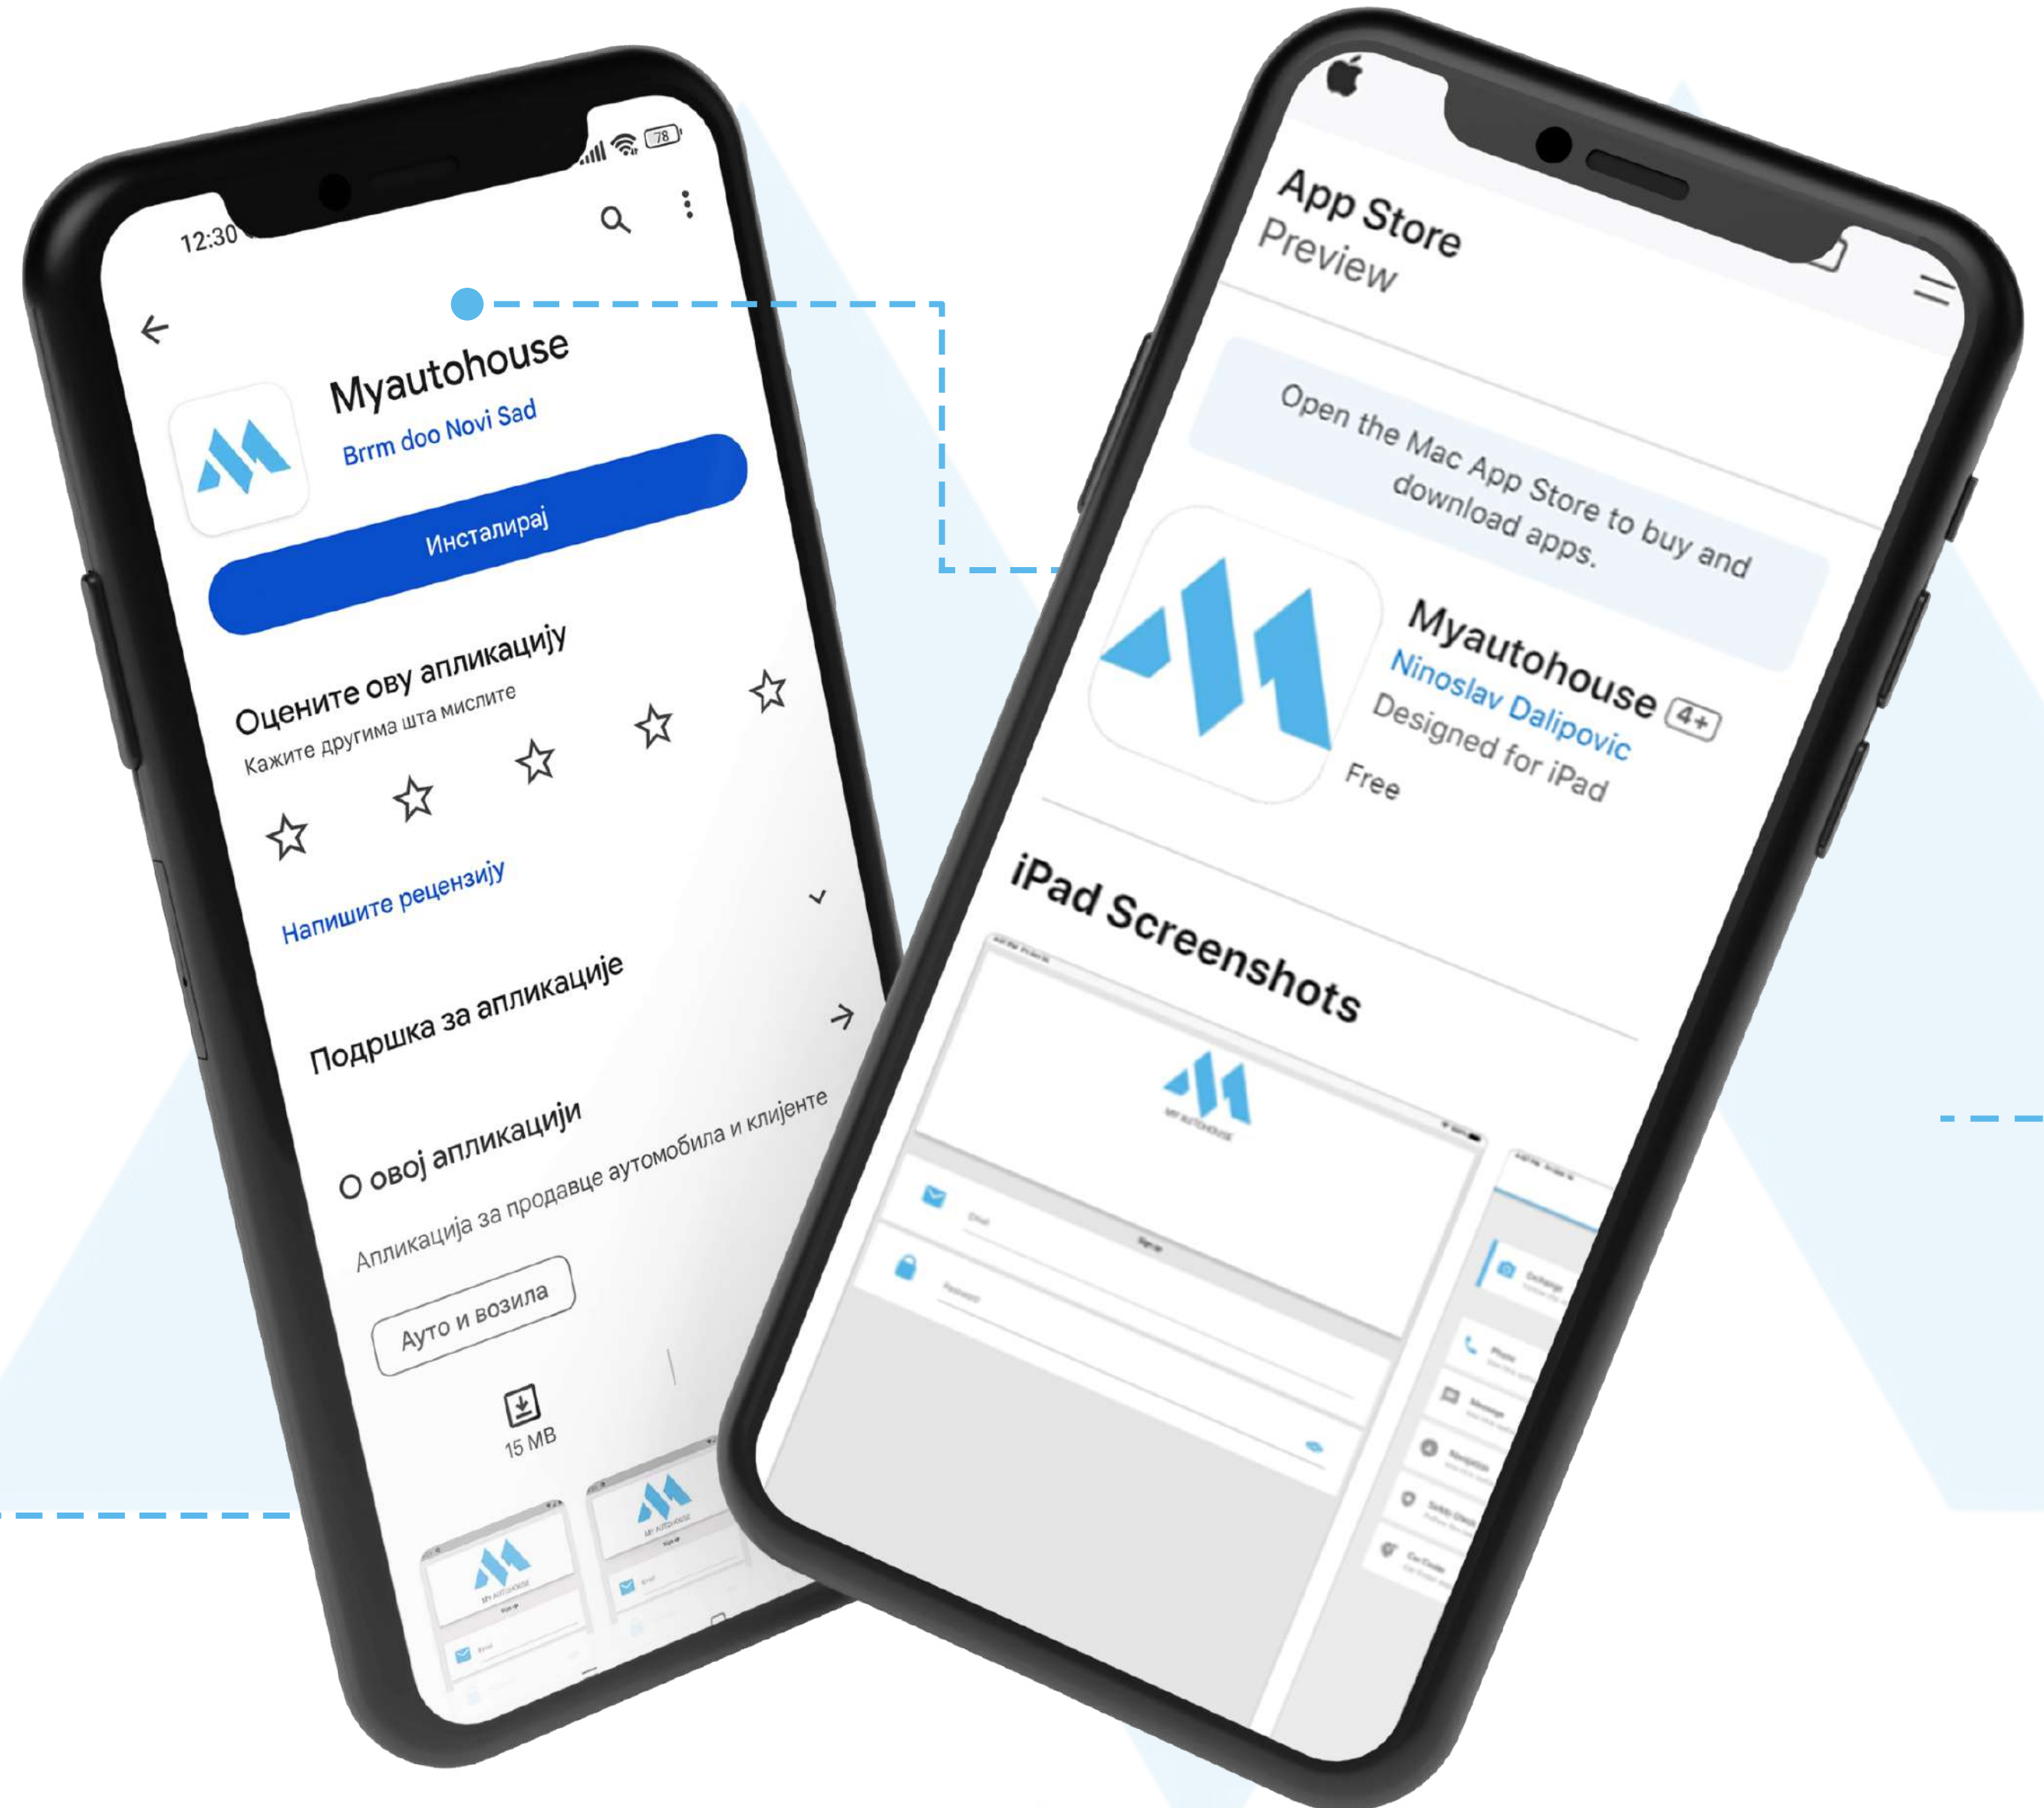

PLATFORMS

Cross-Platform Compatibility

The My Autohouse app is compatible with both Android and iOS platforms, making it easily accessible through the App Store and Google Play.

Moreover, the My Autohouse application is optimized for use on both mobile devices and desktop computers.
